Close PC CADDIE

You can close the program via the menu ***Exit/Close PC CADDIE***. You can also click on the „x“ from the top-right corner of the window.

The program asks once more if you want to make a intranet data synchronization before closing.

Press ***Yes*** if you have data to upload, ***No*** when you don't want to upload anything, and ***Cancel*** if you want to keep the program opened.

Pressing Return/Enter on the keyboard means ***Yes***.
