

Timetable info

The module **Timetableinfo** module enables a club to allow golfers to print a bag day or reserve a tee time outside normal opening hours.

Please note that you must first set up a Timetable View [Define timetable views \(Views\)](#) in order to be able to use this function on the terminal.

The screenshot displays the reservation software interface for Golf- und Country Club Ansalza Wettingen. The main window shows a reservation grid for 18 holes on Wednesday, December 29, 2010. The grid has time slots from 10:10 to 14:00. A reservation is shown for 11:40-11:50 for two members: Schmedding, Benedikt (27.4) and Hember, Paul (-). The interface includes a left sidebar with menu items like 'Neue Reservierung', 'Bestätigen', 'Eigene Zeiten', 'Stornieren', 'Clubinformationen', 'Reservierung', 'Greenfee buchen', 'Wettspiele', 'Score eingeben', and 'Handicaps'. At the bottom, there is a date navigation bar and a status bar showing 'Keine Onlinebuchung für Gäste >30, Michael, Gäste' and 'KVV 52 29.12.10 10:10'.

New reservation The player selects the desired time in the timetable and swipes his card. If there is no timetable rule [Set timetable rules](#) that prevents or restricts a booking, the start time is booked immediately.

Confirm The player can confirm his tee time using this function. In other words, he confirms that he is on site.

A corresponding timetable rule [Set timetable rules](#) is required for this process, which directly books a green fee item for the respective group of people.

When confirming a tee time no bag tag is printed.

Own times This menu item allows players to get an overview of their own start times.

Bereich	Tag	Zeit	Dauer
18 Loch	29.12.10 (Mittwoch)	11:40	

Ende

Cancellation Players can cancel their start times directly at the terminal within the predefined cancellation periods.

Bereich	Tag	Zeit	Dauer
18 Loch	29.12.10 (Mittwoch)	11:40	

Stornieren Ende
