# Connect to intranet (for Germany)

To connect to the intranet, either click on the country button in the icon bar of PC CADDIE

or click on **System/With Intranet verbinden:**

In both cases, the intranet window opens:

The individual buttons are described in more detail below.

Show intranet server status

... is only for information in normal operation and looks like this:

DGV-Intranet Status

|	
www.dgv-intranet.de	....ok
www.golf.de	...ok
www.mygolf.de	.....ok
IIS	..ok

DateTime: last Check at 28.03.2019 14:12:19

Yes, start intranet connection

To synchronise the data with the intranet of your state golf association, please click on the button **Yes, start intranet connection.** The data will then be copied to the outbox and transferred automatically:

Please wait

Copying.....

Enter your own club information

Under this point you can call up the input window for the club data. You are then automatically in the account area set up for the intranet.

It is also possible to open this window via **Settings/Programme settings/Club address, bank details** . In this case, however, it is important that you manually switch to the account area that is activated for the intranet, which is usually the account area **CLUB.**

Address and bank details

Enter the main address, postal address and billing address here.

Own geodata

The coordinates (geodata) of your club are also stored here.
The geodata is automatically compared by PC CADDIE with the data stored in the DGV INTRANET (IIS) and loaded up to date:

- Every time you open „Enter your own club information".
- Every time you print the coordinate checklist.

- Every time you generate a badge order file.

own bank details

Via the button **Next** button takes you to the next window where you can also enter your bank details for the intranet:

Officers in the club

… and the functionaries in the club via **List of people who have a function in the club** update.
If you update persons, first transfer them to INTRANET and then check the club persons in the service portal under the „Club editorial office" tab - you can only see which persons you have currently transferred under club editorial office!
Please note that the transferred e-mail address of the functionaries is required for their login. It is best to enter the e-mail address directly so that the login of the function holders cannot be deactivated if the e-mail address is changed in the personal data.

Funktionsträger / Anlagendaten

Benutzen Sie diese Funktion, um die Funktionsträger in Ihrem Golfclub anzugeben bzw. zu bearbeiten. Diese Informationen können im Intranet abgerufen werden.

Funktionsträger sortieren

Erläuterung

In der hier hinterlegten Reihenfolge erscheinen die Funktionsträger als Clubpersonen im GolfGuide auf Golf.de und myGolf.

Die Funktionsträger werden aus Ihrer Clubverwaltungssoftware (CVS) an das DGV-Intranet übertragen.

Nach einem Übertrag der Personendaten aus der CVS muss die Sortierung hier erneut hinterlegt werden.

Sortierung	Funktion	Name	Sortierung Ändern
0	Präsident/in	Benedikt Schmedd...	≡ **3**
1	Spielführer/in	Anja Arens	≡

Hinweis:
Die hier hinterlegte Sortierreihenfolge steuert die Darstellung auf golf.de und mygolf.de - nach einem Übertrag der Personendaten aus der Clubverwaltungssoftware muß die Sortierung hier erneut hinterlegt werden.

Request club information

Here you can request the current *club information.* You have the option, for example, of automatically loading the club data for Germany, Switzerland and Austria and, since January 2023, Belgium into your PC CADDIE.

Anforderungs-Datensatz ✕

Informationen über die verbundenen
Golfanlagen aus dem Intranet abrufen

✓ **O**K

✗ **A**bbruch

Confirm with **OK** and then start the *Intranet synchronisation*. The current club master data is automatically loaded into PC CADDIE.

You can then view a successful import in the status window *Current information* window:
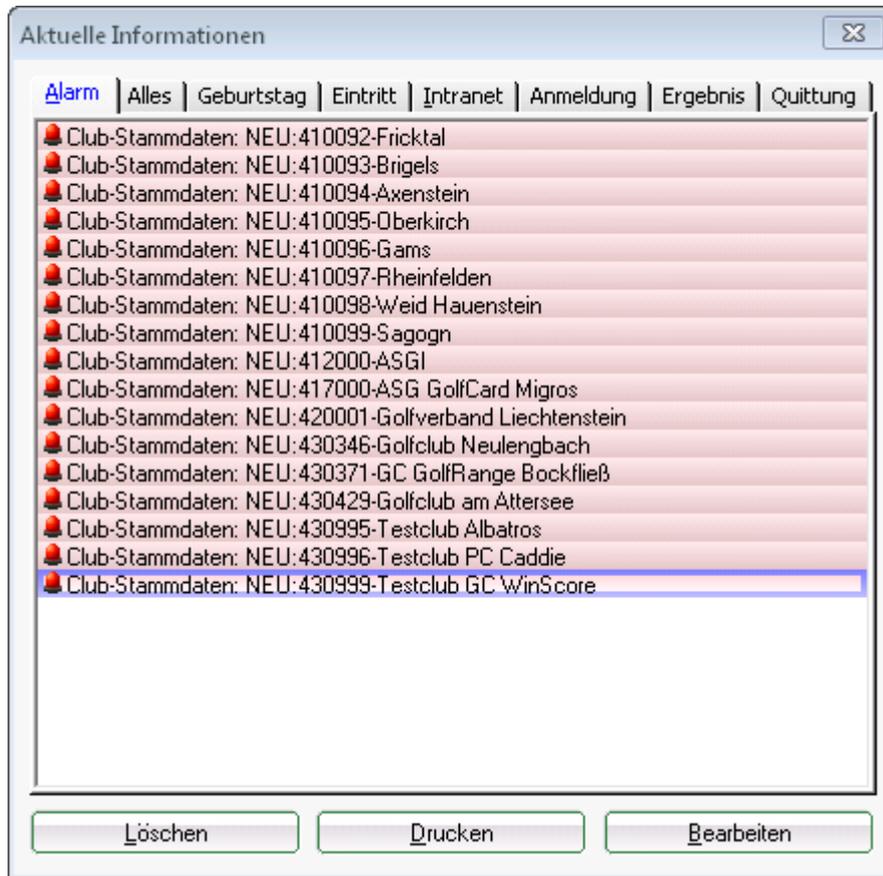

If you open the individual alarm entries once with edit, they are recognised as „seen" and the alarm disappears immediately.

Green fee configuration

Here you have the option of transferring your green fee items directly to golf.de and/or displaying them on the intranet service portal.
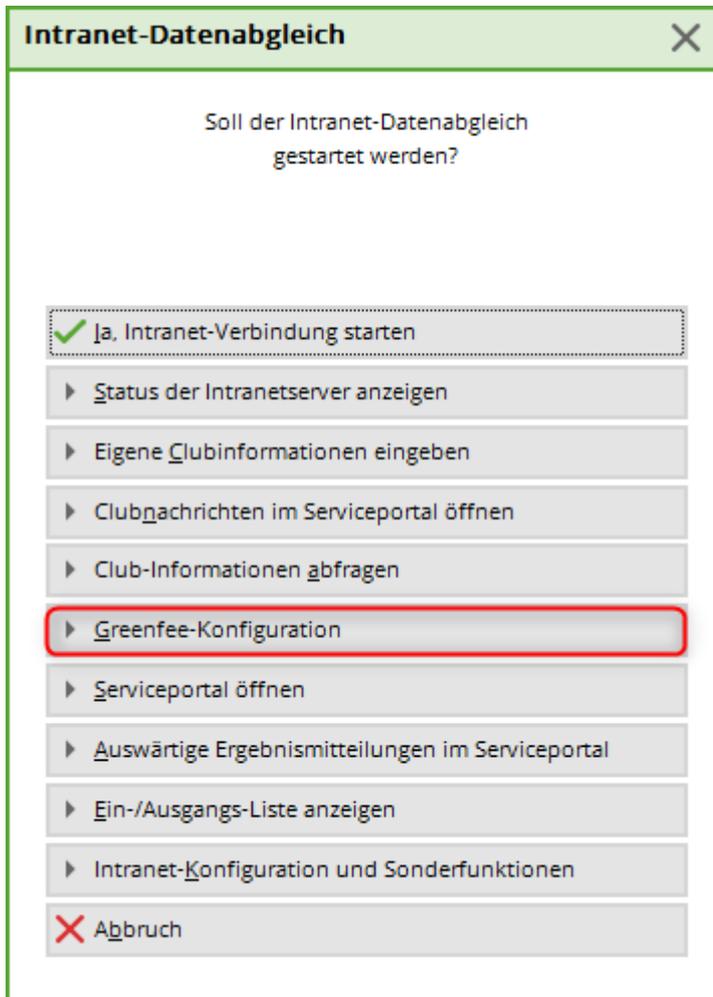

with cash account area

Please switch to your cash account area first:

Then restart the selection for the intranet:

Then select **Green fee configuration**

You then have various options:

For example, load all green fee articles from your article list.

The result is usually a large number of items. You can now delete or move individual items. If you press Cancel, all items are deleted again and you have the option of retrieving individual items using the „New" button.

Greenfee Artikel

Name	Preis	Anlage	SP	Onl
Erwachsene Wochentags	100,00	1	✓	✓
Erwachsene Sonn/Feiertags Test für ABO 2.0 V	80,00	1	✓	✓
Jugend Sonn/Feiertags	40,00	1	✓	✓

Master data	Here you can see, among other things, the general club information and the current PC CADDIE version.
Club persons	If you click on the DGV symbol in the PC CADDIE icon bar, continue to **Enter your own club information,** you can update the list of persons with special functions in the club. All persons are displayed here, including those who have been uploaded to the portal in the past.
Members	The number of members currently uploaded is shown here. It also shows whether all your minimum entries are complete. You can also view the evaluation for the regionality check.
Defaults	Here you can see how many members have a master sheet and whether there are any errors. You can display external competition results here.
Club tournaments	Under **Club tournaments** you can see your own uploaded tournaments and their status. It is particularly important that you can check here whether competition results have been forwarded to other clubs and whether the clubs have already retrieved the information.
Club news	Special information, e.g. open day or green fee prices, can be entered here.
Course data	The courses with the rating values are stored here. You can enter various information about the club for each course by double-clicking on the course name. ⚠ The display in the Golf Guide on www.golf.de takes place here.
DGV card	You have under **DGV card** to view the status of card orders. You can also check the remaining quota of passes.
Reviews	You can find reviews of your club by guests or club members at **Reviews.**
and much more...	TIP Further information on this can be found at Contact: DGV

External results notifications in the Service Portal

This is a direct link to the Service Portal and shows you away result notifications. You can open the messages by clicking on the player's name and view details of the result dispatch.
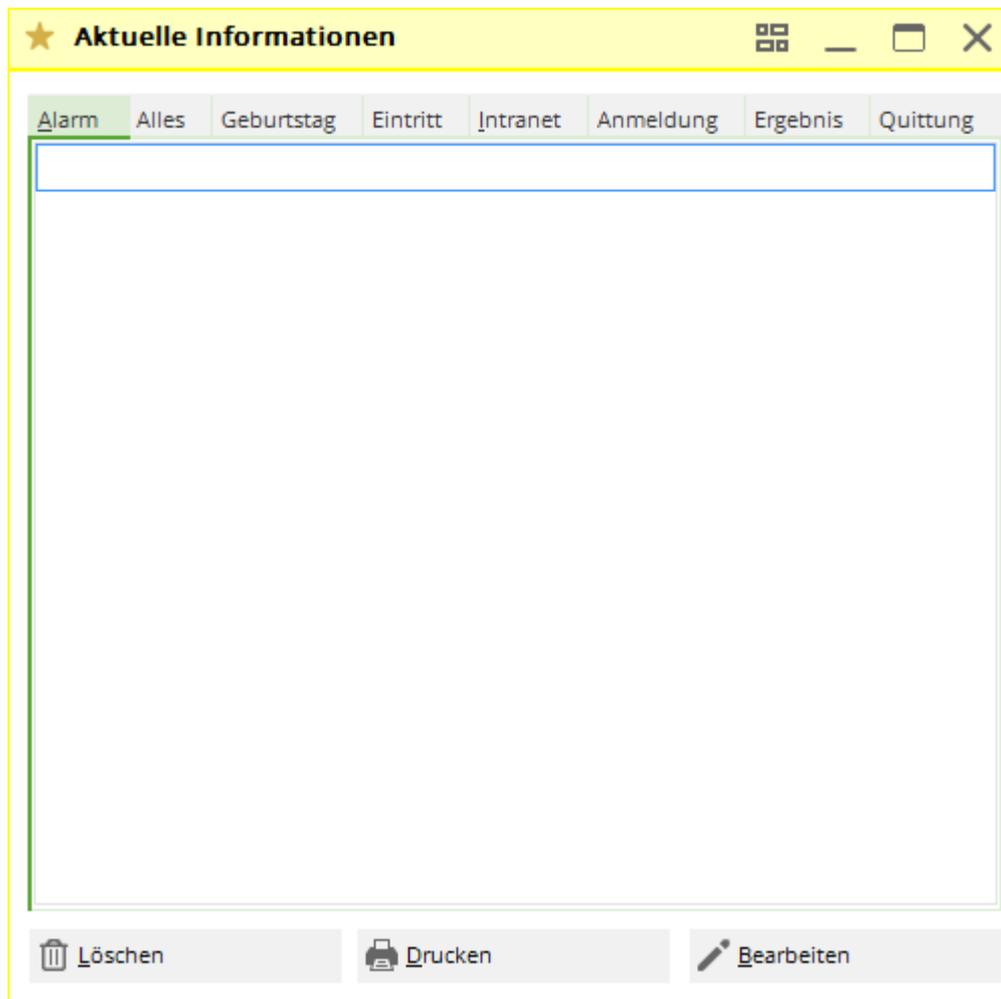

Germany

Example service portal in Germany:

Show incoming/outgoing list

Current information" window

Use this button to call up the **Current information** window:

Here you can track which data has been exchanged with the intranet.

- If something needs to be done actively, this is shown under **Alarm**. You can then select and edit the entry.
- Under **All** contains ALL the information that can also be found in the individual tabs.
- For **Birthday** only birthdays are listed.
- Under **Joining** contains information on both new members who have joined and members who have left.
- **Intranet** lists the files exchanged with the intranet.
- When **Registration** tournament registrations are listed separately.
- Under **Results** you can see the external results of your members.
- Under **Receipt** you can see the badge receipts for the badges ordered by your members, individually for each member.

Example of a filled display:

- all **green** ticked entries have been processed automatically.
- **blue arrow** means that this data is ready for intranet synchronisation.
- The **yellow bell** means that the file may be so large that the intranet synchronisation has not yet been completed.
- a **yellow star** simply means that the information is new, e.g. birthday, and has not been opened.
- a **red bell** would also be visible under ALARM and appears, for example, when a new CLUB has been loaded into the club list. In this case, the red bell disappears with Edit (View).

- A **red tick** means that the attempt to transfer the file to the intranet has been cancelled (too many unsuccessful attempts)

Important: With **red cross** please clarify with PC CADDIE Support how this can be rectified.
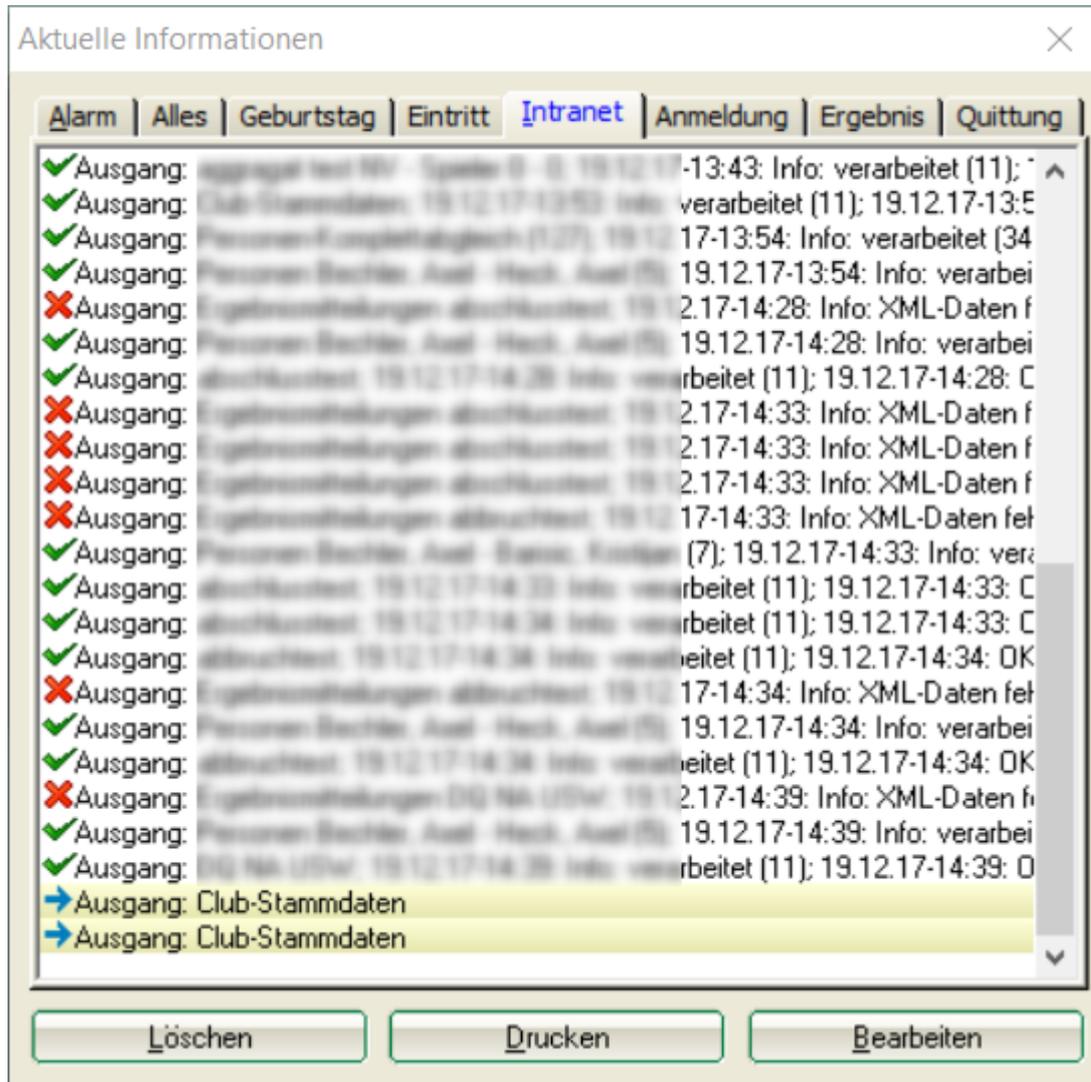

- The button **Delete** button only deletes the display of the files in the info window. The files are still always transferred to the intranet. Deleting is normally unnecessary as the files are automatically no longer displayed in the info window after a few days.
- With **Print** you could print the information, perhaps this would be a good idea for birthdays.
- With **Edit** you open the info line, where you also have the option of, for example, marking an entry with a **red cross** directly to PC CADDIE Support by e-mail.

Intranet configuration and special functions

Read more under Intranet configuration and special functions more!

Demolition

The button *Cancel* button closes the window.

DGV/Swiss Golf - Anonymised presentation of results

If a member does not wish to appear on the results list on the intranet but wishes to remain anonymous, please proceed as follows:
This setting can only be made at the home club and also applies to results from away tournaments.

To do this, call up the selection in the person mask via the button (1) Intranet and select (2) Check person in the service portal.

Club members and officers

Until 2018, a club person was often defined as someone who held a position in the club, e.g. the president.
These people are now always called **functionary**, On the other hand, you can find all people who belong to the club in the DGV portal under **club persons**including your own members.

Officers

transferred to the portal

The function carriers are transferred from PC CADDIE to INTRANET. Very important is the **transfer of the MAIL addresses** to the persons, because only with an e-mail address stored on INTRANET can a function holder apply for their own LOGIN for the DGV portal.
Enter and transfer function holders

Make sure you enter the MAIL address. The e-mail address can be taken from the personal data or you can enter an individual e-mail address for the function holder:

Activate function holders in the DGV portal

Firstly, you can view the function holders here. Have the right people been transferred from PC CADDIE?
On the other hand, you can activate the function holders **activate** if they have previously requested a LOGIN from the DGV. In this case **release** is bold and active for the persons. In our screenshot, nobody has requested a login. As soon as a login has been requested from the DGV, you will receive an E-MAIL to inform you so that you can release the requested LOGIN.
If you remove a function holder in PCC and transfer this change to INTRANET, the LOGIN will expire.

Move function carrier sequence

You can move the order of functionaries in the DGV PORTAL under Club Editorial:

Load course data from the intranet

You can find out how to load the course data for your current rating from the intranet under: [Load course data](#)
