

# Open item postings

In PC CADDIE, it is possible to manage open items from cash bookings in a separate account area (OP area). This has the great advantage that you have a constant overview of the outstanding amounts and can manage them very easily and effectively. If you would like to use our service, please contact PC CADDIE Support for the installation of the OP area.

## Cash register - Post to account

With this function you can leave postings open in the accounts (open item postings). Payment can be made at a later date. If you click on this button during the payment process **Post to invoice in account** you will see the following window:

**Bezahlen** [X]

Geben Sie die Bezahlung ein:

If you would like to enable „on account“ only for customers with direct debit authorisation, please contact our support team for installation.

If you only want to block account bookings for individual customers, enter the additional information **„NOOP“** (without inverted commas).

If you would like to generate an invoice from this outstanding amount, this is possible via the OP area (please read the chapter [Edit accounts](#)).

Payment of the outstanding invoice can be made either by cash/credit card or by bank transfer. The procedure for these payment methods is different. Please read the following chapters.

# Reference code

You can also enter a reference code when booking.

Achtung: Offene Buchung

Möchten Sie wirklich den Betrag

45,00

Konto-Nr. (Fibu):

Gruppe

OP

OP-Belege

Neu

Lösch.

Name

Beleg <NO> <REF>

Fälligkeit

.

Leer = Buchungstag

Status

N - Normal, einmalig

+ Neu

✓ Sichern F11

🗑 Löschen F5

The invoice will look like this:

Leistungsart	MwSt.	Einzel/EUR	Brutto/EUR
18.07.23 Beleg 20080403 TEST12345			45,00
Laufkundschaft			
1 Erwachsene Sonn/Feiertags	25,0%	45,00	45,00
enthaltene Mwst. 25,0%:	EUR 9,00	36,00	45,00

You have a total of 30 characters available, which may not be sufficient for long article names and booking numbers. In this case, you can also use a different command: <NOR> (number or reference) The booking number is then printed, unless there is a reference, in which case this is printed.

# Payment of open items with cash or credit card

To do this, first call up the customer in the cash register. The payment of an outstanding amount is initiated via the **account** button.

Wählen Sie die Buchungen

Rechnung auf:

✓	14.02.19	16:21	Beleg 201800005	Mustermann, Paul	60,00
✓	14.02.19	16:21	Erwachsene - werktags	201800002	60,00

☐ Umbuchungen vornehmen (F11) ☒ Familien zusammenfassen

Gesamtsumme: 60,00  
Datum bis:

1. **OP document**: Here you can print an invoice for the open items!
2. After clicking on **PAY** you will see the usual „Pay“ window of the cash register. PC CADDIE automatically balances and proposes the total amount to be paid.
3. **Settlement** prints the receipt
4. Click on **Cash register** you are directly back in the cash register window.
5. With **Repeat** you are in the overview of the till receipts that have been created since the last daily closing.
6. With **Show account** you are in the sales account of the customer's till
7. **Show clearing account** switches to the customer's sales account in the account area for open items.
8. **Reload receipts** is useful if you have a large number of vouchers and you have not ticked the appropriate box at the top, for example. The vouchers are loaded again complete with tick marks.
9. **Toggle activation** removes all tick marks from the vouchers.

## Payment of open items by bank transfer

The outstanding invoice was paid by the respective person by bank transfer and now you would like to post this payment in PC CADDIE. If the cash register is still open, please close it. Select the corresponding account area in which the invoice is open (e.g. OP) and open the sales account via **Turnover** and **Edit accounts**.

You will find the outstanding amount here as a white, posted invoice entry

You can also post a bank transfer directly in the cash register in the same way as a cash or credit card payment. This may be particularly interesting if you use the accounting export. You can use it to ensure that this posting is also exported directly with the export of the cash register area. This is particularly practical if there are no direct debit authorisations in the operating theatre area (Please discuss the process in detail with the support team). The total amount is shown on the daily closing. This is transferred to the accounting department during the accounting export.

## Payment of amounts in advance

We envisage a situation where your customers pay amounts in advance before they have received the goods, as an advance payment so to speak. This amount must be posted to the account as a credit.

To do this, call up the customer in the cash register. The payment of an amount is cancelled via the **clear** button. PC CADDIE displays the usual payment screen:

## Bezahlen

Geben Sie die Bezahlung ein:

Kunde sosu Sonnenschein, Susanne

✗ Abbruch

Here it is important that the amount is posted as a credit. If the open item area has been installed, this posting is immediately moved to the open item area.

If you now call up your customer in the cash register, you will recognise his credit balance of € 100 in green letters.

## Cancelling open item postings

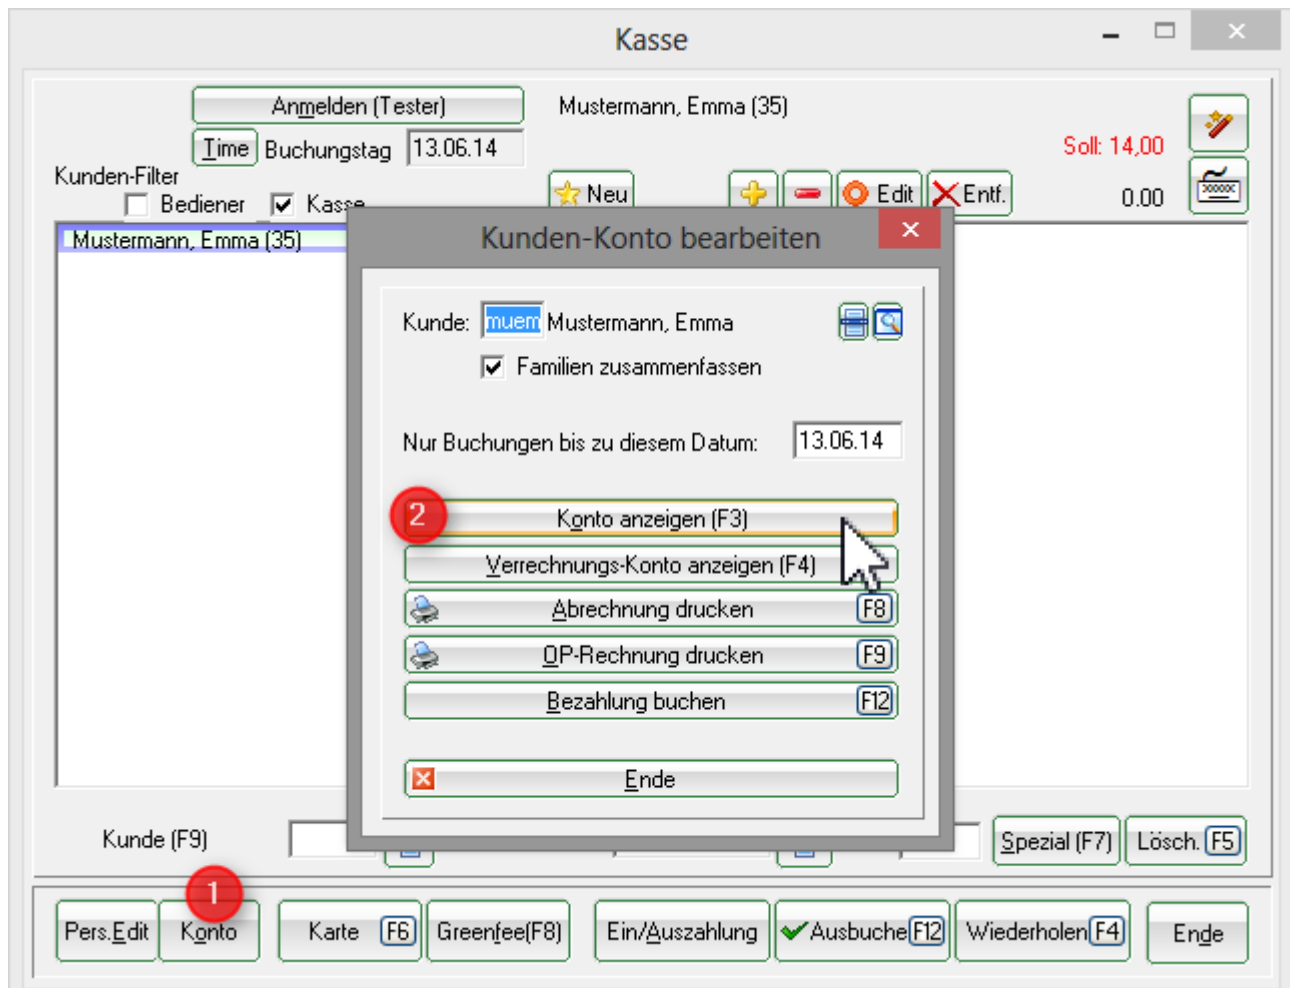

As you can only cancel cash register postings with corresponding offsetting entries in the cash register, this also applies to postings in the OP area.

The cash posting was made a few days ago (daily closing has already been printed), the amount is open in the OI area and should now be cancelled:

Here is our example - Emma Mustermann has € 14,- open, which is displayed in the top right of the cash register window.

The screenshot shows the 'Kasse' (Cash Register) window. At the top, there's a header bar with 'Kasse' and window controls. Below it, the interface is divided into several sections. On the left, there are buttons for 'GASTRO' and 'UMSATZ'. In the center, there's a section for 'Anmelden (Carmela)' with fields for 'Time' and 'Buchungstag' (12.02.20). To the right, there's a section for 'Sonnenschein, Susan. (--)' with a 'Gast' button and a 'Soll: 100.00' label. Below this, there's a 'cmd;warn:memo;Gral' label and a '0.00' value. The main area of the window is a large empty box. At the bottom, there's a row of buttons: 'Kunde (F9)', 'Artikel (F1)', 'Zahl', '1', 'Spezial F7', and 'Lösch. F5'. Below this, there's another row of buttons: 'Pers.Edit', 'Konto', 'Karte F6', 'Greenfee F8', 'Ein/Auszahlung', 'Ausbuchen F12', 'Wiederholen F4', and 'Ende'.

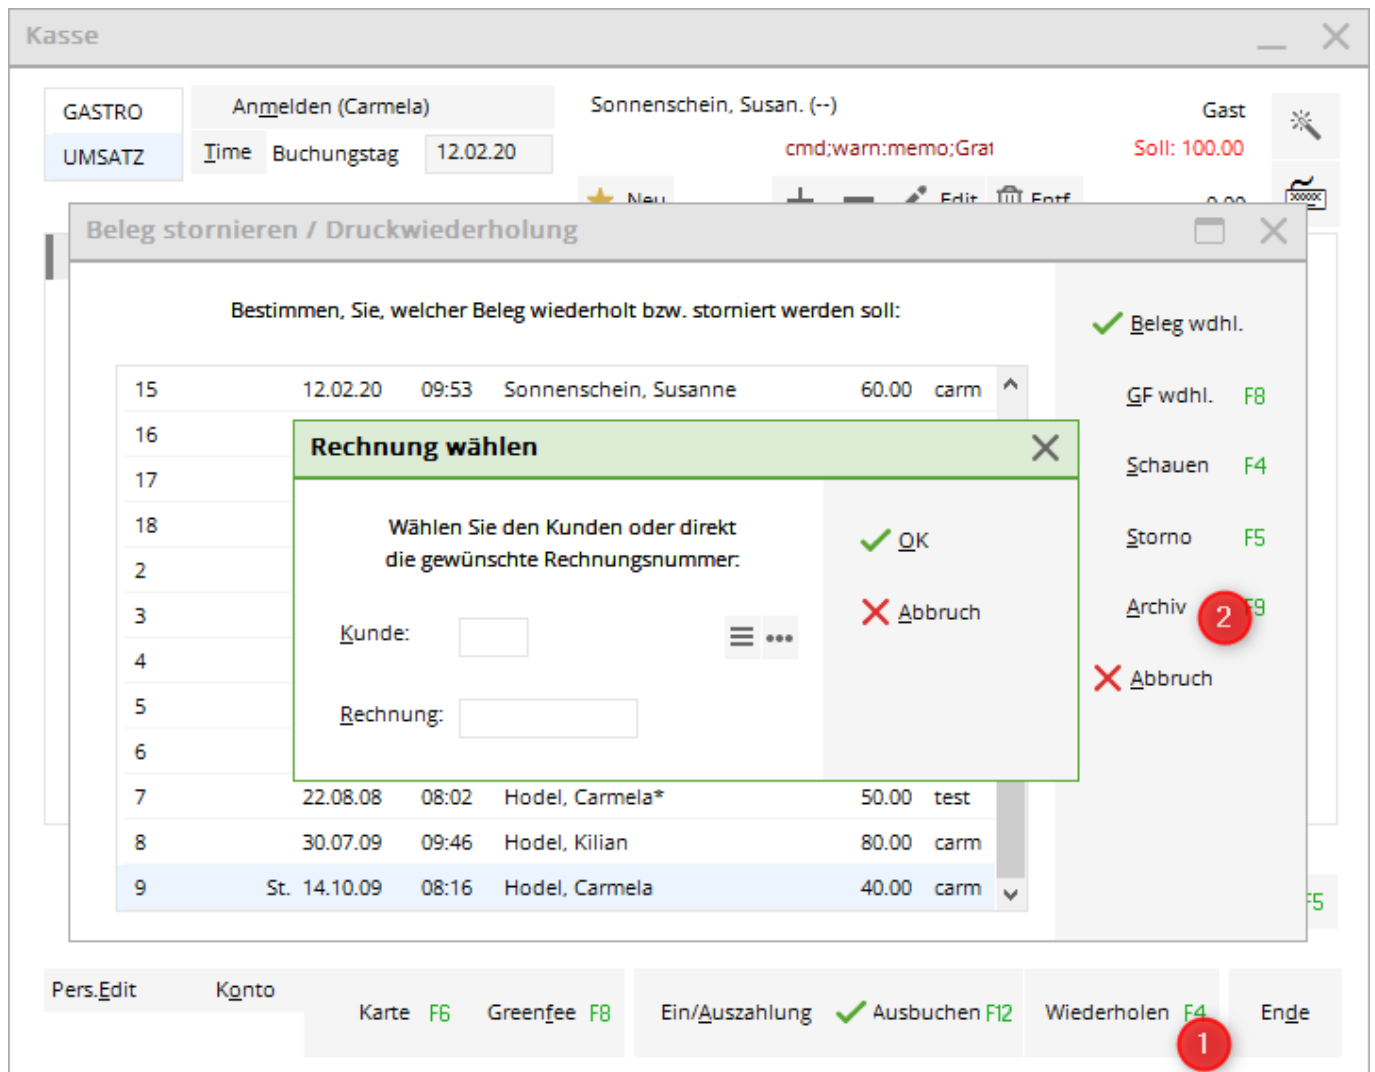

You now need the invoice number of this booking. To do this, select the customer on the left-hand side of the checkout window and click on **Account** and **Show account**.

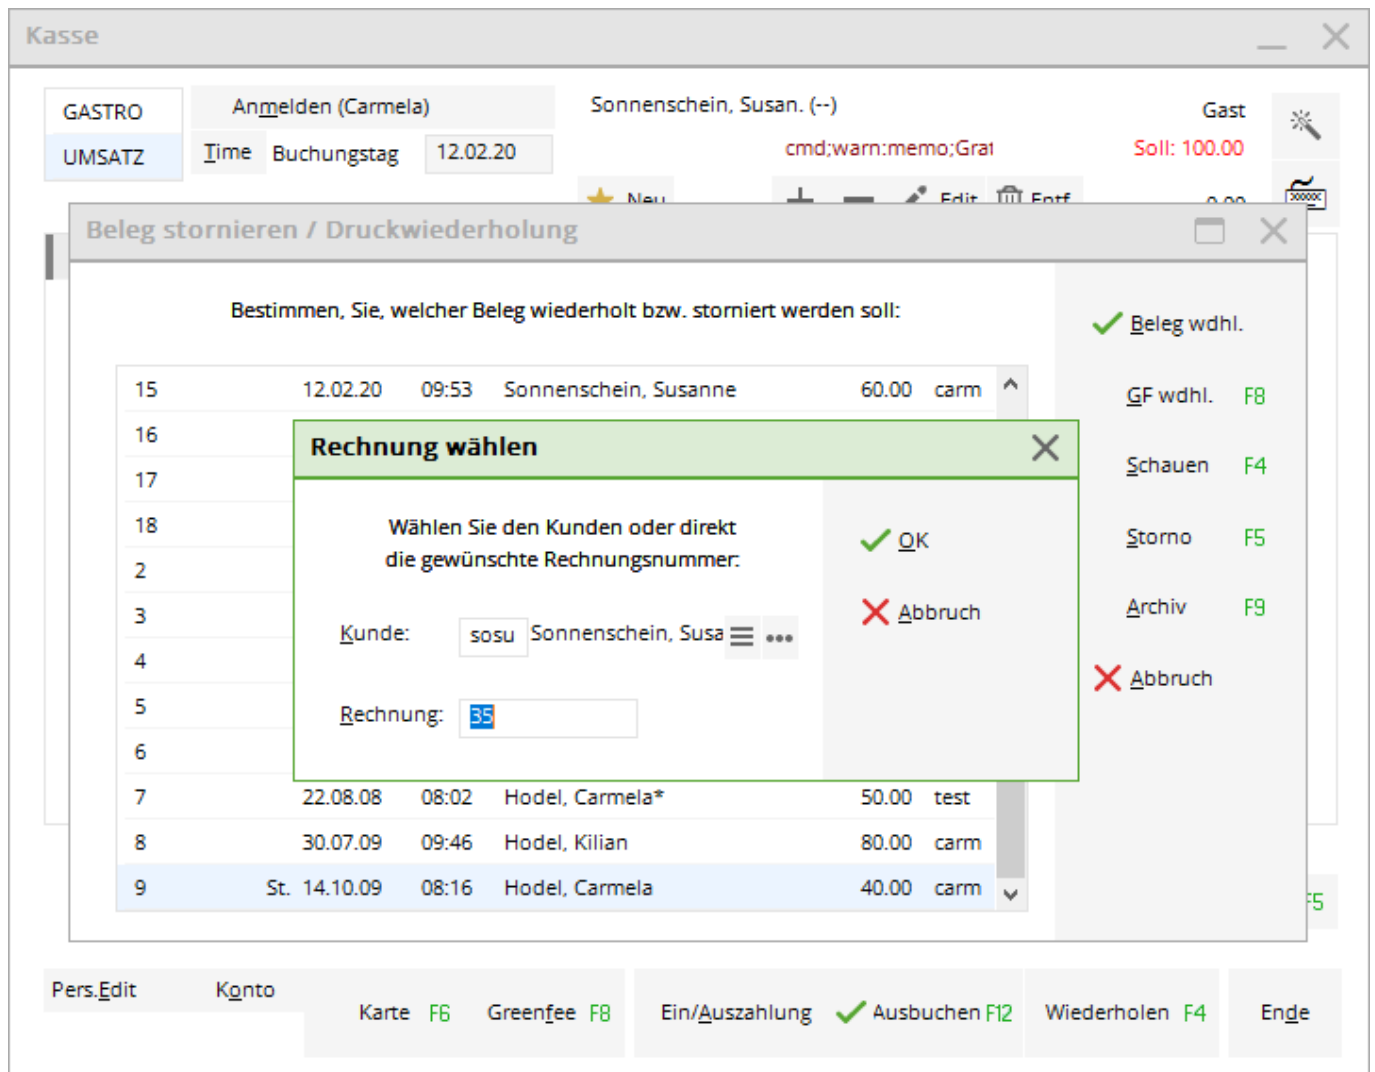

The invoice number for Emma Mustermann in our example is 35:

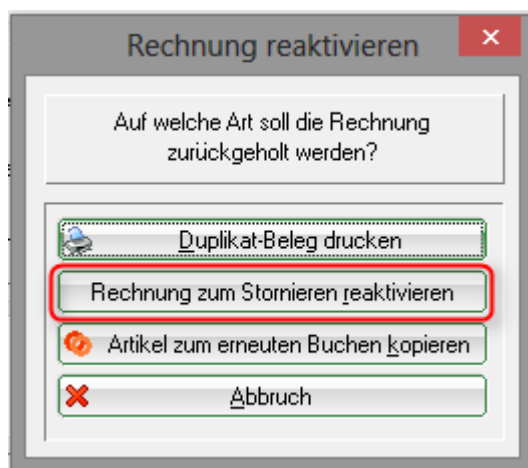

Back in the checkout window, press the button **Repeat** and **Archive**

In the window **Select invoice** window, enter the customer and the invoice number again.

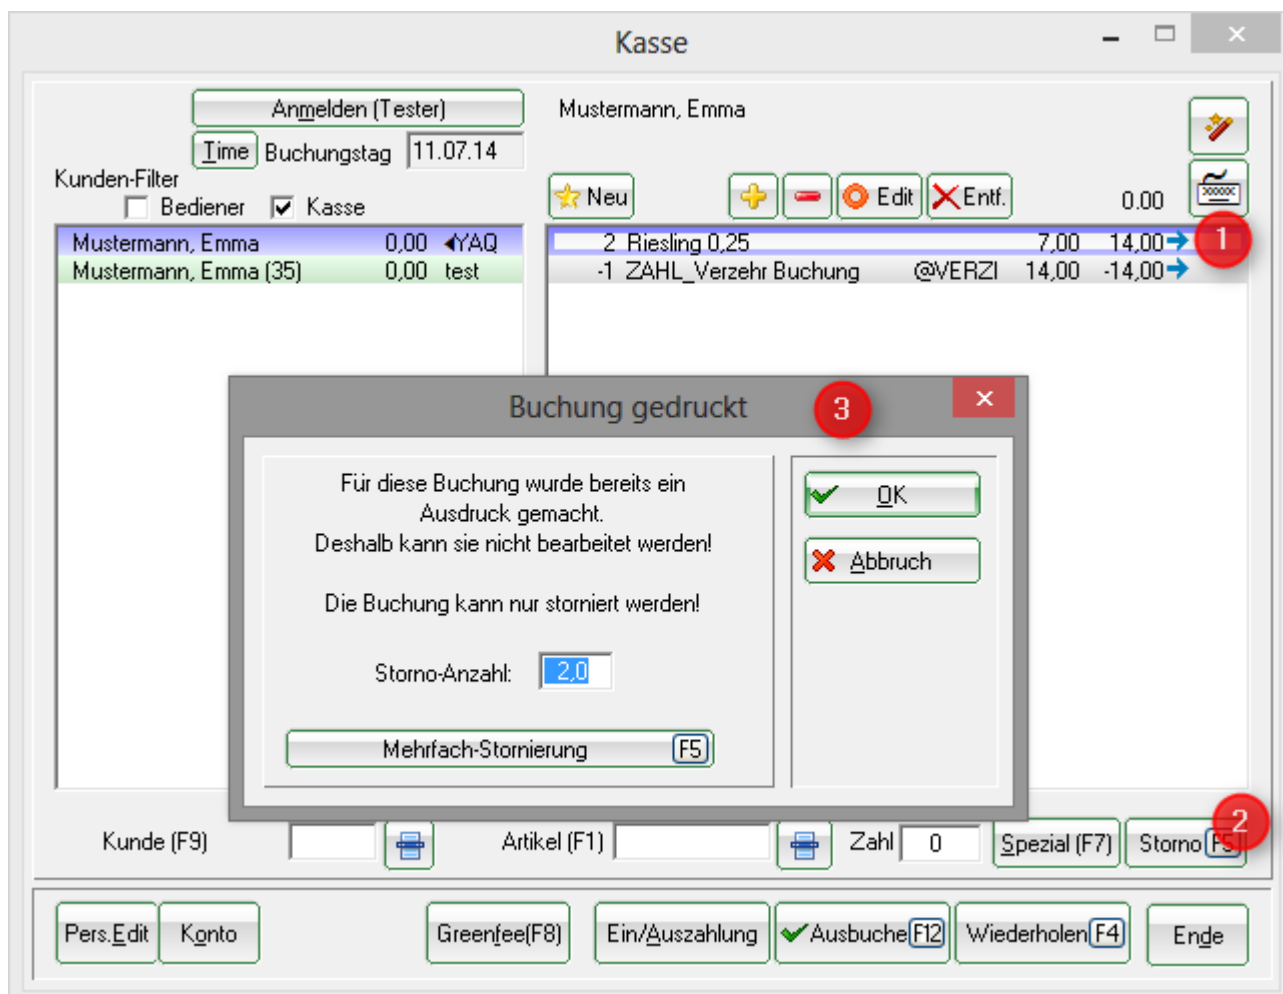

and press **OK**.

Then click on **Reactivate invoice for cancellation** and the booking can be found in the cash register again.

Please make a normal cancellation: Select the article (in our example the Riesling), then click on the button **cancellation** button and cancel the booking.

The last step is to derecognise the posting using **Post to account**

## One OP area for several cash account areas

It is always possible to manage open items from several cash account areas in a single OP area. We imagine, for example, restaurant bookings and proshop bookings whose open items are to be managed together in the OP area. In this case, please contact PC CADDIE Support.

## Two OP areas for one cash account area

This variant is also possible and feasible with PC CADDIE. An example in which you could use this option would be a catering cash register area that flows into two OP areas (e.g. GMBH and VERZEHR). In the GMBH area, for example, the invoices of the hotel guests are administered and in the VERZEHR area the open items of the catering guests.

You can find the settings under **Settings - Programme settings - Checkout payment methods**.

F4

The order of the two areas should be chosen sensibly; the area that you need most frequently is at the top of the configuration.

Please note that the two areas you define here must be contribution account areas.

This setting has the following effect on the cash posting in the catering area: You post an open consumption to the guest's account as normal and can then select the appropriate OP area with the **OK** button:

## OP account area

The OP or open items area is particularly popular for the catering industry with consumption flat rates. However, it is also used to pay annual invoices via the cash register.

## Installation

In order for the exchange of the areas to function properly and comprehensibly, it requires:

- Transfer payment types in all corresponding areas

In the cash accounts area (SALES, GASTRO, PROSHOP)

ZAHL	Hotel-Transfer-Zahlung	N	0,00	hotel
ZAHL	Kreditkarte <DA>	N	0,00	kk
ZAHL	Rechnung	N	0,00	re000001
ZAHL	Scheck	N	0,00	s
ZAHL	Transfer in CLUB <NO>	N	0,00	CLUB
ZAHL	Transfer in OP <NO>	N	0,00	OP
ZKSA	Ballautomat 1	N	0,00	ba1
ZKSA	Ballautomat 1 Rangefee	N	0,00	ba1r
ZKSA	Ballautomat 2	N	0,00	ba2
ZKSA	Ballautomat 2 Rangefee	N	0,00	ba2r

1. Payment type identifier
2. Name referring to the area. <NO> Transfers the document number to the open items area
3. Search abbreviation must always contain the name of the recipient area

In each recipient area (OP, VERZ, CLUB, AG, GMBH, etc)

OP	Beleg <NO>	..	N	0,00	0,00	UMSA
OP	Proshop-Beleg <NO>	..	N	0,00	0,00	PROS
OP	Restaurant-Beleg <NO>	..	N	0,00	0,00	GAST
OP	Zahlung im Bereich Gastro	..	T	0,00	0,00	gast
OP	Zahlung im Bereich Greenfee	..	T	0,00	0,00	gree
OP	Zahlung im Bereich Proshop	..	T	0,00	0,00	pros
ZAHL	Banküberweisung	..	T	0,00	0,00	b
ZAHL	Barzahlung	..	T	0,00	0,00	bar
ZAHL	Euro-Card	..	T	0,00	0,00	ec
ZAHL	Scheck	..	T	0,00	0,00	s

1. Name referring to the area of origin. <NO> for the document number
2. Search abbreviation must also contain the name of the recipient area (postings from several cash account areas can be transferred to the contribution account area).
3. Search abbreviation in lower case is for the payments/credit notes in the cash account area. Capital letters for the generated turnover. This is not mandatory but is advantageous for clarity in the account.

- Install transfer area - in the cash account area

# Handling in the cash register - payment into the account via cash register

The screenshot shows the 'Kasse' (Cash Register) software interface. The top bar includes a login field 'Anmelden (Tester, Timo)', a customer selection field 'Member, Paul (23,5)', and a balance field 'Guthaben: 250,00'. The main area displays a list of customers, with 'Member, Paul (23,5)' selected. A modal window 'Verrechnungskonto wählen' (Select clearing account) is open, showing a list of accounts with 'OP' selected. The bottom bar contains various transaction buttons, including 'Karte', 'Greenfee', 'Ein/Auszahlung', 'Ausbuchen', 'Wiederholen', and 'Ende'. Red circles with numbers 1-4 highlight the steps: 1. Select customer, 2. Balance of the account, 3. Select account, and 4. Select clearing accounts.

1. Select customer
2. Balance of the account
3. Select account
4. Select clearing accounts
