

# Timetable info

The module **Timetableinfo** module enables a club to allow golfers to print a bag day or reserve a tee time outside normal opening hours.

Please note that you must first set up a Timetable View [Define timetable views \(Views\)](#) in order to be able to use this function on the terminal.

The screenshot displays the 'Reservierung' (Reservations) module. The main area shows a grid for reservations on Wednesday, December 29, 2010. The grid has time slots from 10:10 to 14:00. A reservation is shown for 11:40-11:50 for two members: Schmedding, Benedikt (27.4) and Hember, Paul (-). The interface includes a sidebar with navigation options like 'Neue Reservierung', 'Bestätigen', 'Eigene Zeiten', and 'Stornieren'. At the bottom, there is a calendar navigation bar and a status bar showing 'Keine Onlinebuchung für Gäste >30, Michael, Gäste'.

**New reservation** The player selects the desired time in the timetable and swipes his card. If there is no timetable rule [Set timetable rules](#) that prevents or restricts a booking, the start time is booked immediately.

**Confirm** The player can confirm his tee time using this function. In other words, he confirms that he is on site.

A corresponding timetable rule [Set timetable rules](#) is required for this process, which directly books a green fee item for the respective group of people.

When confirming a tee time no bag tag is printed.

**Own times** This menu item allows players to get an overview of their own start times.

Bereich	Tag	Zeit	Dauer
18 Loch	29.12.10 (Mittwoch)	11:40	

Ende

**Cancellation** Players can cancel their start times directly at the terminal within the predefined cancellation periods.

Bereich	Tag	Zeit	Dauer
18 Loch	29.12.10 (Mittwoch)	11:40	

Stornieren
