

Edit statistics areas

This function is used with the module *merchandise management* module.

You can access this menu item via **Edit article/statistics areas**. Here you can specify whether there should be a statistics query when paying in the checkout. If you want this (ticked), define the corresponding statistics areas here. The names are freely selectable. The image shows a few examples.

The screenshot shows a dialog box titled "Statistik-Bereiche festlegen". At the top left, there is a checked checkbox labeled "Abfrage der Bereiche aktivieren". Below this, there is a table with two columns: "Kennung" and "Bezeichnung". The table contains the following entries:

Kennung	Bezeichnung
nogo	Nicht Golfer
go	Golfer
VA	Veranstaltung
TA	Tagung
int	Interner Verkauf

On the right side of the dialog, there are two buttons: "OK" (with a green checkmark icon) and "Abbruch" (with a red X icon).

If you have activated the query, you can view these statistics areas under **Turnover/Print/turnover statistics** in your evaluation. To do this, go to the tab **Filtering** tab and select the statistics area(s).
