# TeeUp control

## Functional description

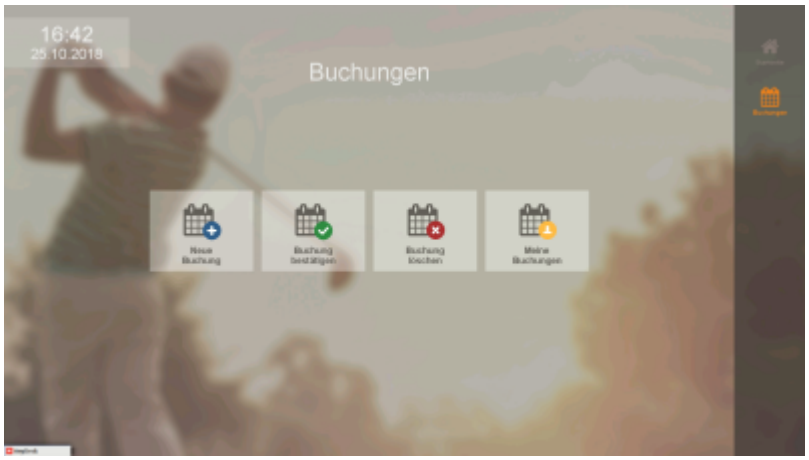

PC CADDIE is the „master“ and manages all Mifare cards and customer data (in particular the card credit). The cards are therefore loaded and programmed with PC CADDIE, as with any PC CADDIE card system.

## Interface

This is what the start page on the terminal looks like, with the time and date visible at the top left. In the centre is a „Bookings“ field. If you click on it, you will be redirected to the second page. At the top right you can see which window you are currently in.

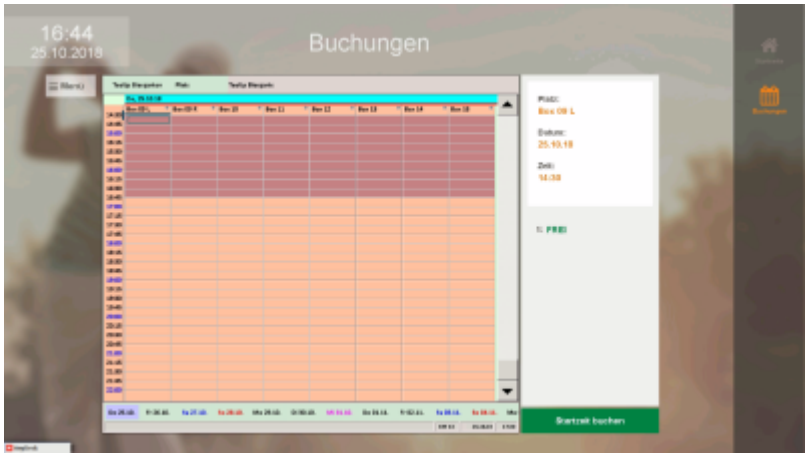

This is now the second page and at the top right you can see that we are one page further on. There are 4 new fields here. These are self-explanatory and take you to the last page.

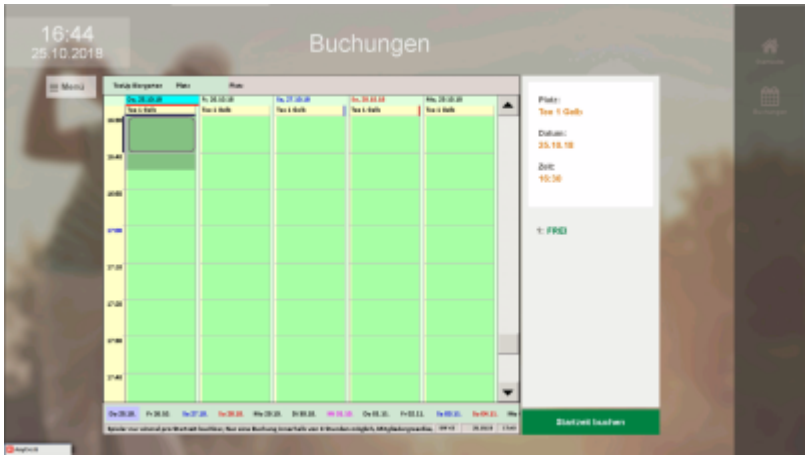

This is the last page. The timetable is shown and the individual tee-ups, as usual the time is shown on the left in the timetable, the selected day is shown in blue at the top, the days are shown at the bottom (Saturdays are blue, Sundays are red, public holidays are pink and working days are black).

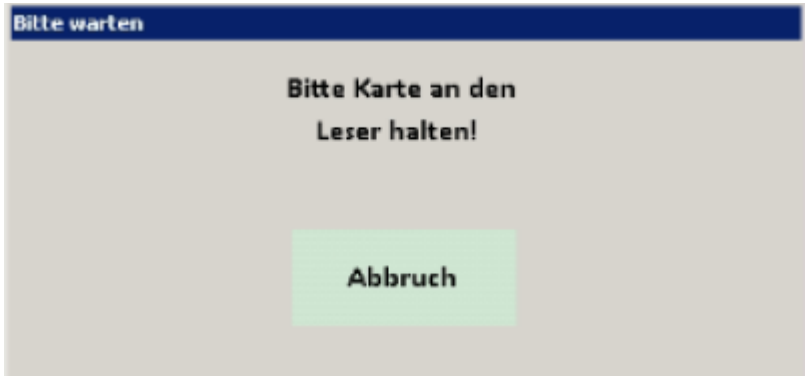

On the right you can see the place, date and time of the selected field. There is also a menu button to the left of the timetable, which takes you back to the previous page. If you then click on Book start time (bottom right), you will be redirected to the booking. You can also change the tab and see the seat bookings.

This is the other view of the timetable. Here you can see the seat bookings. The timetable layout has remained the same with the exception that you can see the booked places here. If you then click on Book start time (bottom right), you will be forwarded to the booking.

This small window appears when you click on Book start time. Simply hold the card up to the reader and you will be redirected.

Once you have presented your card, this window appears. You can see the name of the player, the selected tee-up, the date and the time (rounded to the nearest quarter of an hour). Then you have 3 options to book and a cancel button. With Start now it starts immediately, with Duration:15 min it starts at the rounded time and with Duration: 30 min it also starts at the rounded time, but is booked

for 30 min.

This is what it looks like when you have booked a time.
