Scorecards

About ***People/Print.../Scorecards*** you can easily print blank scorecards or fill in the scorecard for a player independently of a tournament:

You have under ***Type*** you can choose between „Scorecard with frame“, „Special landscape“ and „Landscape with frame“ or a scorecard customised for your club. Click on the selection button and select the desired format from the list.

If required ***title*** and any ***information*** can be entered.

Select the course on which you are playing and define the tees using the **Define tee boundaries** button.

If required, enter ***players*** and ***counter*** if required. You can also set the tee individually for both. With the „Select tee automatically“ setting, it uses the tees defined for the course above. Without players and counters, blank scorecards are simply printed.

The ***number*** of cards can be freely selected. For example, if you want to print 100 scorecards for

green fee players, this is no problem.

The button ***Eject*** button is only necessary if you usually print several scorecards on one sheet and this is also the setting (for example, two A5 scorecards fit on one A4 sheet printed horizontally). If in such a case only one card has been sent for printing, it will not yet be printed as PC CADDIE is waiting for the second card. Click on ***Eject*** to print this one card if no second card is to follow.

For more information on setting the scorecards, please refer to the description of the function **//Competitions/Print.../ Scorecards //** - (Scorekarten).

Customised scorecard templates

PC CADDIE will be happy to create a customised template for you. Please send an e-mail to support@pccaddie.com to enquire about the current prices and offers for template creation.
