File Explorer

Keyword: File-Explorer, Explorer, Save, Load, Files, File, Files

PROJECT SUPPORT	
Main contact person	Ashley Nwaukpele

The **file explorer** is a file management system that is used to save, load and search for files. It is called up at various points in PCCADDIE to store or import files.

Overview

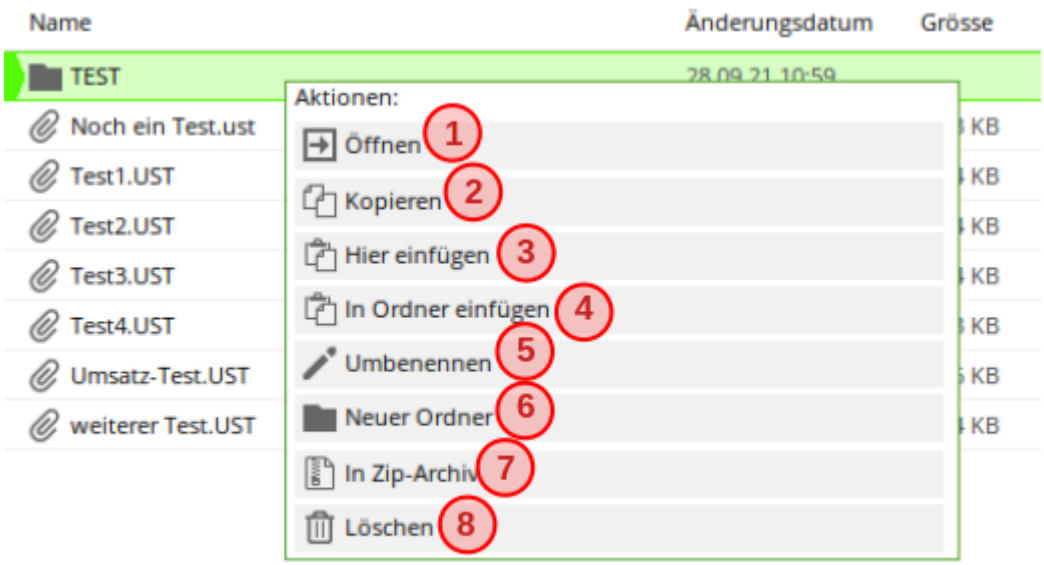

No	Designation	Description
1	One level up	Goes to the higher-level directory
2	Path	Shows the current path. You can also enter a path and confirm with ENTER to navigate to it
3	Refresh	Refreshes the list of files
4	Back	Goes back one directory in the navigation
5	Forward	Moves one directory forwards in the navigation
6	New folder	Creates a new folder in the current directory
7	Favourites	Displays the favourites. Favourites can be created, edited and removed using the buttons
8	Files	List of folders and files in the current directory
9	File name	Name of the file to be loaded/saved

No	Designation	Description
10	Format selection	Filters list according to a specified format
11	Load/Save	Loads/saves selected file
12	Cancel	Closes the File Explorer

Context menu
