

PC CADDIE://online Squad report

Product description

In close co-operation with the Baden-Württemberg Golf Association, a convenient online solution for league play has been developed, which facilitates the handling of events for both the association and the clubs involved in play.

About the online squad registration [PC CADDIE://online Squad registration in the BWGV](#), the clubs register their participation in the individual leagues before the start of the season, register their eligible players in the respective squads and also make the matchday registrations (including monitoring the tender regulations) directly online.

The system automatically generates the corresponding registration forms as PDF files and forwards them directly to the organising club after comparing the player specifications with the DGV intranet.

Examples on the web

Even the total results of the match day are entered directly on site by the clubs, so that the current results are available on the Internet just a few minutes after the end of the match day [BWGV League results](#).

The display of the intermediate results of the respective leagues can be easily integrated into the websites of the respective clubs so that the current results of their own teams can also be viewed there.
