Settings

In the window ***Hotel settings*** window, you will find the basic settings for your hotel:

Tab Room categories

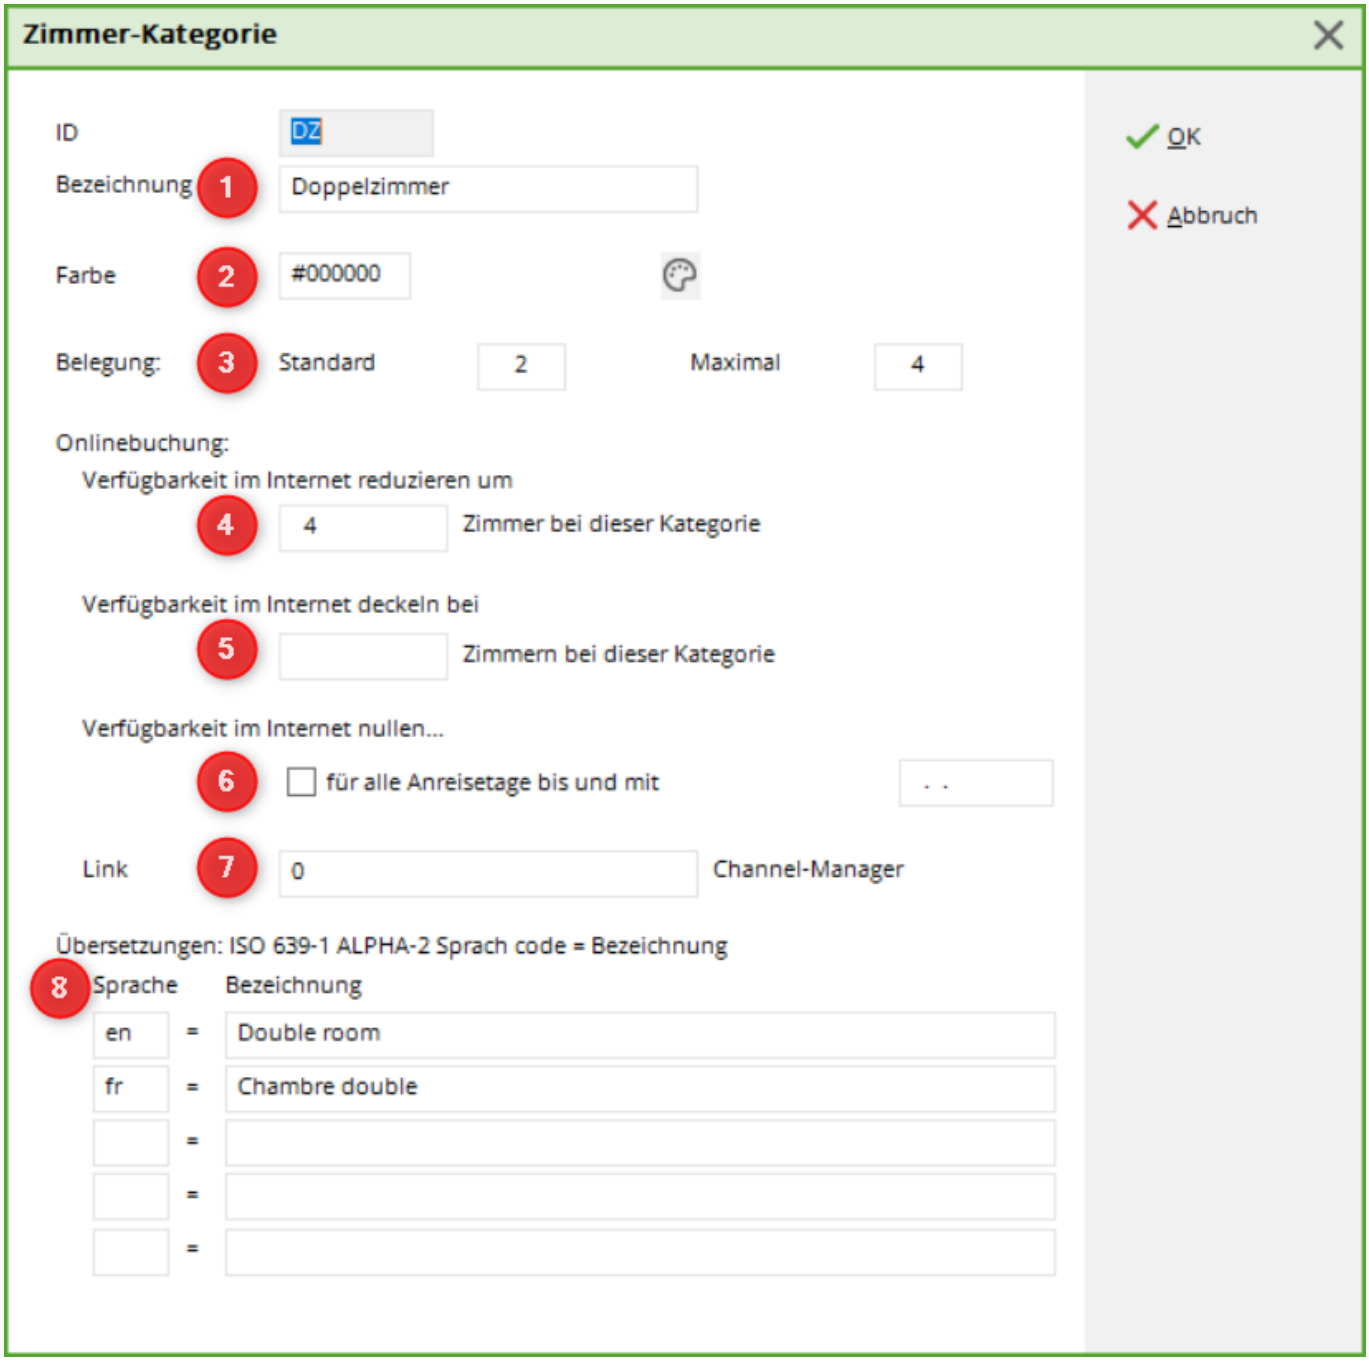

The basic settings for the room categories are defined in the Room categories tab. PC CADDIE makes the settings for you.

1. Abbreviation of the room category
2. Name of the room category
3. Standard occupancy of the respective room category
4. Maximum occupancy of the respective room category
5. Online availability of the respective room category
6. Link for a connection to the Channel Manager
7. Number of rooms in the respective category

About ***Edit*** you can make changes. With the help of ***Delete*** you can also remove categories. The buttons ***Up*** or ***Lower*** buttons change the order.

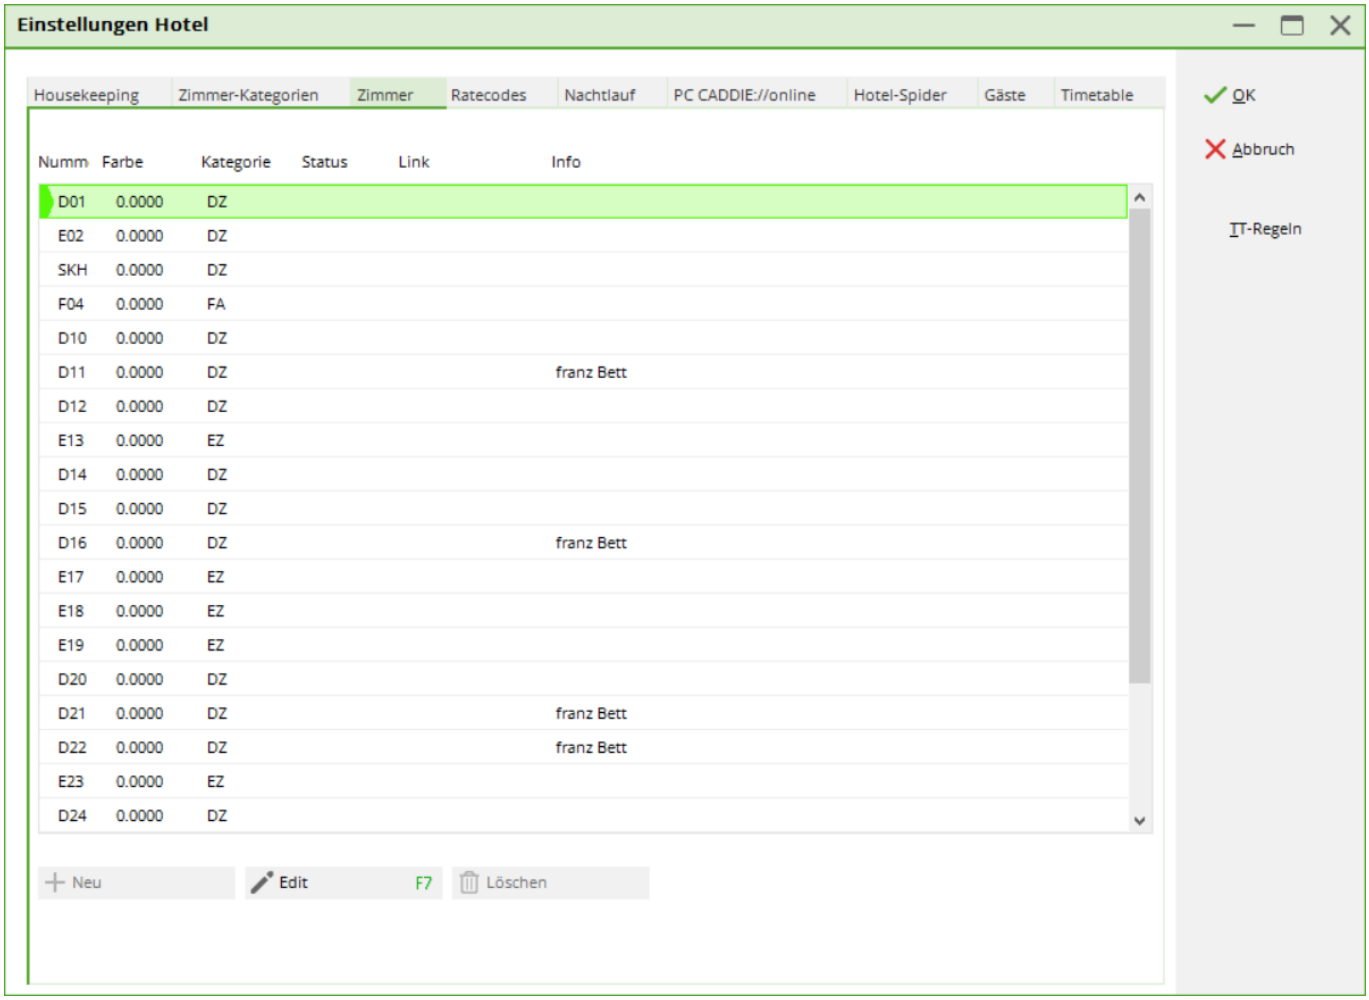

The detailed settings of a category can look like this (button ***Edit***)

1. Name of the room category
2. Possible colour settings
3. Standard and maximum occupancy
4. Reduction of the number of available rooms on the Internet
5. Capping the availability of a room category
6. Zero availability on the Internet
7. Link for a channel manager
8. Language translations of this room category

Room tab

Here you will find an overview of your different hotel rooms:
