

Intranet in Luxembourg

With the help of the button **Intranet** button, the intranet exchange with the Luxembourg server takes place.

It is no longer possible to enter a foreign result before 01.01.2021.

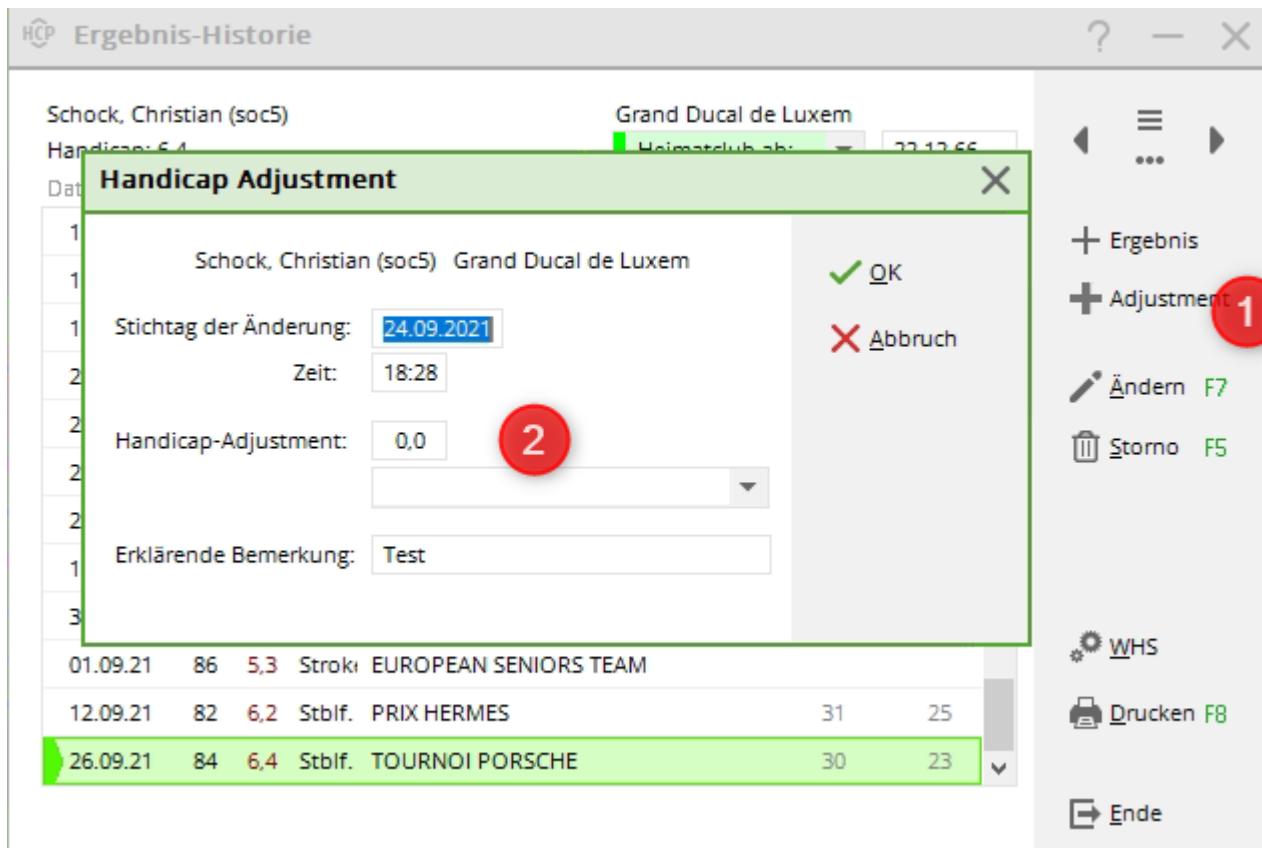

Tournament conclusion: After the end of the tournament, the results are noted in the master sheets and are also sent to the Luxembourg server. The new handicap is calculated there at 11 pm. If a tournament is not completed until the next day, the handicap will not be recalculated until the following night.

Press Contrl and WHS to calculate the WHS up to the selected date.

The WHS calculation in Luxembourg takes place for all tournament results from 01.01.2017.

Button Adjustment in the master sheet

In the master sheet of each player you can adjust the handicap with the button **Adjustment** button.

The Handicap Adjustment field should be filled with the value by which the handicap should change.

Handicap Adjustment

Schock, Christian (soc5) Grand Ducal de Luxem	<input checked="" type="checkbox"/> OK
Stichtag der Änderung: 24.09.2021	<input type="checkbox"/> Abbruch
Zeit: 18:28	
Handicap-Adjustment: 1.4	
Erklärende Bemerkung: Test	

In our example, the handicap would change by +1.4.

HCP Ergebnis-Historie

Datum	AGS	Index	Bemerkung	Net./Pl.	Bru./Pl.
13.07.21	81	5,9	Stblf. CHALLENGE 2000	33	27

Grand Ducal de Luxem
Heimatclub ab: 22.12.66

Navigation icons: back, forward, search, etc.

Buttons on the right: Ergebnis, Adjustment, Ändern F7, Storno F5, WHS, Drucken F8, Ende.

The recalculation then takes place overnight.

An adjustment can be deleted from the master data sheet at any time.

"Merging" of handicap master data sheets

The merge function can be used to display the handicap master sheet of a member who changes home club in the new master sheet.

This merges two master data sheets together. This function is only available in the PC CADDIE of the

Luxembourg association.

Please contact PC CADDIE Support. We will be happy to help you.
