Edit statistics areas

This function is used with the module *merchandise management* module.

You can access this menu item via ***Edit article/statistics areas.*** Here you can specify whether there should be a statistics query when paying in the checkout. If you want this (ticked), define the corresponding statistics areas here. The names are freely selectable. The image shows a few examples.

If you have activated the query, you can view these statistics areas under ***Turnover/Print/turnover statistics*** in your evaluation. To do this, go to the tab ***Filtering*** tab and select the statistics area(s).
