Multiclub

Multiclub installation variants:

Here you will find a brief description of the options that PC CADDIE offers you with regard to a multiclub installation. If you are interested in a variant, please contact our support team for a concrete offer:

Type	**Type Description**	Version
A1	Personal synchronisation	1 golf course, 2 club numbers, separate installation with nightly synchronisation of personal data,
A2	Simple multi-club installation	1 golf course, 2 clubs in one database, only the intranet handling is separate, the „small“ version only has intranet functionality, shared member database.
A3	More complex multi-club installation	2+golf courses, 2 clubs in one database, both full functionality, separate timetable areas, lockers etc., separate online portal, only the member database is shared
B1	Simple operator version	2+golf courses, 2 clubs in one database, separate account areas, tournaments and lockers common timetable areas, common online portal
B2	More complex operator version	2+golf courses, 2 clubs in one database, common timetable areas, common cash account (separation via cash numbers), separate account areas, separate lockers, separate tournaments, separate online portal
B3	Complete operator version	2+golf courses, 2 clubs in one database, common timetable areas, common cashier account (separation via cashier numbers), common account areas, separate tournaments and lockers
C1	Maximum version	2+ clubs in one database, everything together incl. common online portal, comprehensive administration

All multi-club versions have one PC CADDIE icon per club. They all access the same database, so there is no data redundancy for personal data. Depending on the complexity, there are several separate databases (tournament, lockers, events, etc.). It is therefore absolutely essential to clarify in advance exactly how your multi-club version should ultimately be organised. We will be happy to clarify this during a consultation. You can also complete the attached planning questionnaire, which specifies the scope of the installation and the work to be carried out, and send it to us.
