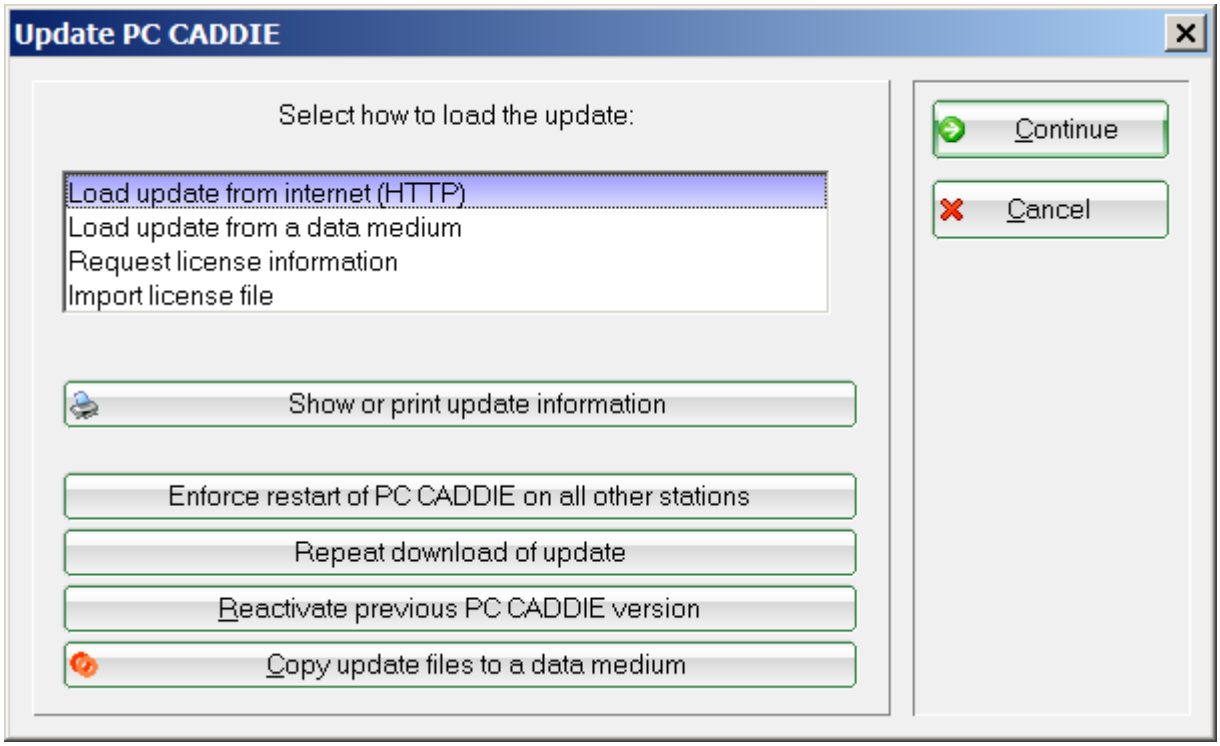
Update PC CADDIE

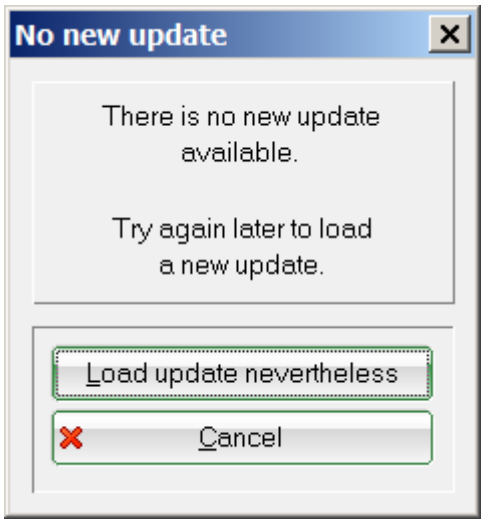
Updating PC CADDIE is important for a functioning system. Check regularly whether a new update can be downloaded.

Via ***End/Update PC CADDIE*** the following message window opens, which you can close with please close with ***OK*** to confirm:
In newer versions, start the update via ***System/PC CADDIE update*** or via the green „i“ at the top right and then ***Update PC CADDIE***

Follow the next windows and confirm this with ***Continue.*** Normally it is not necessary to make any changes to the preset selection:

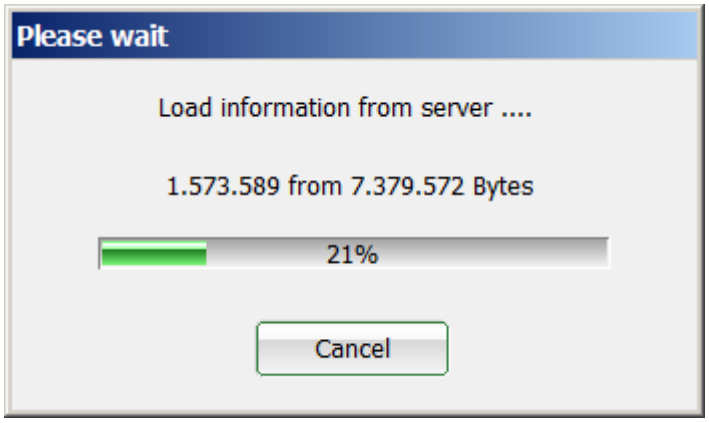


If the system is already up to date, you will see the following window:

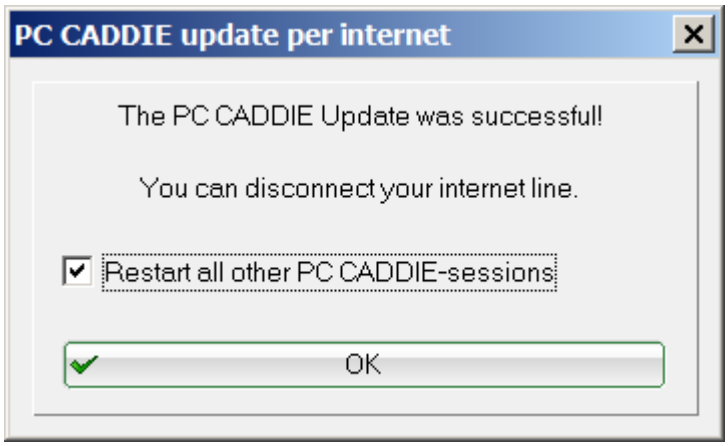


You can cancel with ***Cancel*** to exit the window.

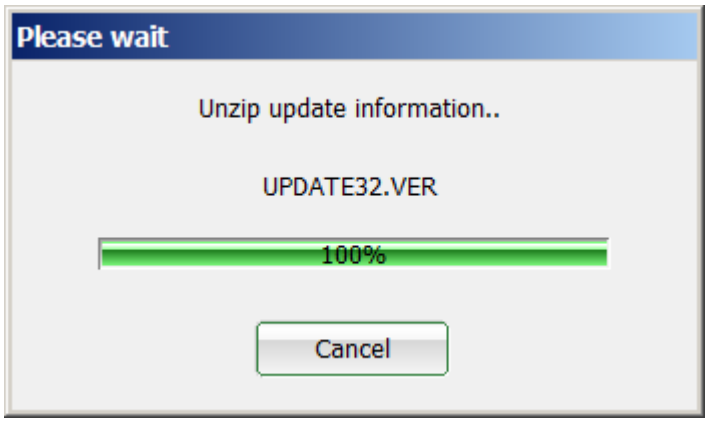
However, if a more recent version is available, PC CADDIE will then automatically start loading an update:



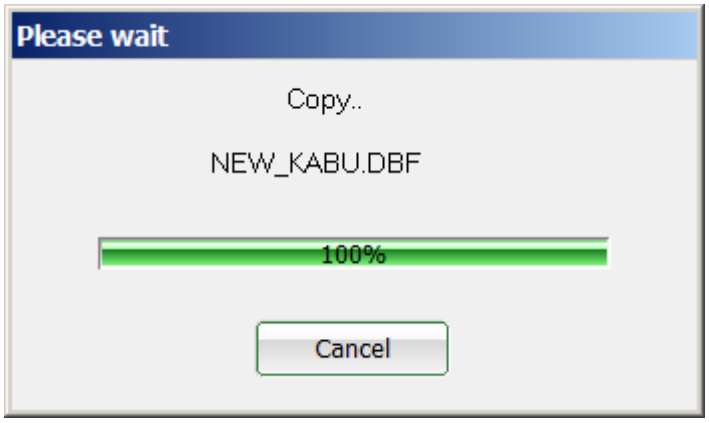
After successful loading, the next window opens and PC CADDIE plays the previously loaded update after confirming with ***OK*** automatically:

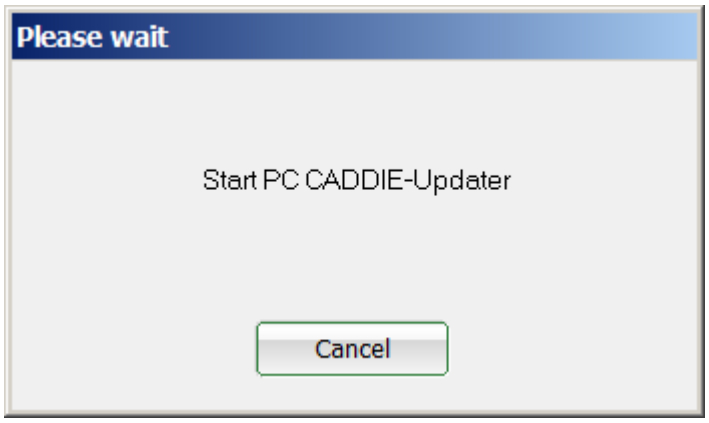


You will then see the following window: PC CADDIE unpacks the newly loaded files.



Confirm with ***OK*** the system is updated via an installation routine and PC CADDIE is restarted automatically:





After a successful update, the window with the password request opens and you can now log in again.
log in again.
