

Handicap list

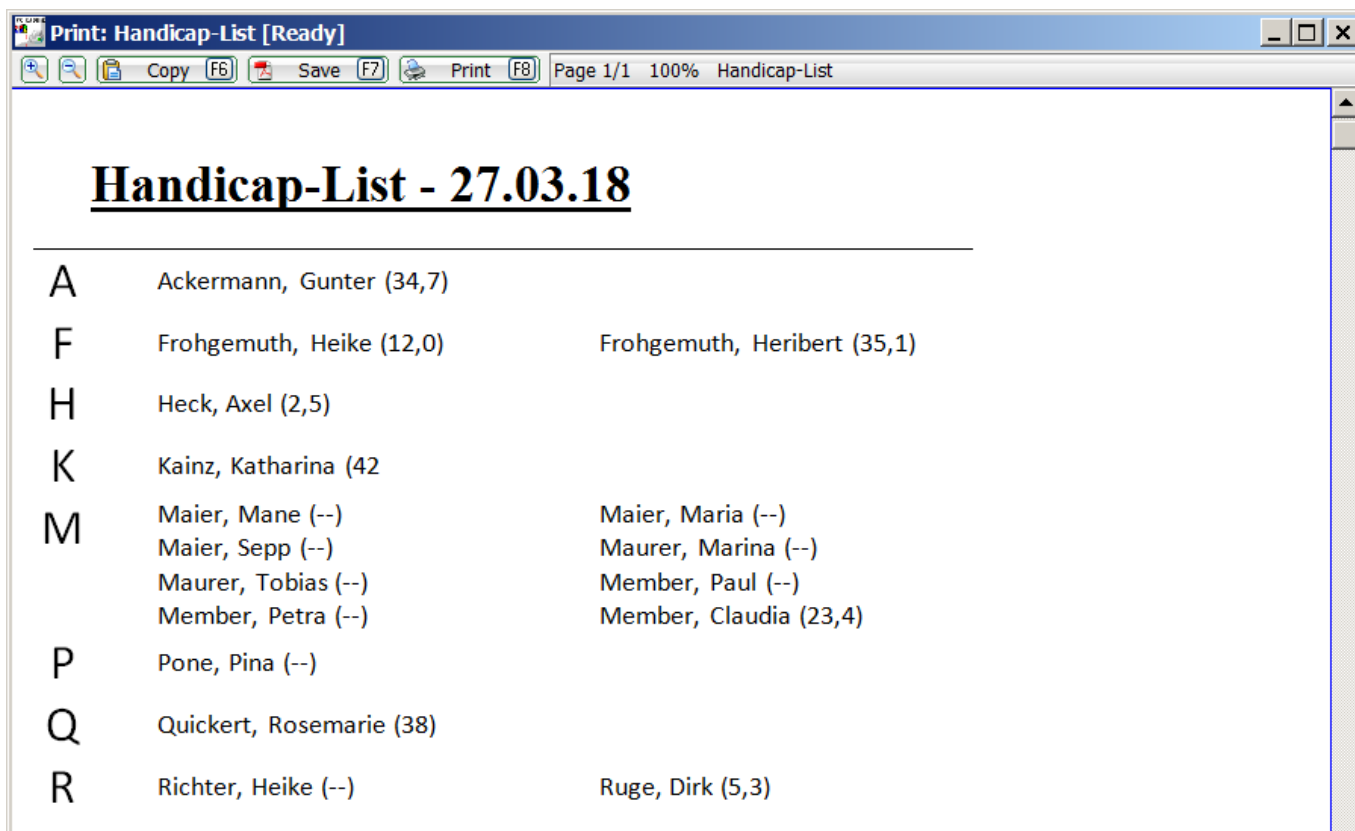

For the handicap list (**Handicaps/Print.../Handicap list**) you can choose between two formats:

If you select „Handicap list (notice)“, the printout will look like this:

Within the same handicaps, you can sort by name (**sequence**: „Handicap, name“) or by handicap (**Reihenfolge**: „Handicap, handicap (exact)“). It is also possible to sort by **Order** „Names“, the alphabetical list then looks as follows:

To obtain a handicap list with the details of the playing handicap, select the format „Any sorting with playing handicap“. With **Order** you can select any sorting as with the other print functions. Start with

Print (F8). In the following window, the documents listed under [Course rating table](#) appear in the window that follows. If you have different courses and the course rating tables are saved, you can load them using the **Load** button.

It is important for the correct printing of the HCP list with details of the playing handicaps that the course rating values are filled in in the fields provided by default. Further tee colours are then filled in for the values 7-12

The screenshot shows a software window titled "HCP Table" with a close button (X) in the top right corner. The window contains a form for printing handicap data. At the top, it says "Print handicap table with the following data:". Below this are two text boxes for "Title 1:" (containing "Golfclub Sonnenschein e.V.") and "Title 2:". There are two tabs: "Values 1 to 6" (selected) and "Values 7 to 12". Under the "Values 1 to 6" tab, there are six rows, each with a "Name:" field and three empty fields for "Par:", "CR:", and "SR:". The names are: "Championship; Tees; black", "Men; Back Tees; white", "Men; Back Standard Tees; yellow", "Ladies; Back Standard Tees; yellow", "Men; Standard Tees; blue", and "Ladies; Standard Tees; blue". At the bottom of the form are two buttons: "Enter colours/Special settings (F7)" and "Reset basic settings". On the right side of the window, there is a vertical panel with four buttons: "Print (F8)", "Quit", "Save", and "Load". Below these are two more buttons: "CR data" and "CR data".

The list corresponds to the following representation:

If you want to print a completely different list display, you can create your own list format under [List of persons](#) to realise your own list format. Here, under „Layout“, you have a wide variety of fields to choose from in addition to the master default.

You will get a very nice space-saving 3-column HCP list if you print the lists of persons with the following layout:

Format editor

Name: HCP List compact Define new format

Format type: List Lines: Title: HCP List compact - <DATE>

1/0 (0) | Line | Tab

```
<GRAPHIC 0,0,0,0, HCP-List.PGE>
```
