Annual Handicap Review

Since the introduction of the WHS (World Handicap System), the AHR can only be calculated by the respective golf associations, as the associations have assumed sovereignty over the handicap calculation.

AHR - Switzerland

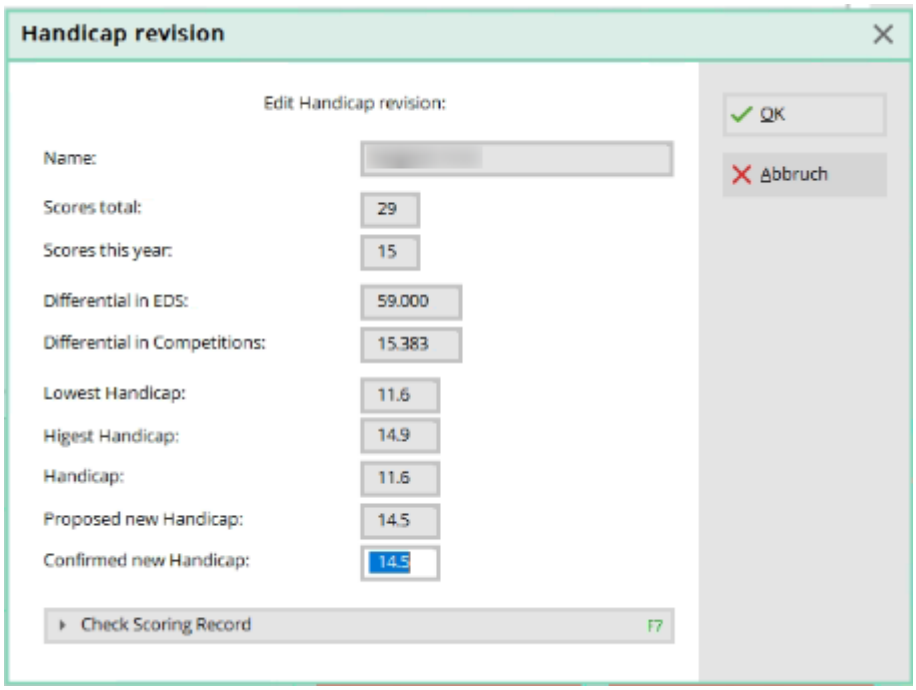
Together with Swissgolf, PC CADDIE has created the possibility to load the proposals of the AHR calculation (Annual Handicap Review) from SwissGolf for further processing.

For the annual handicap review (AHR Annual Handicap Review), you can load the proposals for handicap changes from SwissGolf.
Information on the HCP Review can also be found at SwissGolf

Start in PC CADDIE ***Handicaps - Annual Handicap Review*** or click the button  and in the further ***Annual Handicap Review for members***

You will then immediately receive a list of suggestions from members for whom a handicap adjustment could be useful. Members for whom no change is necessary are not included in the list. The list can therefore be very short:

If we open the 2nd member here with EDIT as an example, we get more information:



If you press ok here, the proposed HCP will be adopted.
There is an obligation to check the handicaps. There is no obligation to accept the proposed changes.
The decision as to whether a handicap is adjusted as part of the handicap review lies with the handicap committee of the player's home club.
