Changelog archive 2023+2024

Changelog 2024

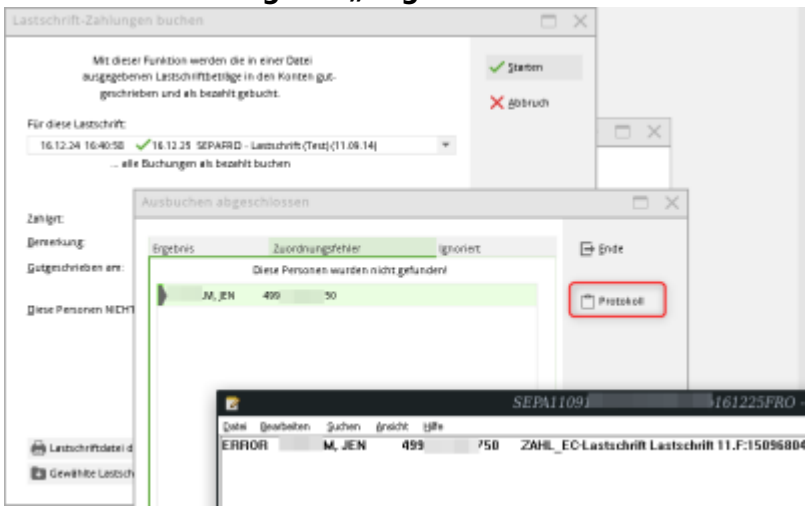

December 2024

Correction when printing the article list
There was an error in the article list that certain selected options of the characteristics were not displayed when printing.

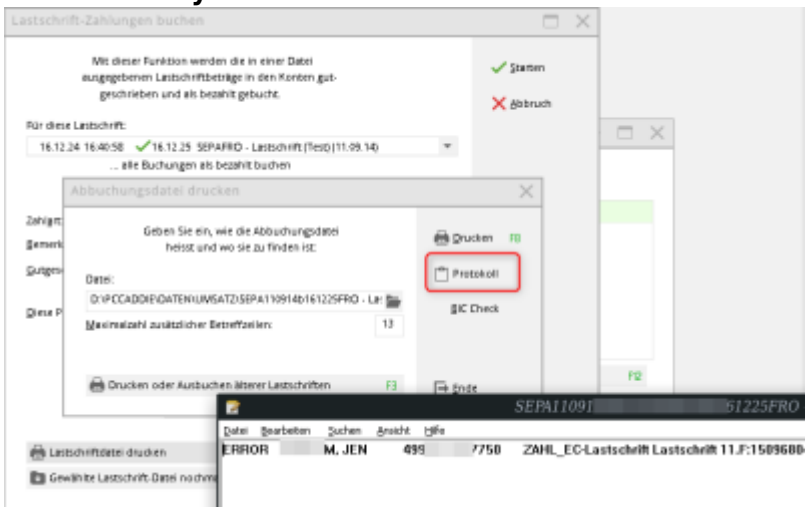

Filter article automatic by number of persons

Direct debit log - When writing off a direct debit file, it can happen that not all postings can be processed. PC CADDIE then creates a log file. This can be called up directly after the write-off using the „Log“ button.

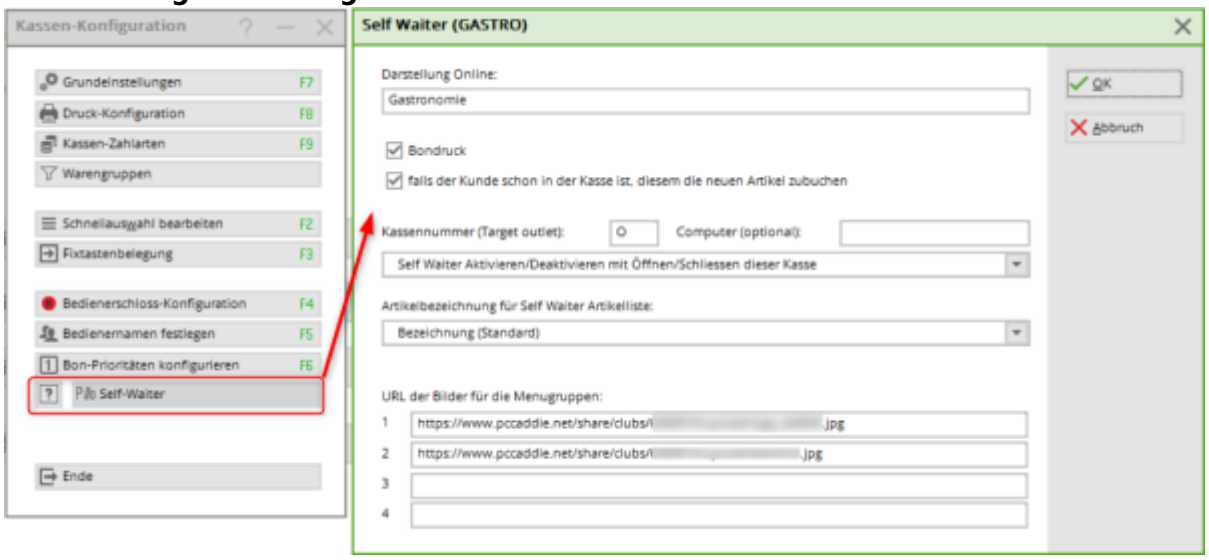

Such a „Log“ button is also new in the dialogue for printing the direct debit file, provided it has already been booked out at least once.

Adaptation for the DGV intranet: Even with „von“ and other name affixes in the first name field in getMemberData, only search for the pure first name and do not throw out a „von“ in the first name in the individual query

November 2024

The checkbox and the button for self-waiter and green fee shop are now also integrated in the cash register configuration

Correction regarding discount button and automatic discount

Adjustment that the weighting for the duplicate check can be adjusted manually using special parameters

This was a suggestion from the voting tool, which we implemented without voting.
Please contact Support if you would like us to enter this special parameter for you.

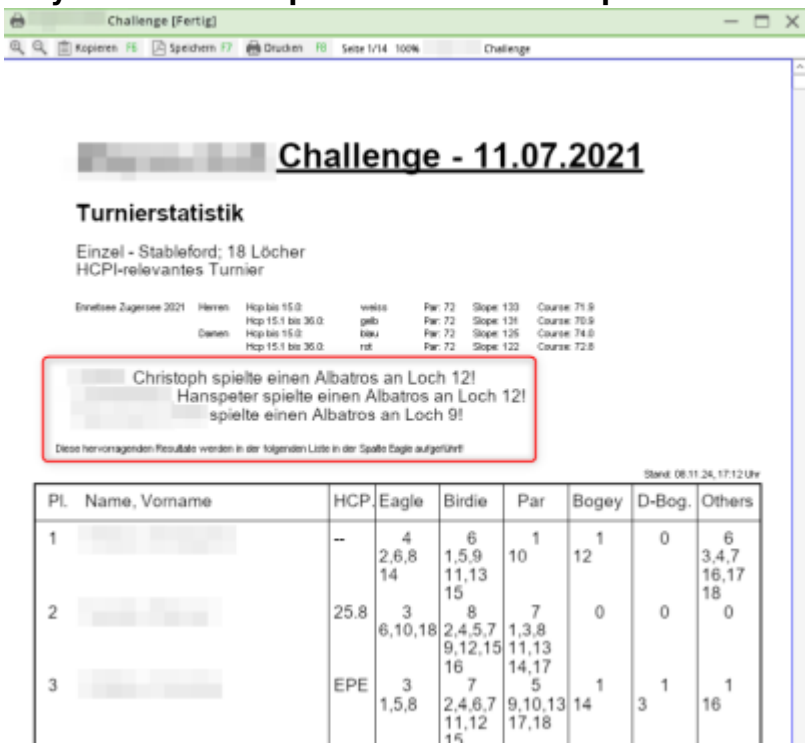

Correction: update the TT icon with/without follow-up booking

Link field when editing favourites in the navigation extended from 100 to 300 characters

Create account entries for voucher purchases

It is now possible to have a PC CADDIE service create invoices for the creation of vouchers.
Without the service, only vouchers that are sold locally appear in the account.
But if, for example, a start time is booked online and also paid for online, then a voucher is created, but no invoice for it in the local PC CADDIE. Only when this voucher is redeemed can it be seen in the account.

Player statistics expanded to include explicit mention of results better than Eagle

Challenge - 11.07.2021

Turnierstatistik

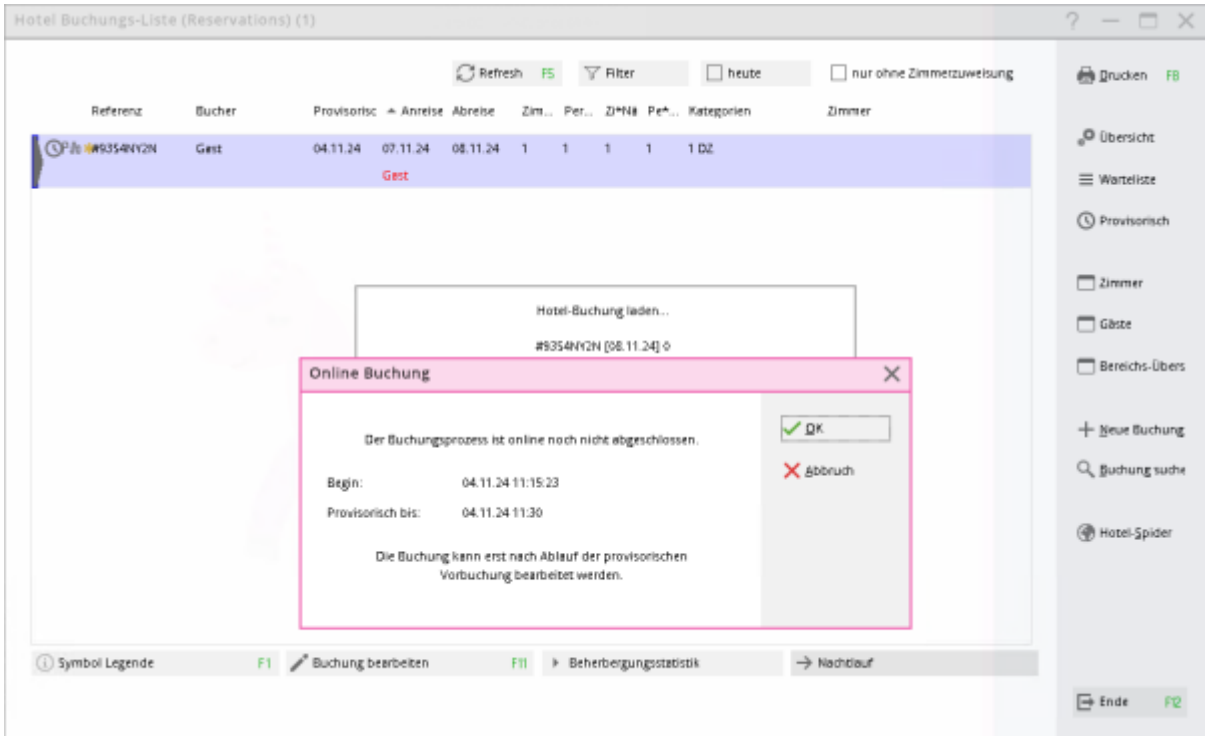

Einzel - Stableford; 18 Löcher
HCPI-relevantes Turnier

Christoph spielte einen Albatros an Loch 12!
Hanspeter spielte einen Albatros an Loch 12!
spielte einen Albatros an Loch 9!

Pl.	Name, Vorname	HCP	Eagle	Birdie	Par	Bogey	D-Bog.	Others
1		--	4 2,6,8 14	6 1,5,9 11,13 15	1 10	1 12	0	6 3,4,7 16,17 18

October 2024

Message if hotel booking is still being created online

Correction member update GOLF.AT

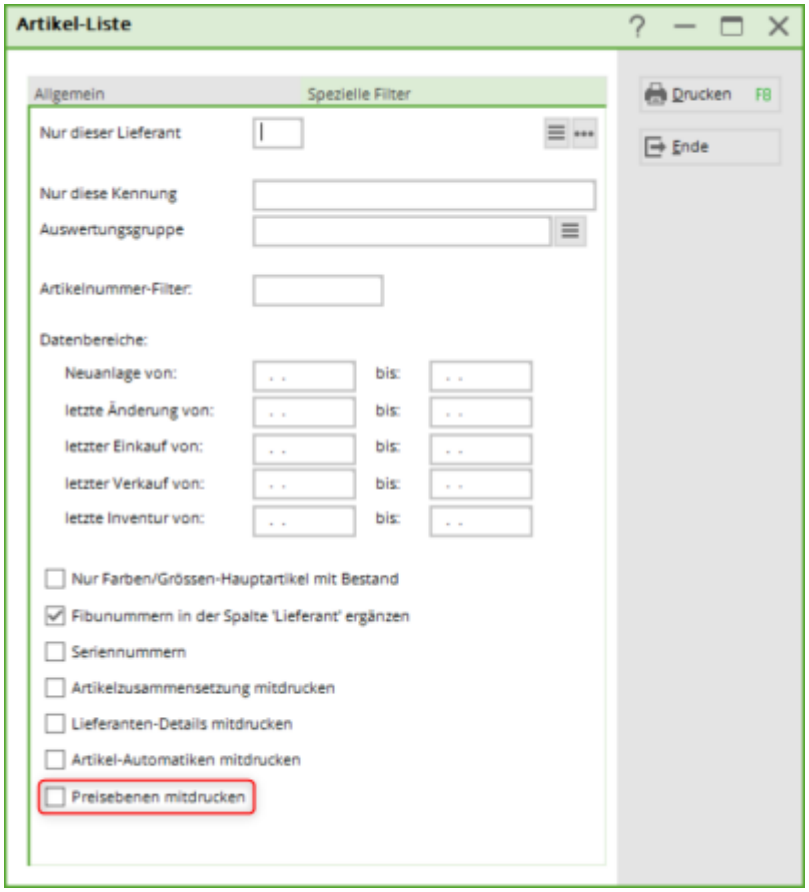

Timetable multi-day view with black text colour when check mark is removed

Adaptation of the info text regarding lancing
previously: „according to the SWSH of the DGV“
new: „according to weighted subtotals“

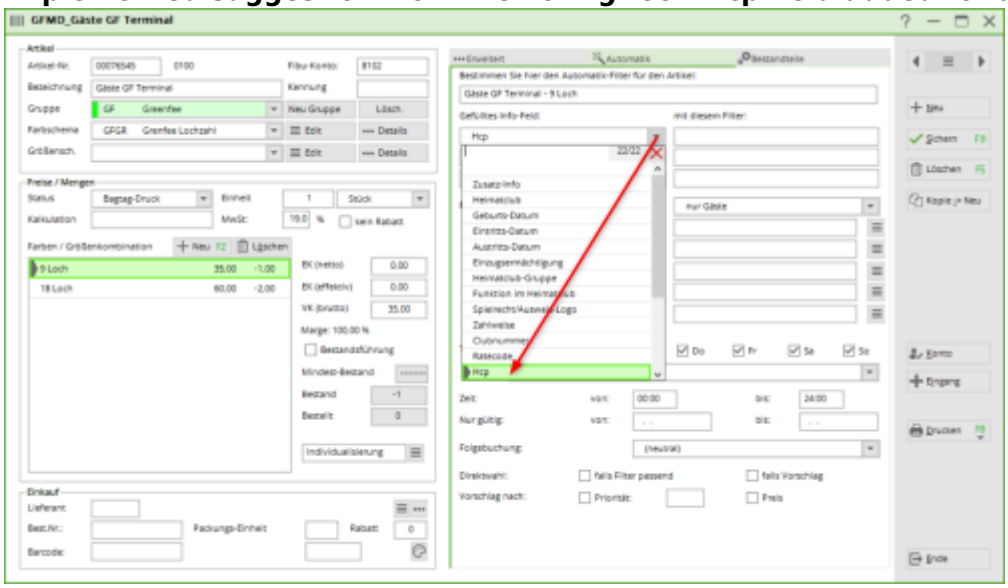

Adjustment that birdies can also be analysed in the course statistics
A special parameter is required for this. Please contact support if you would like this evaluation.

Implemented suggestion from the voting tool: When printing the article list, you can now optionally print the price levels as well

Correction: The message records for triggering the receipt print at the self-waiter were not deleted until now and triggered the message Unprocessed Records

Implemented suggestion from the voting tool: Hcp field added for article automation

Hide in OP invoices - Menu component articles are no longer listed individually in OP invoices

Adjustment that the prices are only displayed if a round has been scored at all up to the current round

Correction so that the counting method defined for a prize is also taken into account when determining the CR equalisation ranking, if applicable

September 2024

Special parameters added to make it possible to block new entries or editing of articles in the cash register and contribution account area
Please contact support if you need this function.

Course and event module: Prioritise public name for list titles

Correction: Printing the bank details on invoices sometimes no longer worked with versions since the end of August

Adjustment; do not print tee information for counters if no counter is active at all and added for SR, CR and colour of the counter tee that these do not appear if there is no counter

Double price exclusion improved so that it also excludes across rounds

Austria: Also transfer the value 999 to GOLF.AT for disqualification without result with new code „q“

Counting game results online also correct in second round for counting game prizes

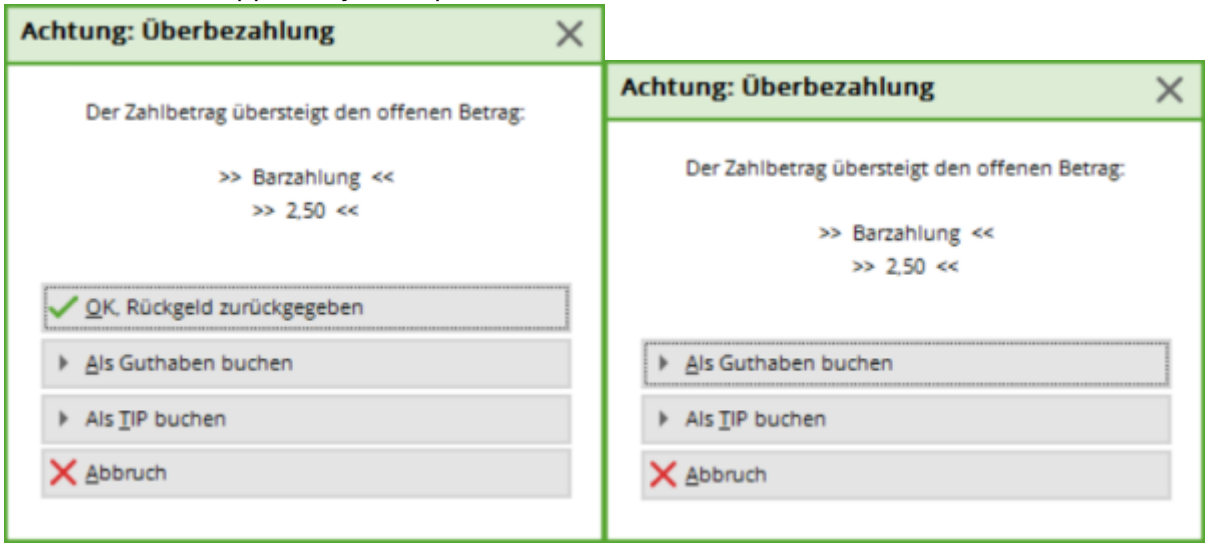

Book menu - you can use the existing starter, main course & dessert items without major changes

Ignore empty records regarding CashComponents

August 2024

Selfwaiter app: Customisation for free names without logging in to the cash register

Change for cashless tills can be deactivated with special parameters
Please contact support if you require this function.

Timetable rules: new possibility to easily filter the people who are potentially checkable

via intranet

Self-service terminal: green fee sales for guests

Adjustment that the dot is accepted as a comma to separate first name and surname when searching for persons

Filtering on the event categories in the mail scheduler (automatic emails) now works properly

Warning when an online TT pre-booking is manually set to definite

Correction to the QR code of the CH payment slip

Adjustment regarding NoShow status processing
From now on also automatic e-mail when the Marshall sets the player to NoShow.

July 2024

Correction regarding scorecard printing for fourball

Check the value for BRUTTO1 or NETTO1 in the hole results to ensure that only numbers are permitted there

Prohibit Mifare IDs for PIN card accounts

Adjustment regarding apostrophe in the name on the DGV intranet

Scorecard printing time filter active by default

Thunderbird 115.12.2 compatibility

Correction start list printing for cannon start; omit info block for start from tee 8

IOTEE: Send notification mails only for relevant changes

Licence check for card system adjusted

June 2024

Invoice NETTO check for cancellation

Adjustment so that the open customers are correctly updated in the cash register for the self-waiter and in the ERP

Adjustments regarding Hcp transfer in Austria

Correction regarding tournament import and export

Adjustment so that menu items are not listed on invoices (catering)

Adjustment regarding registration rules (courses, events, tournaments)

Adaptation regarding „von und zu“ as a whole as a name affix

Improvement to the player ID

New menu item for the online article settings
The articles for self-waiters, upselling and online guest green fee sales are still defined in the quick selection of the checkout.
There is now a dialogue that lists the outlets placed online and allows you to edit the name as it is shown to Online and therefore to the golfer at the end. Outlets can also be switched on and off.
The new dialogue can be accessed via *System/Contribution+Article/Article-Online* accessible.
Directly below the dialogue for online self-accounting.
A second way is via *System/additional settings/PC CADDIE Online* and the buttons on the right-hand side.

Correction of the search window position for multiple monitors

Adjustment regarding sales block for negative stock with set special parameter

Adjustment so that Guestline also updates the activity of the service correctly

Expansion of PowerBI interface

Customisation of the cash book

PPG check now also possible with missing number via first name, surname and birthday

onlinePayment 2.0: Adjustment that a virtual card for the app is generated or activated for the day during green fee check-in if necessary

May 2024

Under *Timetable/Print…Multiday view* remove the „Number“ tick

Toolbar button „Repeat print“ corrected

Adjustment for tip bookings

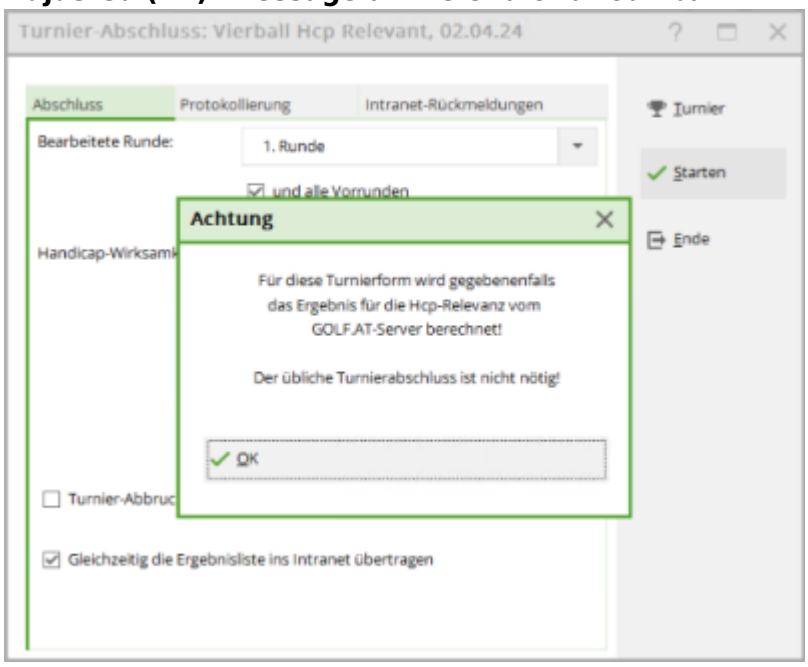

Adjustment (AT): the 9-hole course Hcp is calculated with regard to rounding, as is customary in the WHS as a whole
I.e. according to the calculation with half CR and par, thus without rounding effect when calculating an 18-hole course Hcp and subsequent division by 2, but rounding directly of half the value.
Courses for which a 9-hole CR was already specified (i.e. around 36.0) were always calculated according to the WHS.

Adjustment of sorting according to HCPI in the buffer for foursomes

Generate No Show Mail even when set to NoShow by Marshall App

Correction that the confirmation button for a player appears again after the player check in the tournament

Adjusted (AT): Message at the end of a four-ball

With Pro, 0.0 is automatically transferred as the initial value

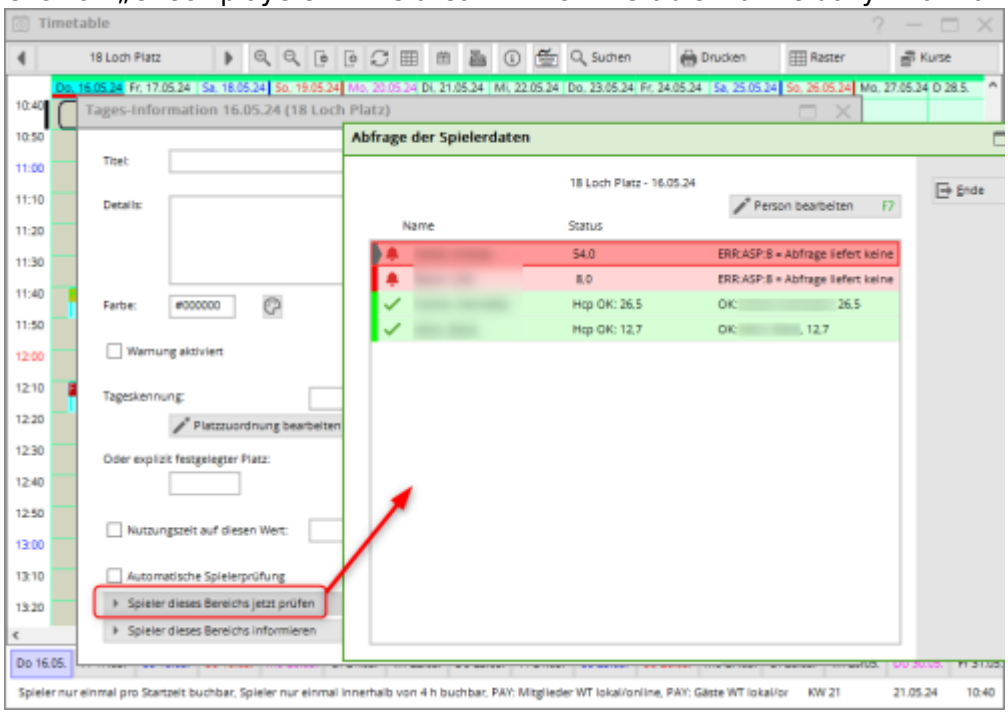

Adjustment regarding location data

Full text in the ticket opening email

This is a suggestion from the voting tool, which we have implemented without voting.
If you send us a support enquiry using the „i“ in the top right-hand corner, your text and contact details will be included in the ticket opening email.

Info if player synchronisation in the timetable did not work

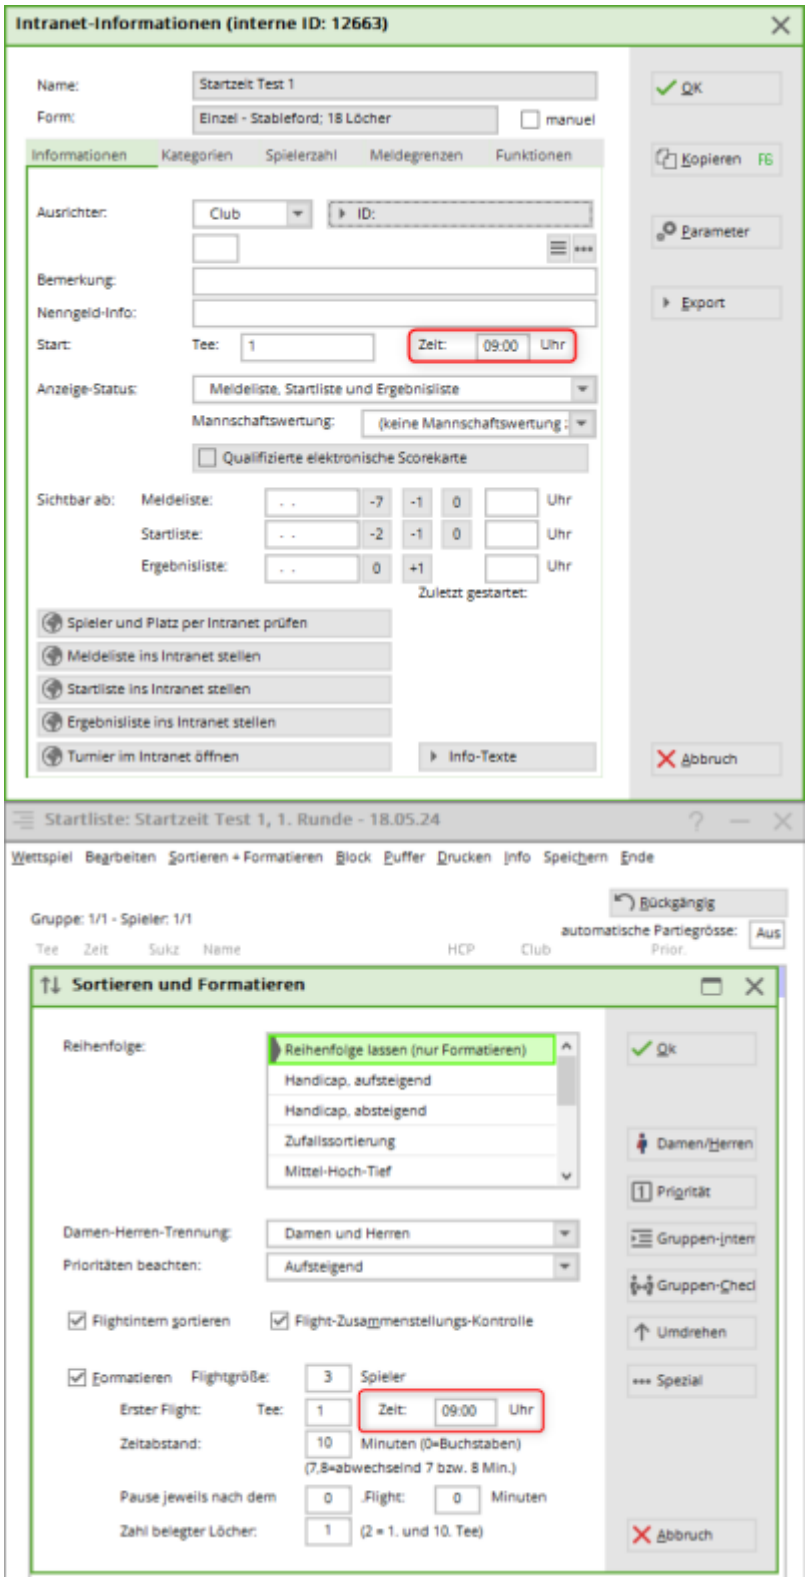

Click on „Check players in this area“ in the timetable via the daily information.

Adaptation of night-time HCPI check

Check article bookings in the cash register against the „walk-in“ customer

Take default start time from the intranet information of the tournament, if filled there.

If no start time has been entered in the intranet information, 10:00 is used.

April 2024

Correction in DBox for neutral numerical values
A correction has been made to an error message that could occur after a resource was selected for a course/event via the timetable.

Correction: Check of cart availability and cancellation period is again checked and calculated relative to the main booking

Adjustment of invoice commands: Despite the „SECOND“ command, an entry that has already been posted may no longer be listed in original invoices

Correction of the browser integration for reporting

Registration options in the event extended to 8

Problem with creating the XML files for the Order of Merit (Swiss Golf) has been solved

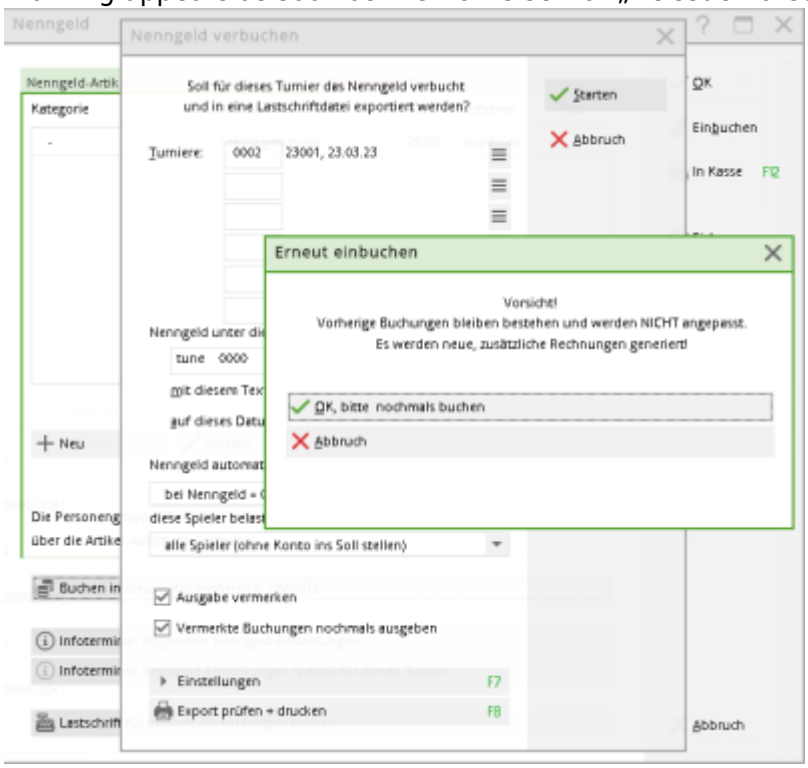

Corrected: Entry limits
In Swiss versions, affected the individual HCP limits (members/guests or ladies/men) and only when entering PlusHCP.

Check hotel interface: Problem was related to new transfer of 0-bookings - this caused problems with completely empty postings

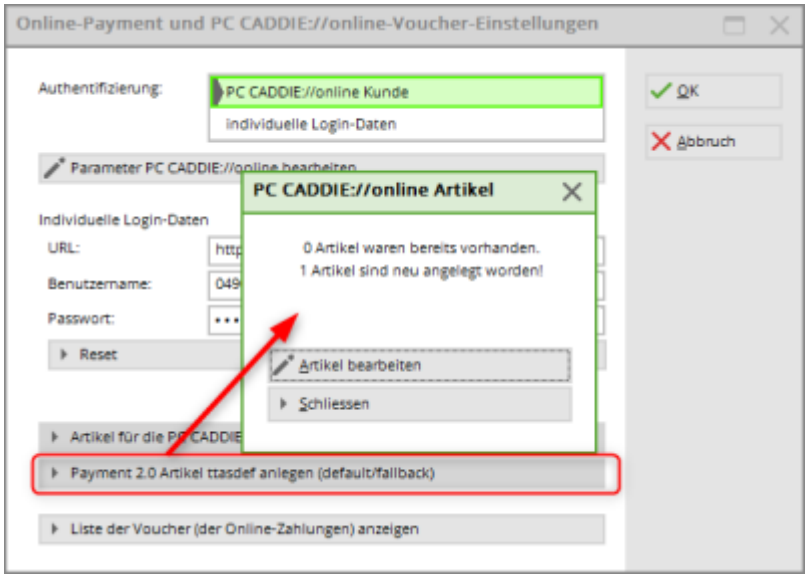

„Zur“ added to the list of name additions

Automatic mails/triggers: now also works when deleting tournament participants

Warning for new direct debit booking
Warning appears as soon as the tick is set for „Reissue noted bookings“.

online-Payment 2.0: create default article ttas_def
Now go via a button in the configuration dialogue under *System/More settings/PC CADDIE:online*and there the button *Voucher* button there.

At the end, the article can also be opened for editing, as an amount usually has to be entered before everything else. It makes sense for the price to be well above the highest possible green fee, as this item is offered if no timetable rule fits.

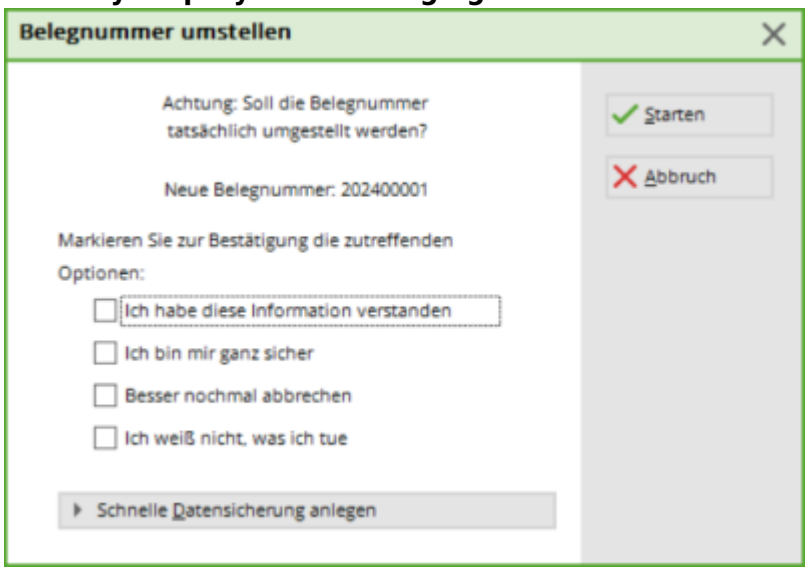

Corrected: in the participant lists with registration option, the cancelled participants are no longer counted in the total

New special parameters for restricting the tournament/event view
(e.g. the captains may only see/edit the tournaments of their game group)

set the publication status of new events to „N“ and NOT blank by default so that they can be transferred

March 2024

Security enquiry when changing the invoice number

PHG reader: MIFARE read/write speed improved

Improvement: up to eight tournament/course registration options are now supported

SelfAccounting: This is now handled in the same way as invoice printing with OP details:
- several identical articles are summarised (3xCoke, instead of Coke, Coke, Coke)
- Omit articles that cancel each other out in total
- Omit things like food sequence entries

Correction in the graphic editor toolbar

Correction of the <GRUPPE> person field

Correction when checking timetable rules that have the option „Only check players and REFERENCE APPLIED“ set

Additional person fields: No more chaos with unused additional fields
If an info field is set to Unused, there is now a placeholder instead of moving everything.

Online payment: players with R (hologram) on their ID or without
artikel_mit_artikelautomatik

Correction of the article check in club account areas

Option selection with active tick „Force selection“ now also forces option selection for local tournament registration
- if you enter the player in the player editor, nothing happens at first; if you then save/close the player editor, the option(s) are queried for all newly entered players one after the other
- If you enter the player in the buffer, a „Cannot save“ message window appears - „At least one of the required options has not been selected!“; select/set the required options here via the „Options“ tab

Hotel: Warning for multiple bookings
A warning is now displayed and you are prompted to confirm if you try to book a hotel booking that has already been booked. hotel booking via the „Book“ button in the hotel booking mask.
For better orientation, the time of the last booking, the user at the time and the invoice number are displayed.

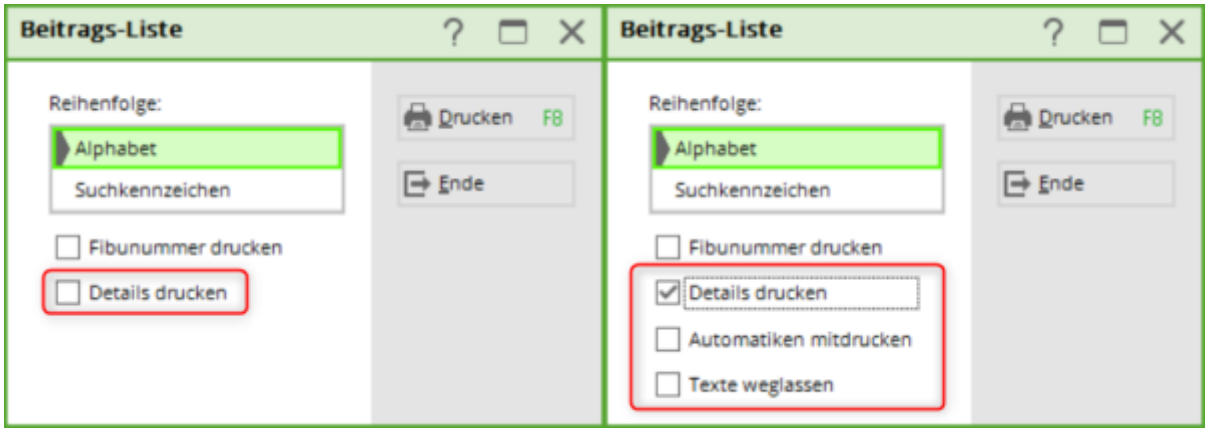

Corrected: Deactivated the subscription check in the quick checkout selection

New print field <IBAN_XXX> in the format editor under the „Fields“ button
The new field <IBAN_XXX> in a list, for example, inserts an IBAN in which all digits, except the last 4, are replaced by X, i.e. made unrecognisable. <IBAN> prints the fully readable IBAN as before.

New options for the statistical evaluation of customer groups via the statistics areas for large customers

Corrected: Statistics areas query no longer worked by mistake

Improvement: Print post list
New checkbox „Print details“; if this is activated, two checkboxes are available for selection, „Include automatic printing“ and „Omit texts“

Accounts dialogue: Add factor and card value columns

Adjusted: Automatic mails from courses are now only sent with course status „Definite“

Correction to the block text

Print reminders: Optional dunning level column
The dunning level column can be omitted by using the command <RECHNUNGEN> the command <RECHNUNGEN:NOLEVEL> is entered in the print template.
This is for „Payment reminder letters“ in which the word „reminder“ should not appear anywhere. Also not as the column title „Reminder level“ in the section with the due invoices.

Translations corrected/improved

February 2024

Turnover statistics: Correction for extended statistics

Correction: Check RPR transmission for 9 holes with a dash in the result

Adjustment: Only print course lengths on scorecards if this length has been explicitly recorded.

Time recording administration: Opening the dialogues is now faster than before by avoiding unnecessary, multiple calculations of the same time period.

Print QR code with receipt printer - With the new QR code readers for ball machines, it is now possible to print a QR code on a receipt or a green fee bag bag and a guest can use this QR code to draw balls or open the car park barrier.

Implemented proposal from the voting tool: 2 counting methods in one tournament - game form: HCPI low: stroke play - HCPI high: maximum score
This feature is fully programmed and has been submitted to the German Golf Association for approval and licensing. As soon as this has been done, the setting option will be enabled with an update.

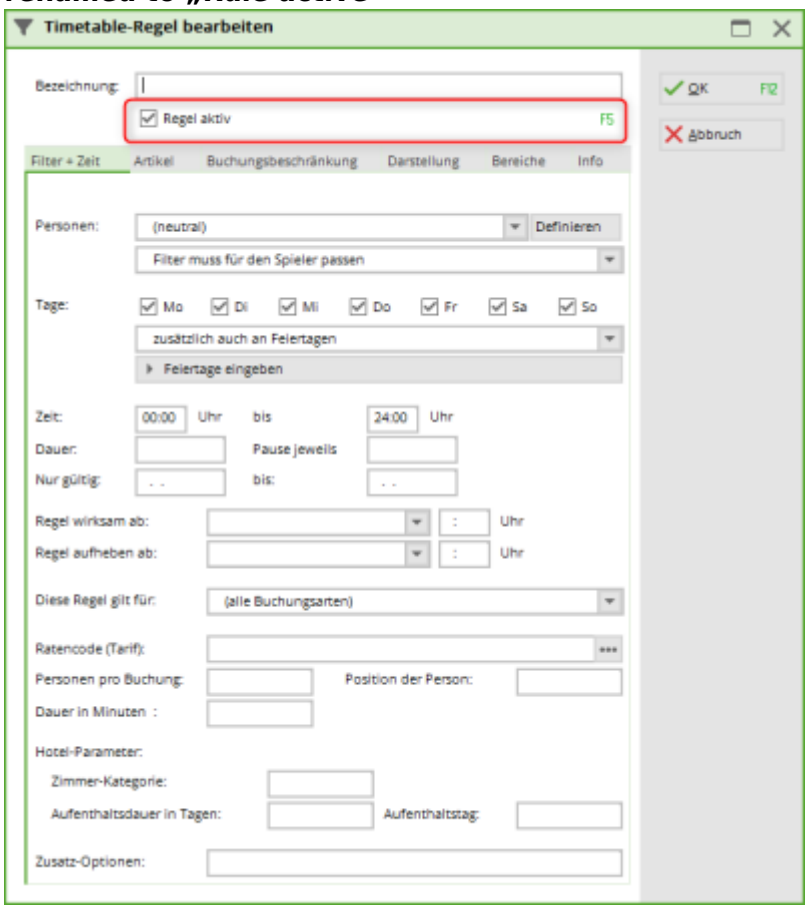

Adjustment on the terminal: Interpreting the message on cancellation

Corrected: that new articles were created as inactive in the multishop side areas

January 2024

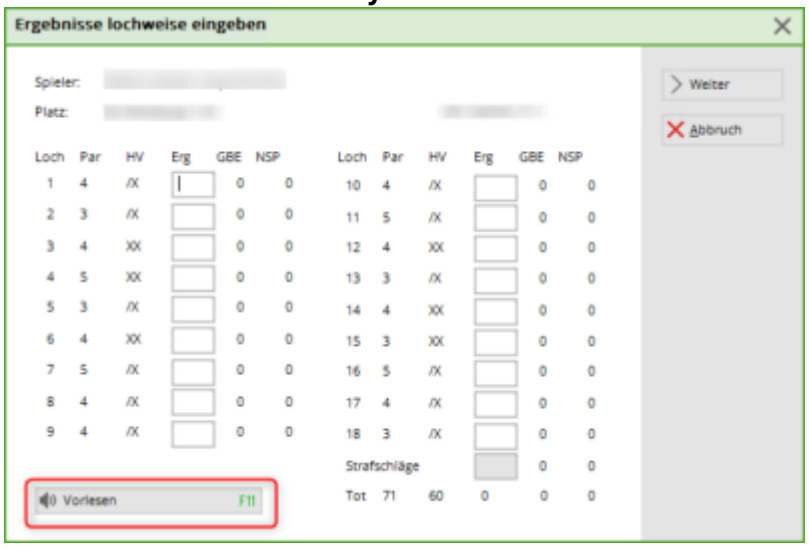

Caught: Error ASP:14 when checking the player ID for secondary members (in German clubs)

Timetale rule dialogue adjusted: Tick „Temporarily deactivate rule“ moved upwards and renamed to „Rule active

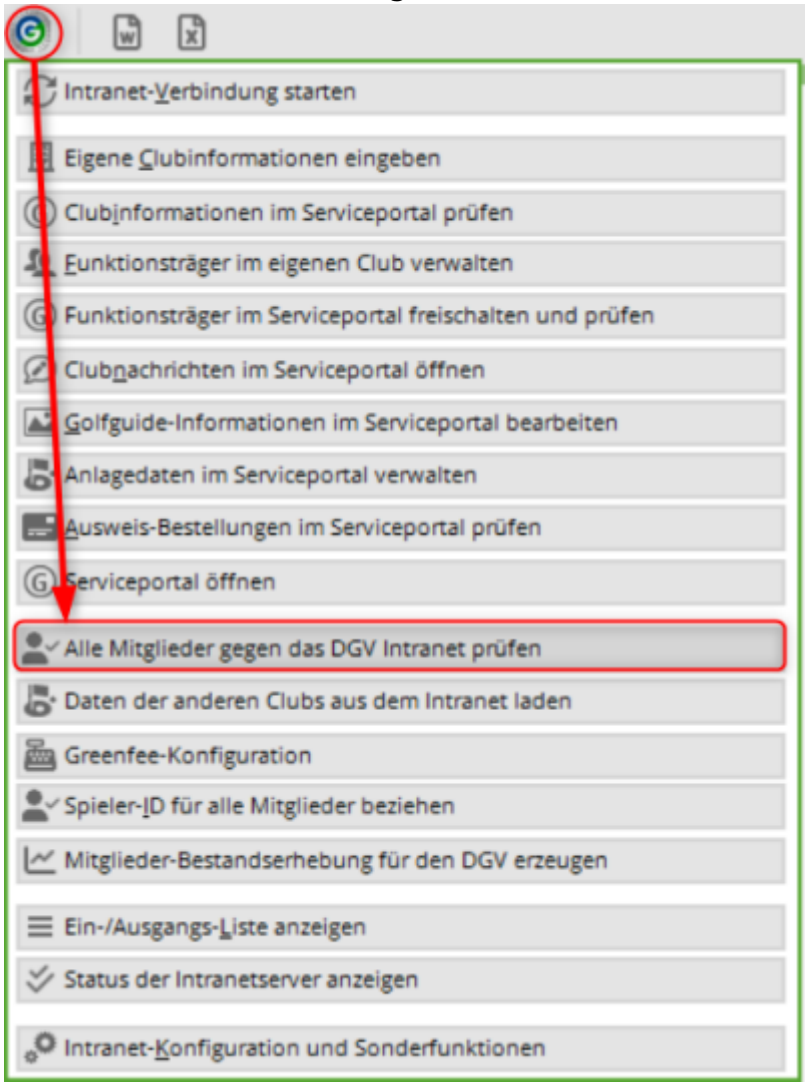

Hotel interface: Check that bookings that cancel each other out (goods against voucher) are also posted to the hotel

Read button in RPR entry

Revised post editor with new look, copy and account function

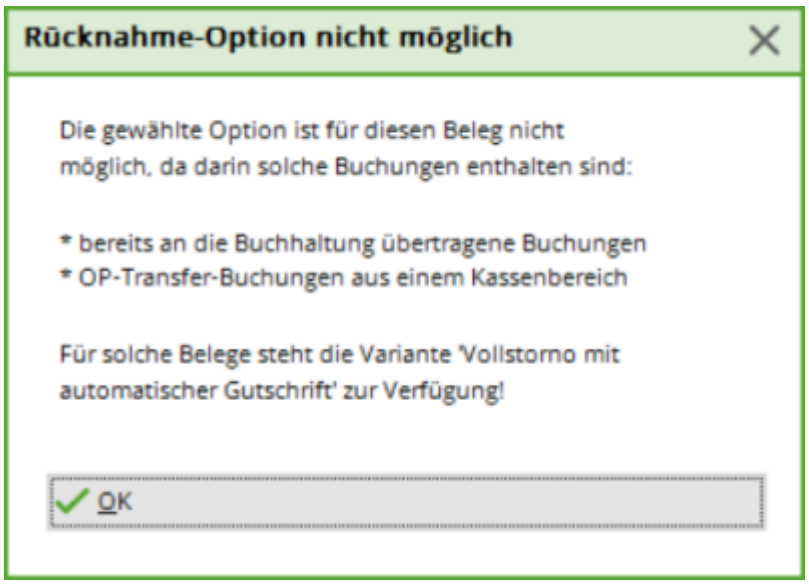

„Check all members“ integrated into the intranet button

Improvements to the time recording and work planning module

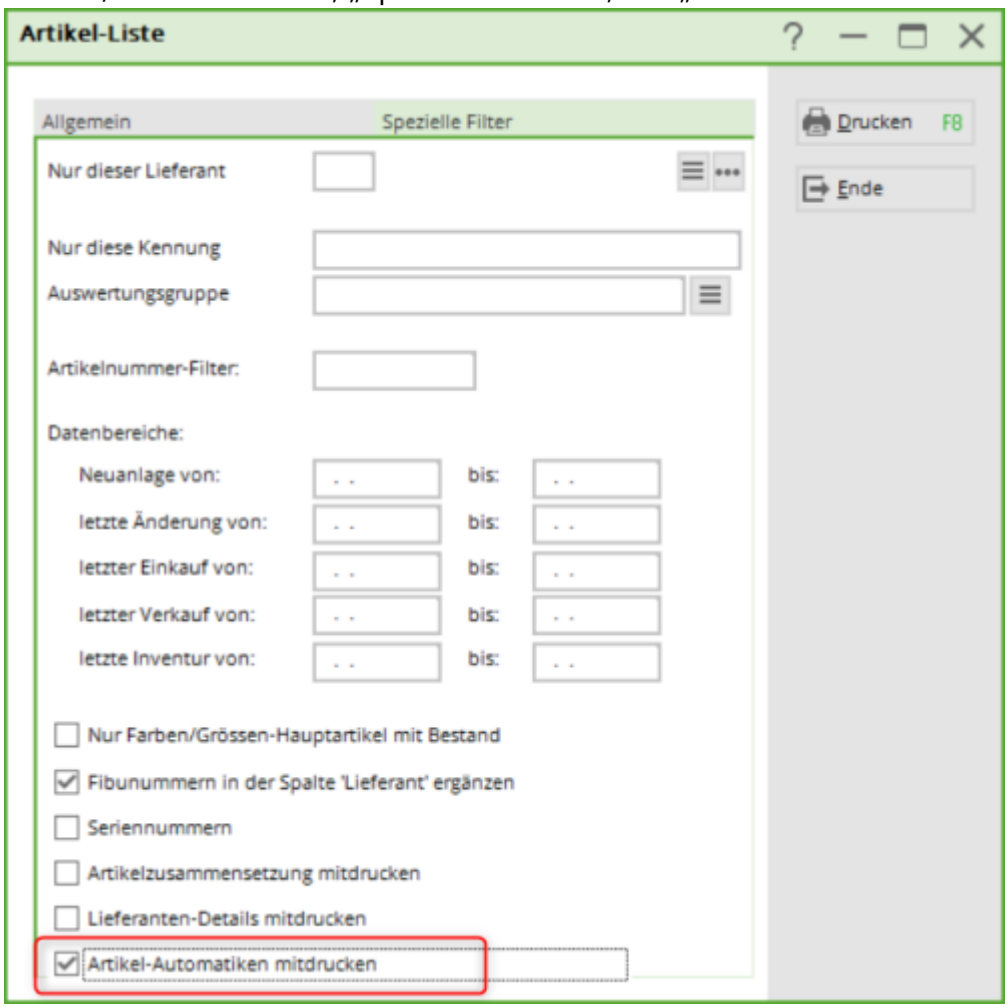

Storage of the automatic article field „Function in home club“ corrected

Adjustments regarding invoice cancellations
If an invoice contains transfer vouchers from the cash register or vouchers that have already been exported to the financial accounting system, these invoices can no longer be cancelled, reversed or the invoice entries copied. Only the „full cancellation with automatic credit note“ is possible.

Calendar dialogue element: Leap year correction

The article automatics can now also be printed in the article list
Articles/Print...Article list, „Special filters“ tab, tick „Include article automatics in print“

Correction of the Micros interface

Changelog 2023

December 2023

Article statistics: Evaluation of purchases also called sales
For a few customers (only with active translation), the text „Evaluation of sales“ was printed incorrectly when printing the article statistics when selecting purchases. The evaluation was always correct, there was just an error in the labelling; a language identifier was missing here, which meant that purchases and sales were always both printed as „Sales“.

In the menu item *System* > *Article types/articles* added the item „Edit, swap, summarise product groups“

Corrected: Error message when deactivating the Hcpi relevance

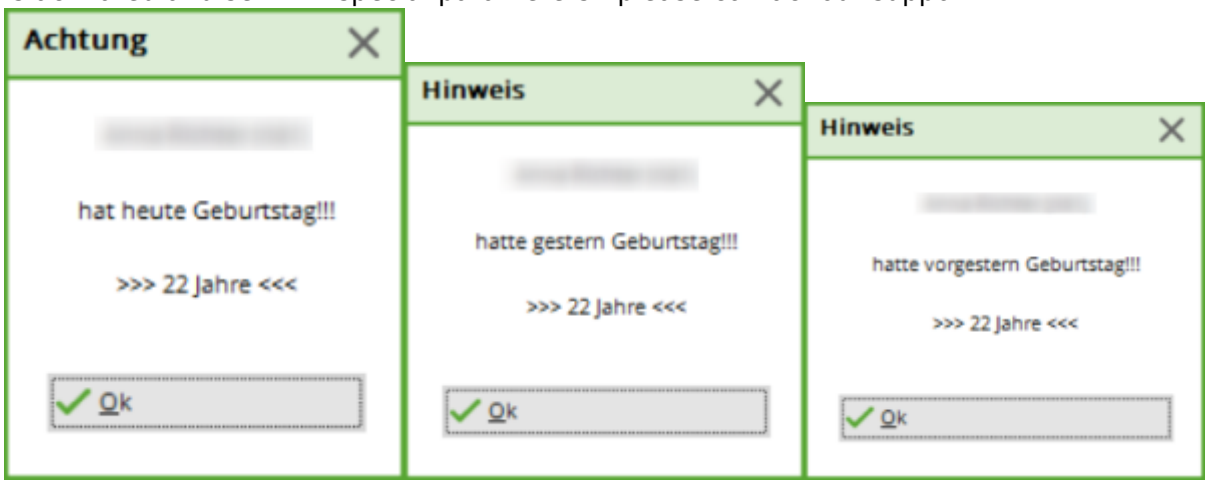

Extended the active check when printing card lists

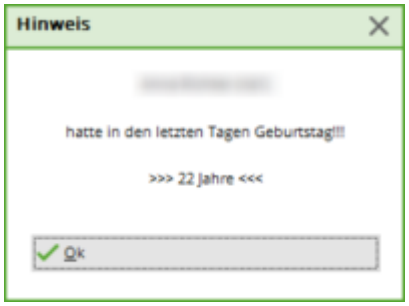

Problem with the contribution editor in PC CADDIE versions from 13.11. to 9.12.2023
You can find more detailed information here: Problem with the editor for contribution articles in PC CADDIE versions from 13.11. to 9.12.2023
Please download a current update (at least from 11.12.23) before creating contribution invoices.

Adjustment regarding validating error for HCPI_REL_EXCEPTION_REQ

November 2023

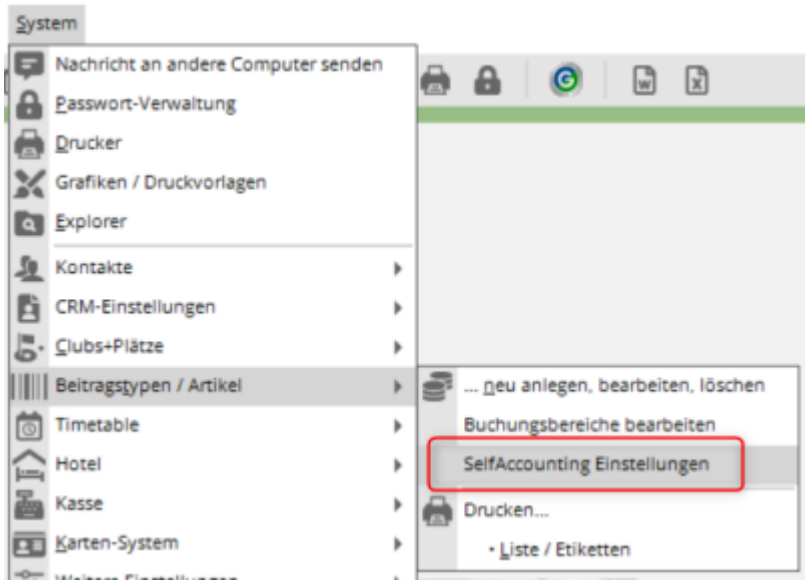

Display birthday reminder longer when calling/selecting a person
Suggestion from the voting tool, which we have implemented without it being fully voted.
Is activated and set with special parameters - please contact our support.

Correction in person sorting (when printing lists of persons)

New menu item: SelfAccounting settings

Voucher sale: Number field is blocked for manual changes

Correction in the automatic contribution allocation

For customers in Switzerland, the coordinates in the club mask can be adjusted manually. These coordinates are also sent to the GolfBox database so that the club position can be displayed in the Swiss Golf App on this basis.
By default, the coordinates are determined automatically based on the address - in cases where the postal address differs from the actual localisation of the club, the individual coordinates can be entered manually by prefixing them with „M:“ or „Man:“.
Note: For German customers (members of the DGV), the field remains locked and the coordinates cannot be changed manually, as these coordinates are officially defined and obtained from the DGV. If you require an adjustment here, please contact the DGV.

Waiter/operator name editor restricted; short name can no longer be changed/removed there

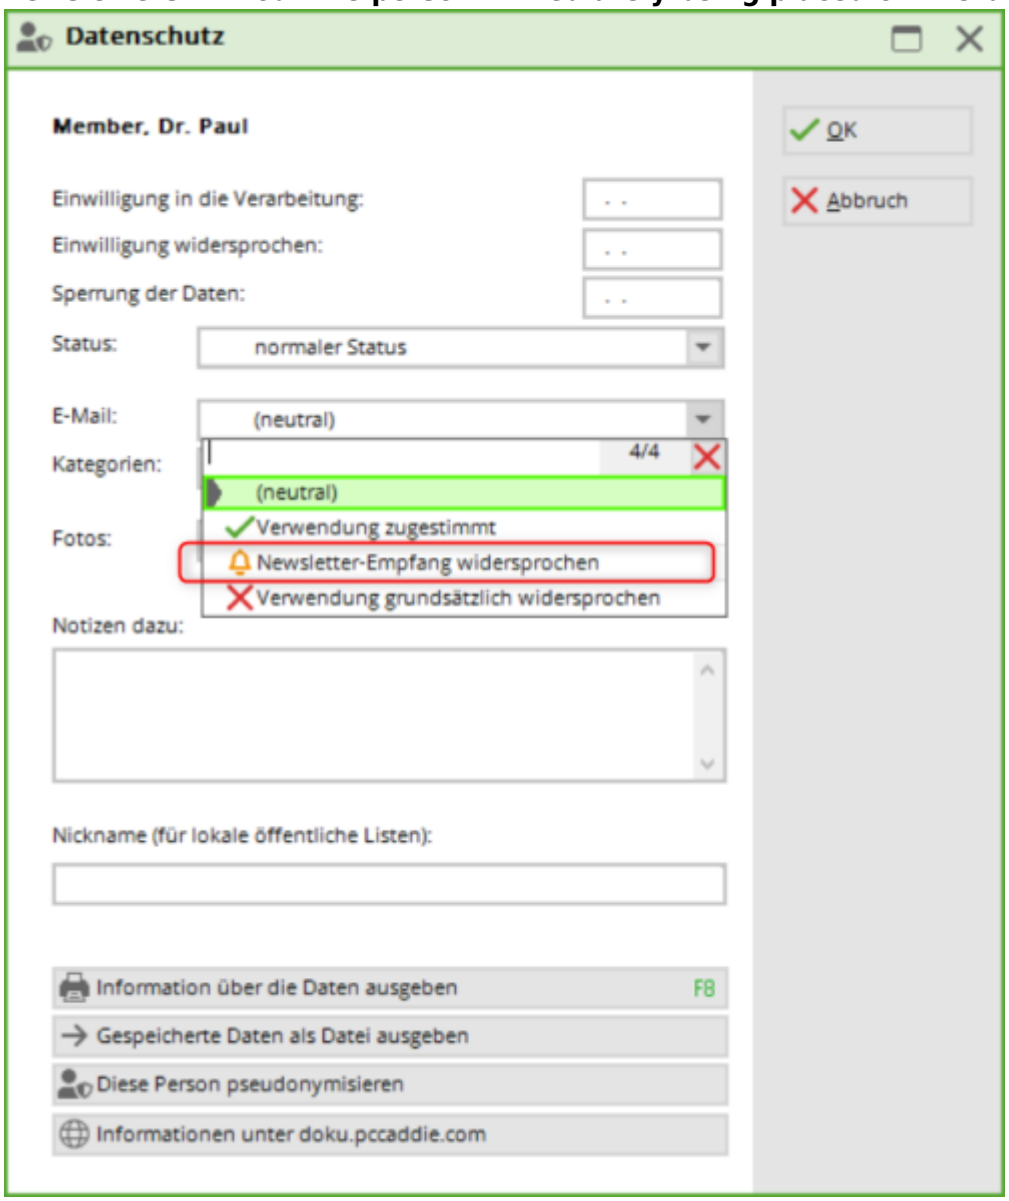

Adjustment regarding CR equalisation outside Germany

Correction to the clipboard (language/translation)

Adjusted so that the home club status TRUE is sent to Swiss Golf for an entry in the future (45 days before entry)

Redemption of the subscription to the player and not to the reference

Data protection newsletter: new status regarding mail privacy to stop only the sending of newsletters without the person immediately being placed on the blacklist

When a teetime booking is posted, a subsequent round is no longer posted if this has its own article entered

Adjustment so that option articles are suggested again in the booking details even if the option is not selected

Small correction for tournament 18 holes and only 9 holes played

Prevent a GBE from being sent for 9 holes during intranet transmission

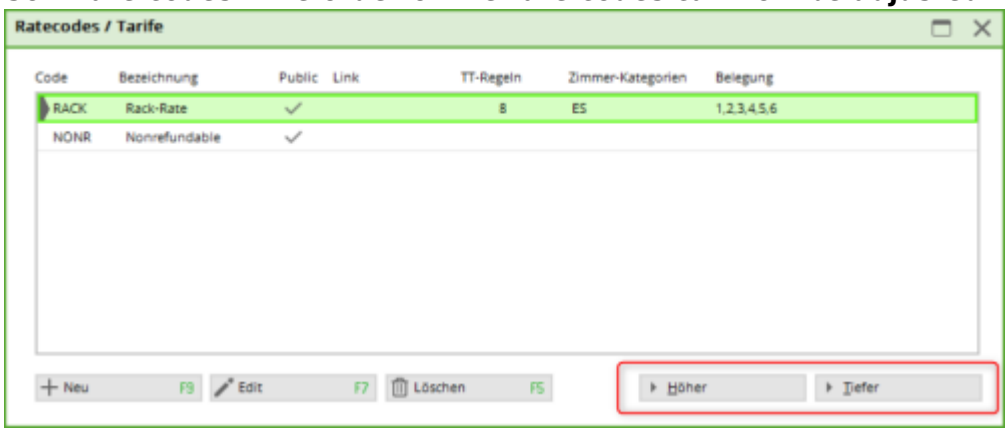

No information on AGS or new Hcp for pros
(since nothing has been calculated there so far, the information remained NIL, which then led to the output of the Stableford points)

The dialogue for the intranet configuration has been completely simplified to eliminate sources of error.

Error message intercepted - when sending a mail merge from an event

October 2023

Sort rate codes - the order of the rate codes can now be adjusted with up/down buttons

ABO management: unit 0 is no longer permitted for the sales item
For existing articles, „change/save“ automatically sets unit 0 to 1.

Optimisation of the redemption function for points-based vouchers

Switzerland: Adjustment so that for 9-hole results the choice between 9- and 18-hole Hcp remains in the course Hcp

DGV intranet: ERR:84 check further improved with regard to intranet check and card ordering

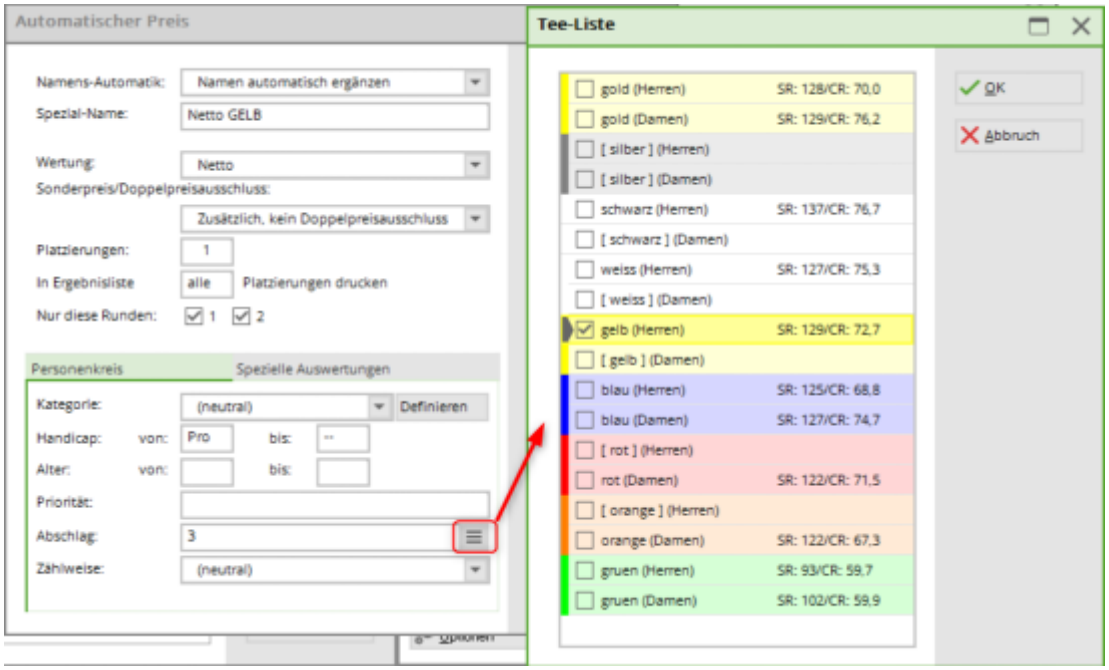

Correction for Swissgolf Golfbox: Reloading of the new HCPI for adjustments

Correction for events: If necessary, also output a dummy course, even if no tee shot is valid

Adjustment for HTML export so that it runs independently of SGN.AGB_OK (the names are no longer anonymised)

Adjustment to the team ranking, „Pro“ is now placed after the name of the pro

Price category classification based on tee colour (and/or counting method)
This was a suggestion from the voting tool, which we have implemented for you, although it was not yet finalised.

With the new QR code readers (Minova readers) for ball machines, it is now possible to print a QR code on a receipt or a green fee bag bag and a guest can use this QR code to draw balls or open the car park barrier.

Correction Golfbox card order - member change data record is not written

September 2023

Accounting export Datev format 7.0 (with KOST2) - alternative to format 5.0

- The differences are minor. It may be of practical relevance that in the new version the tax key may be up to 4 characters long. In version 5 it was only two characters.
- In future, the second cost centre can be entered after a second slash. To do this, the following format must be used for the article or the product group in the „FNA account:“ field:

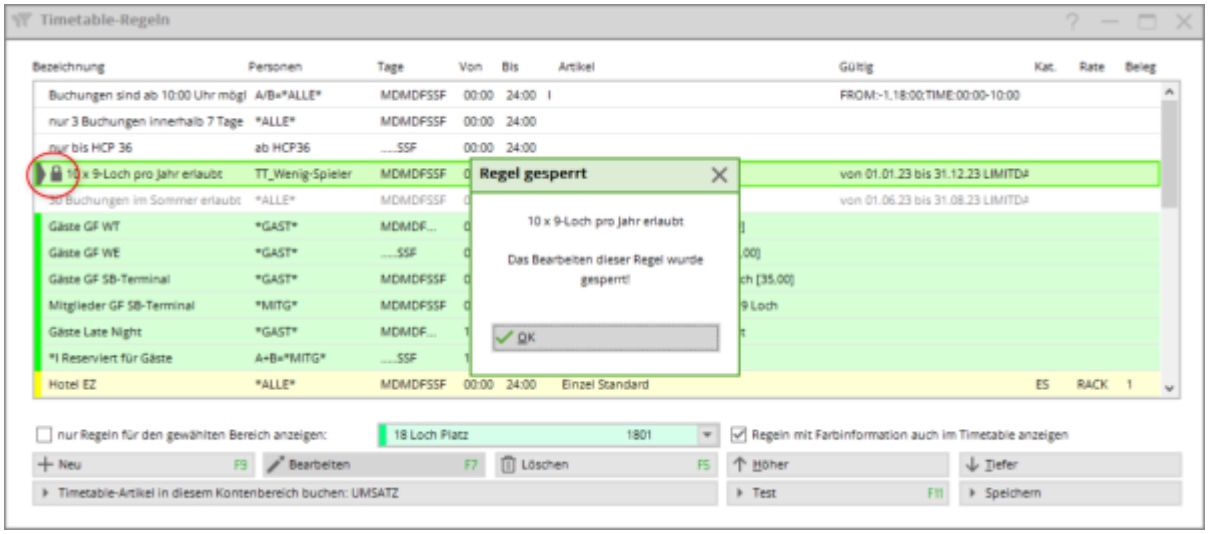

Tax key . FNA account number / cost centre one / cost centre two
Example: 12.4321/5/6

```
Tax key: 12
Account number: 4321
First cost centre: 5
second cost centre: 6
```

When exporting, make sure to change the format from DATEV 5.0 to DATEV 7.0!

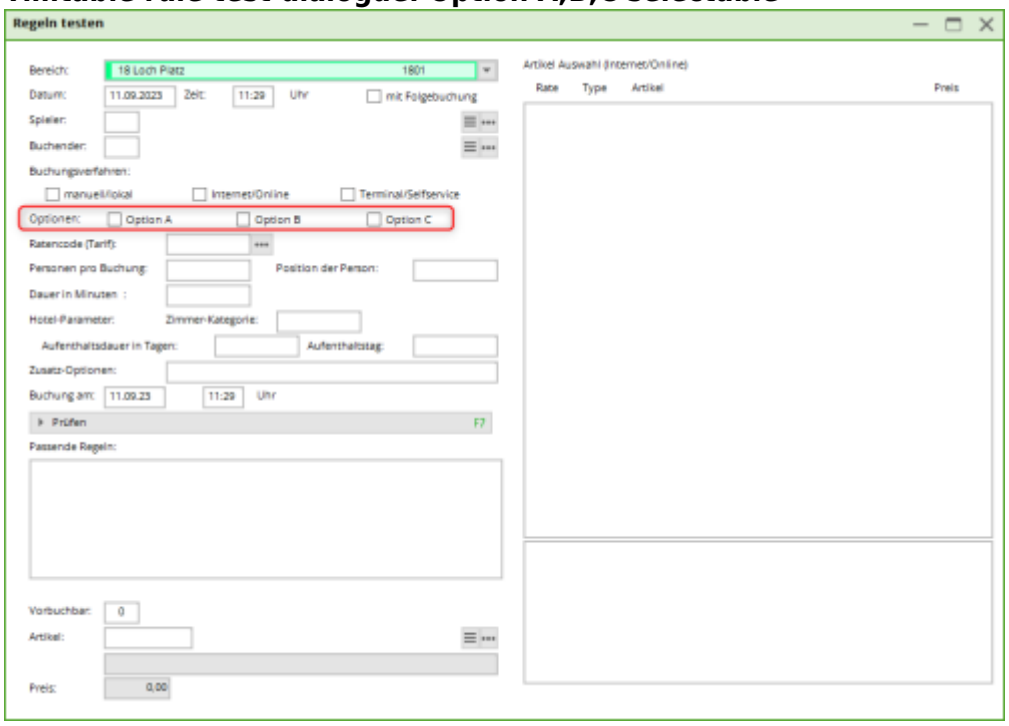

Configurability of the storage identifier for account areas in the Multiclub

Timetable rule list and timetable rule editor: A lock symbol is now drawn for rules in the list that are locked for editing by normal users.

If the editing of all timetable rules is blocked for the logged-in user, the „New“, „Edit“, „Up“, „Down“ and „Delete“ buttons are now also removed. As before, a dialogue indicates that the rules can only be viewed and tested, but not changed or deleted.

Timtable rule test dialogue: Option A,B,C selectable

Print cashbook: PC CADDIE now takes into account the time on the from and to day, if a time is entered there in the cashbook print dialogue

PC CADDIE Hotel: Improvements when finalising online bookings with online payment

Correction: Activation of game right selection for new members

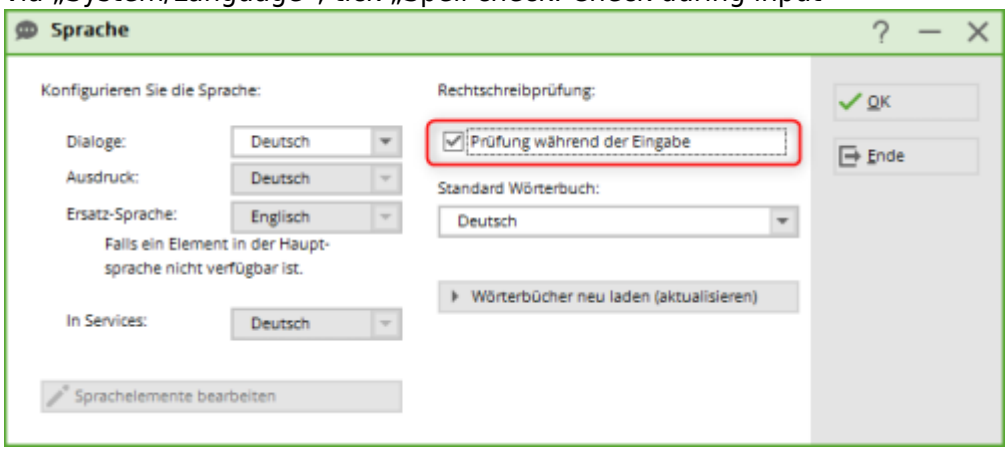

Correction to card system: PIN cannot be found as reference card number

Check home club and delete Hcp after club change

Activation new DGV membership notification 2023

Converted from the voting tool: Spell check for emails sent via the PCCADDIE module

via „System/Language“, tick „Spell check: Check during input“

New demo version uploaded

August 2023

Adjustments to the interface with the Italian Golf Association

Correction: Do NOT copy status regarding new Hcp from the intranet when copying tournaments

Mail address for cancellation link as separate column
Improvement, as we have noticed that in some cases the email address contained in the unsubscribe link has increased the spam suspicion of an email: There is now a field UNSUBSCRIBE for the supermailer (or „extra8“ for RapidMail). If you use these fields for the unsubscribe link, this should be better for spam scoring.

Card system; for online top-up: Information on special points now in the confirmation

Enhancements to Minova reader control

- Offline screen
- New icons

Correction: 9-hole playing handicap check on result sheet

July 2023

Automatic mails: Exclude waiting list - Previously, automatic mails were sent to everyone. The waiting list is now generally excluded

Correction: Check night run error

When booking via the Internet, use the longer time for carts by default even if no subsequent booking is made, because only one area is available for selection online; this is activated with a special parameter

online payment: if the „Turnover“ item in the password management is set to „Look“ or „Restricted“, then this user cannot make refunds via the book button in the timetable and via the voucher list

Improvements to the results list for the four-man flag competition ⇒ No more centre line in the results column

Check inclusion of instalments on invoice

Correction document summary - must not add up articles across documents

Three new fields in the customised start list layout:

- <TIDATE> (Registration date)
- <TITIME> (Registration time)
- <TIWAY> (registration method)

Correction „Booked timetable entries are not updated in the timetable“

Check update flag and cache update

Correction that the course data was missing for eScoring RPR

When selling an RPR scorecard item, print the scorecard directly and enable eScoring

The search in a multiple selection now works for persons, articles and clubs

Start list „Telephone numbers“ with mobile phone number instead of landline number as before

Optimisation with regard to possible errors due to account area switchover for entry fee direct debit

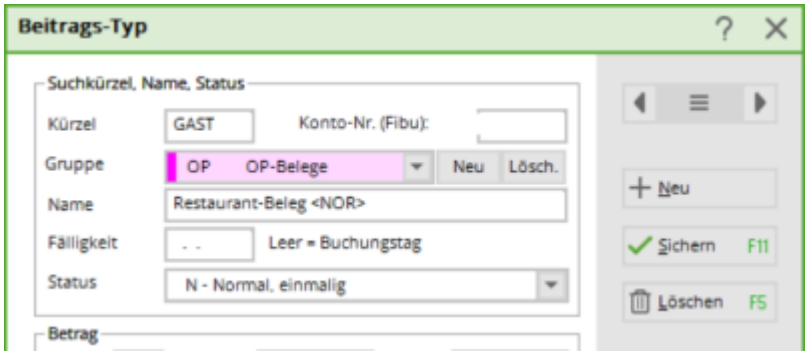

No manual card value adjustment to negative values

List negative card bookings (manual debits from cards) individually

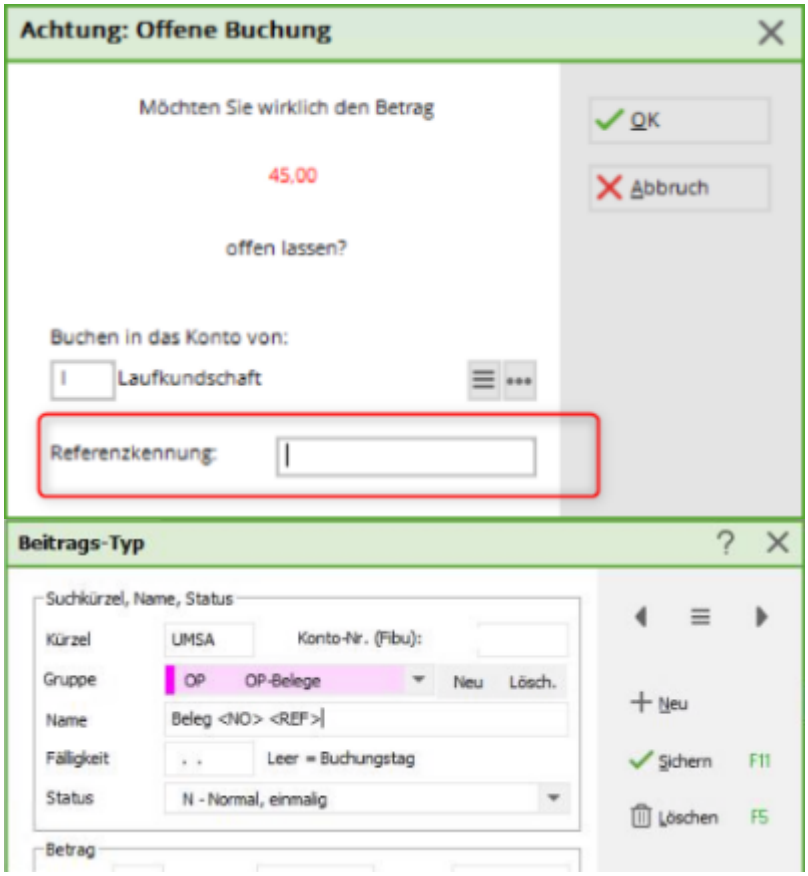

Optimisation of online payment with carts bookings: Saving carts bookings and articles

Correction of RPR scorecard printing: ensure that the player's Hcp is printed on the card

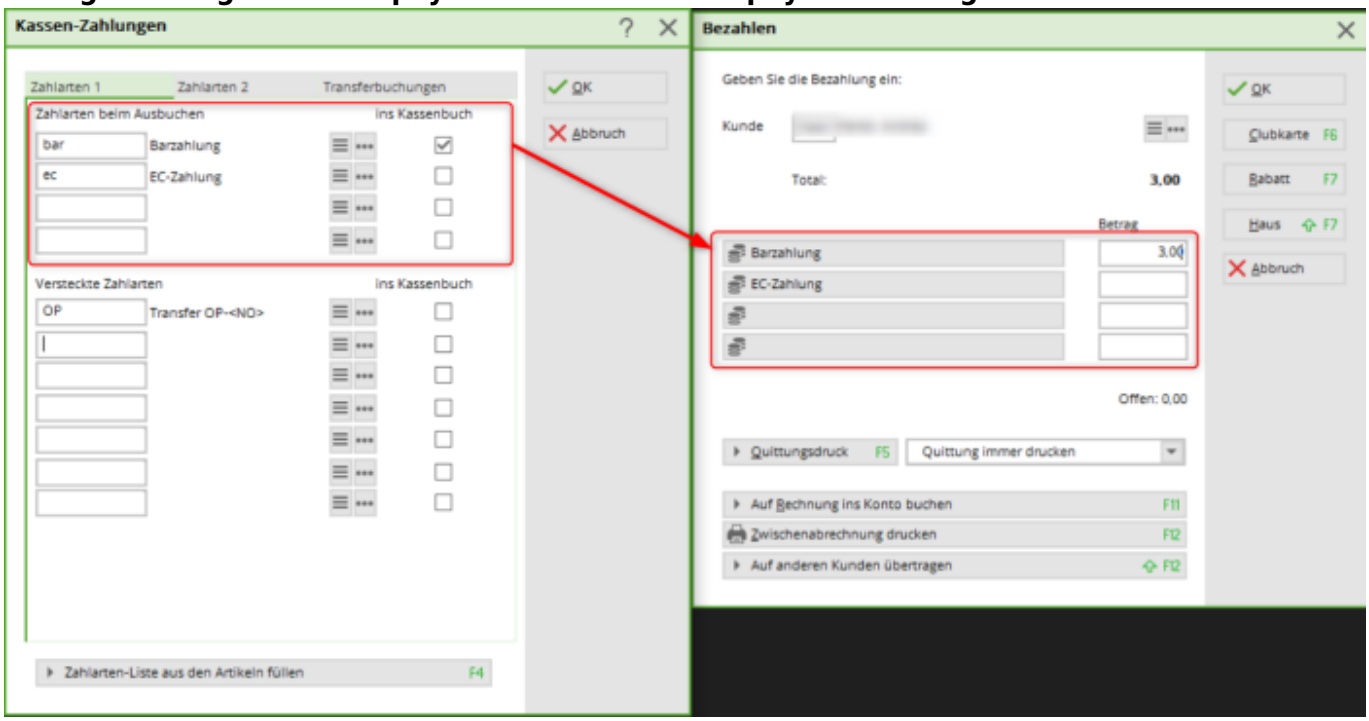

OP transfers: New field <NOR> = Number or Reference

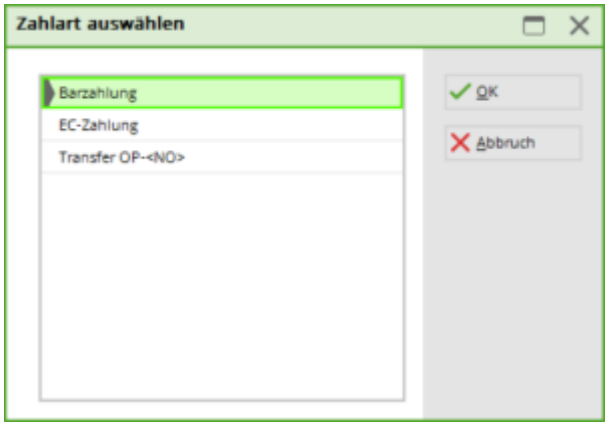

Previously there was only the field <REF>field to add the reference identifier to the name of the transfer article in the open item invoice.

Changed configuration of payment items and the payment dialogue

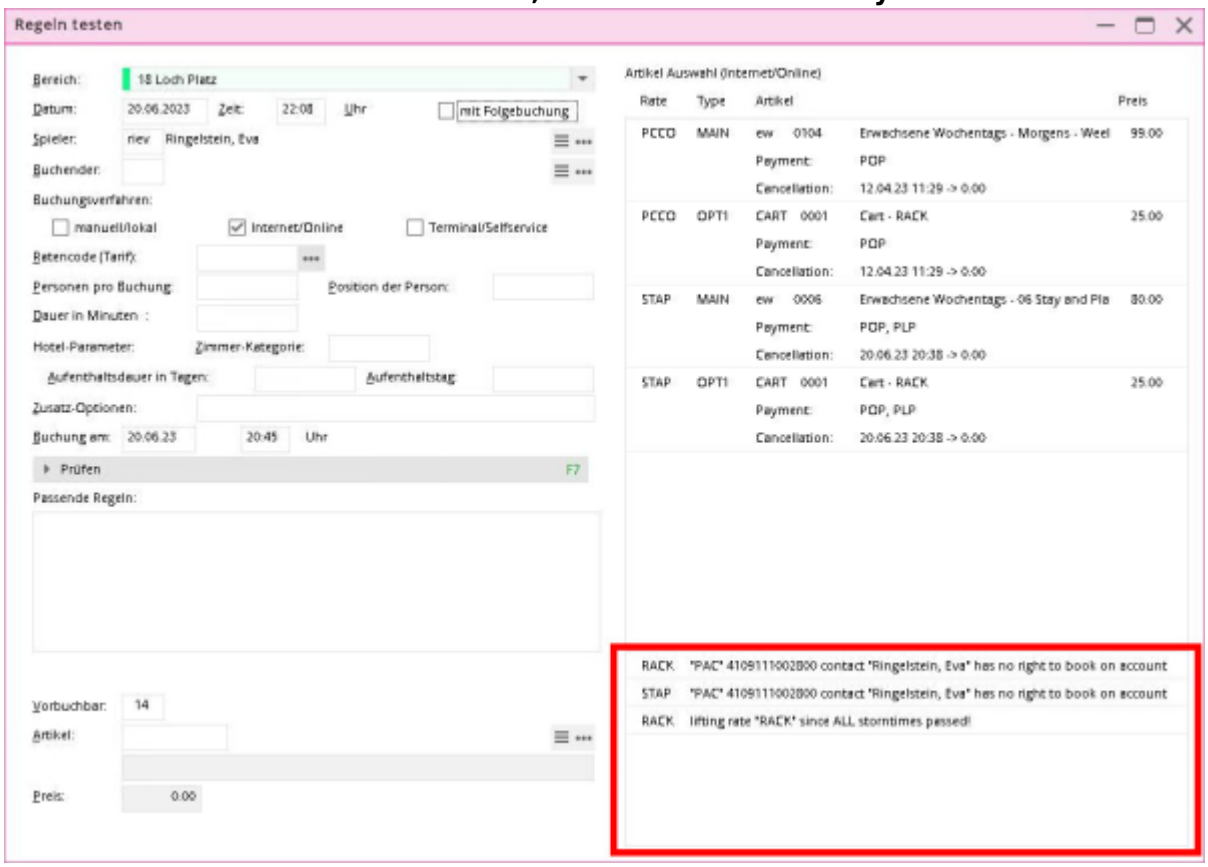

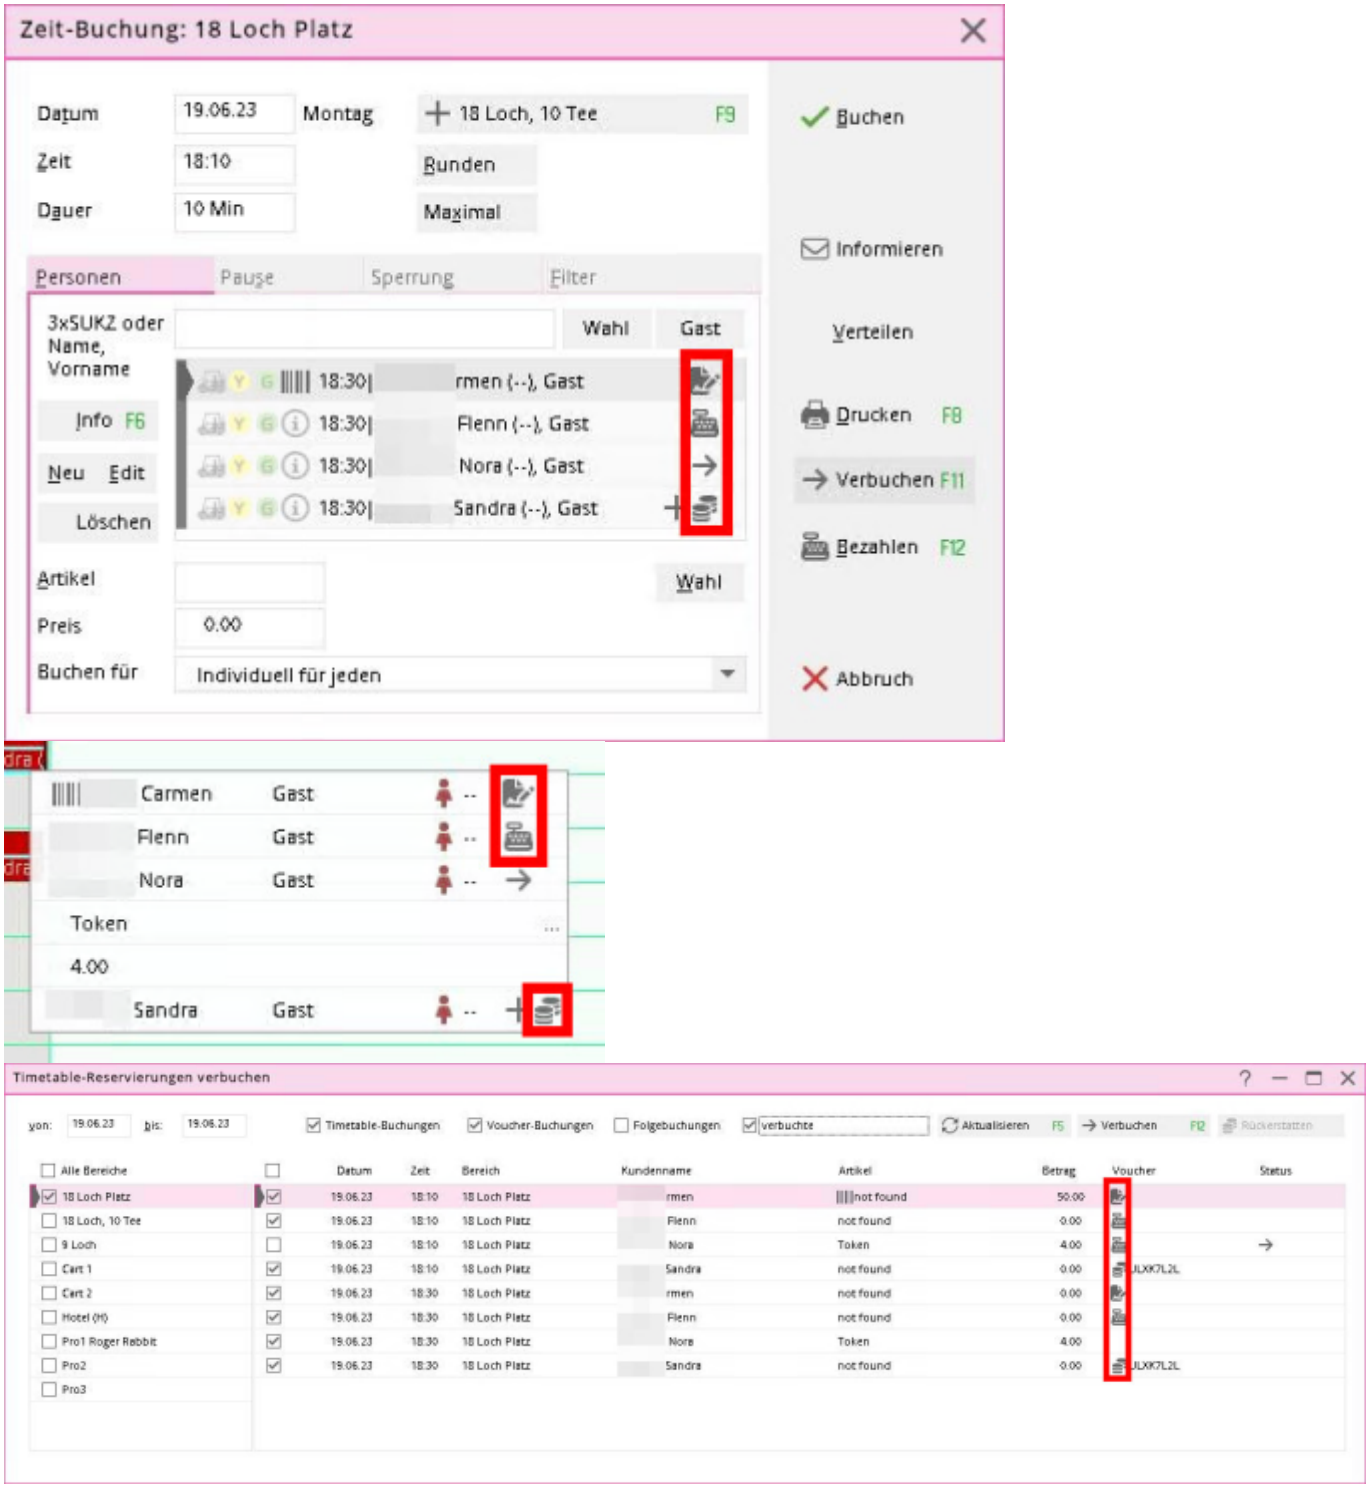

June 2023

Personal images path setting removed (PCC storage path for images) - PCC will always use the default path from now on

List with information on TiexArticle, i.e. article selection by rate codes

In the classic timetable booking screen, in the timetable pop-up (ToolTip) and in the timetable booking list, icons are now used for online bookings to show which payment method is stored.

Adjustment so that a PCCADDIE update can only be started with parameter rights

Better updating of general play results in the PC CADDIE app in collaboration with Swiss Golf

Adjustment: calculate maximum score for RPR scorecard the same as in tournaments

Revision of the layout of PCC_MENU.EXE (the grey screen on the terminals and handhelds when PCC is not started) and integration of a log of when and what was started

Customisation of the cash register

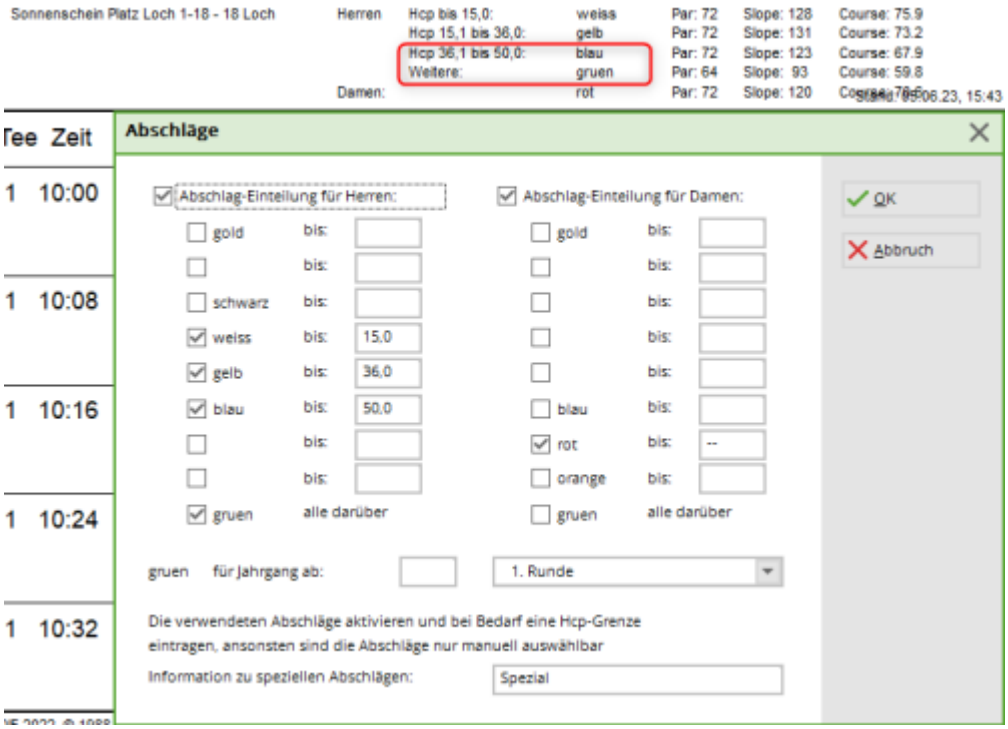

- on kitchen and counter receipts, this information is also printed on the receipt in the event of a cancellation with the cancellation reason query activated
- If several identical items with different serial numbers are sold, these are listed individually again

Information in the card usage list expanded to include card details (suggestion from the voting tool)

the number only appears on the list if a payment has been made/ a door has been opened at a machine (NOT if a payment/ top-up has been made at the till)

Adjustment display of the highest Hcp on the start list if green is still active

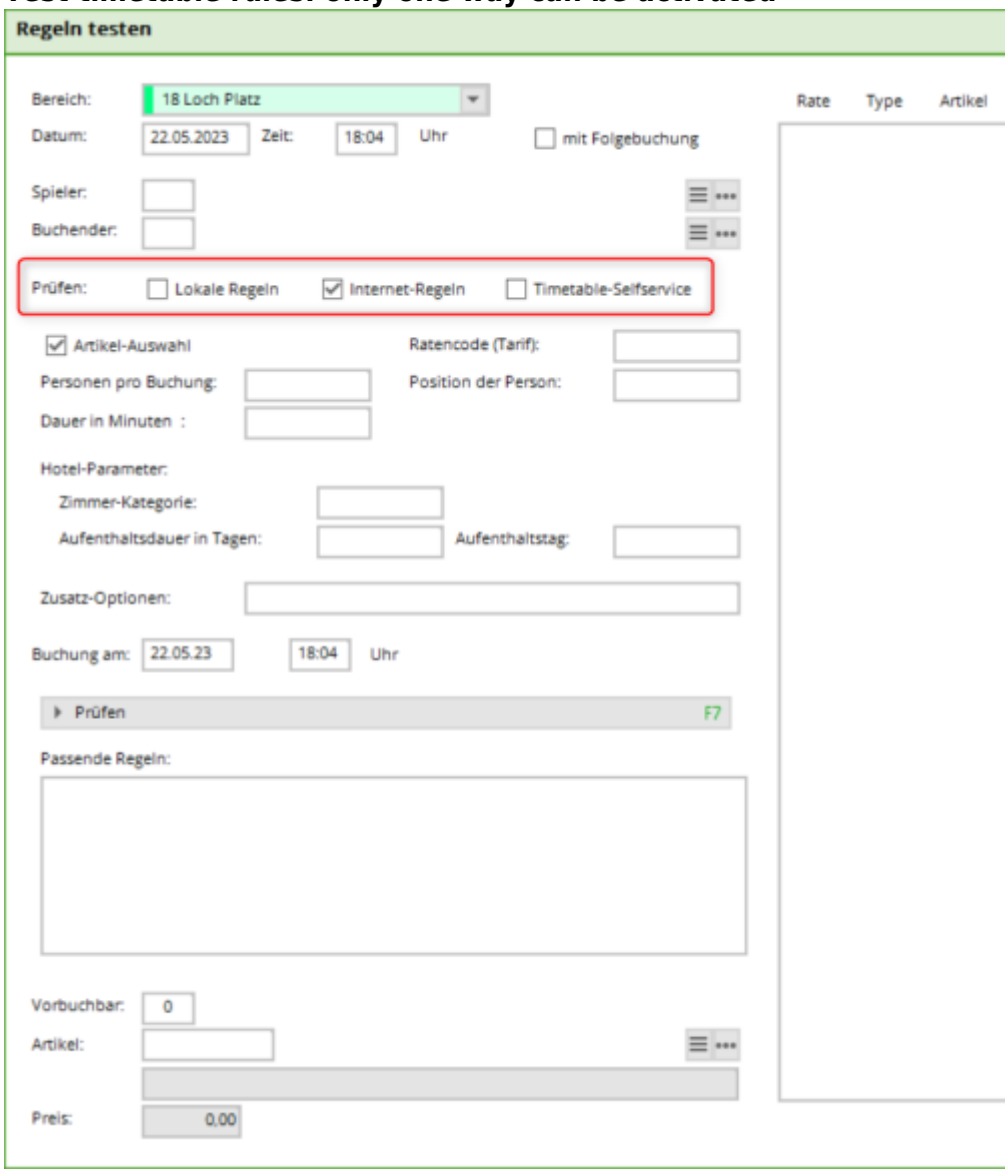

Card system: special points can also be loaded onto the card for online payments; activated via special parameters

May 2023

Correction regarding licence check for RPR eScoring

Check and adjustment regarding invoice printing with „ZWEIT“ and subsequent problems due to triggering a warning

Test timetable rules: only one way can be activated

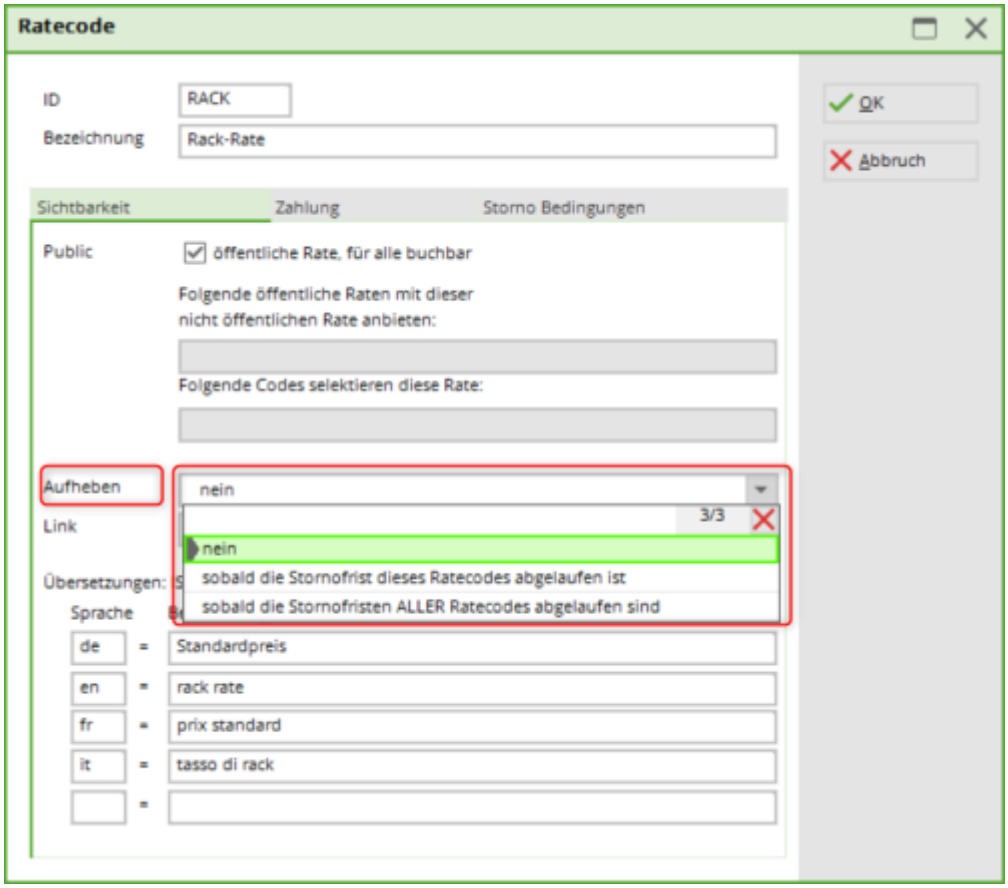

Print and mail from events now also includes all event-specific fields

Trigger of automatic mails for NoShow now also works with Delete>NoShow in the timetable

This already worked with the automatic NoShow.

Online booking with article selection: New option for the visibility of rate codes

Rate codes can optionally be cancelled as soon as their cancellation period has expired - or as soon as the cancellation periods of all rate codes have expired

Intercepted: SEPA: Debit/credit notes write-off - additional test for empty variable

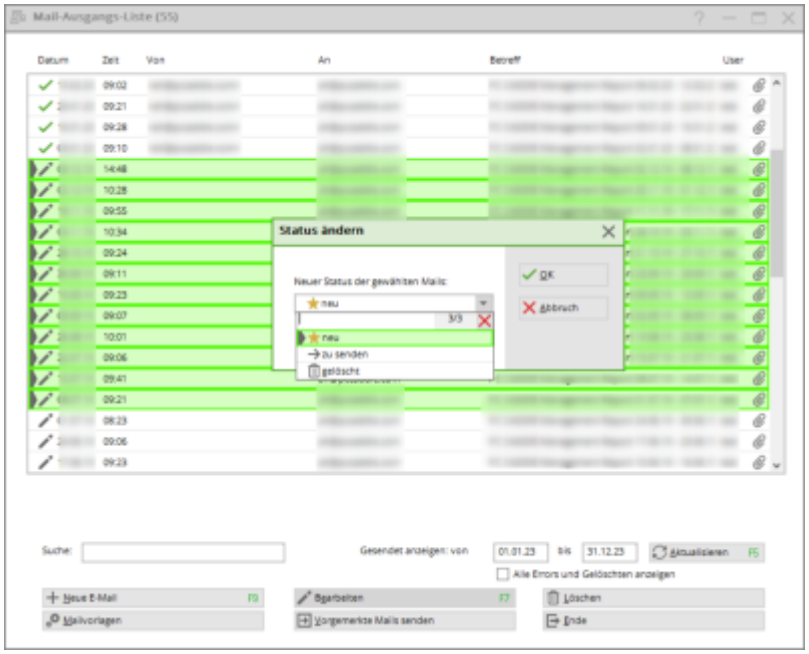

Intranet-Italy FIG: Message „Tournament completion error:“ also appeared when it actually ended well with „OK, RECEIVED“. Corrected.

Adjustments to the tournament conclusion on the Italian intranet

If the option „Print maximum score“ is explicitly selected in the scorecard dialogue in the basic setting of the scorecard, calculate net par+2 according to the usual maximum score calculation - NOT net par+1

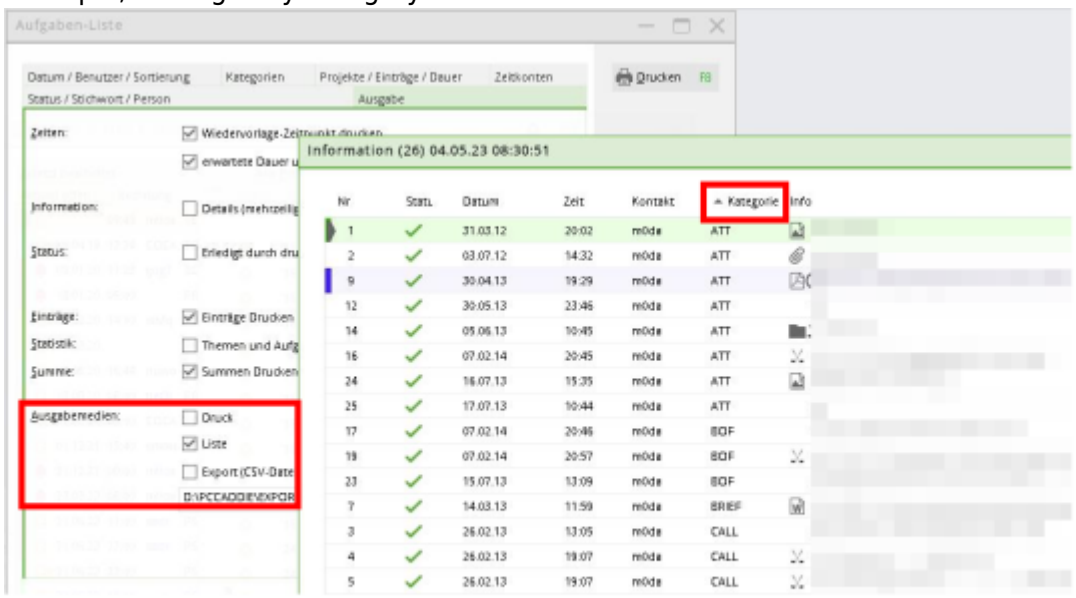

Mail template groups: The confusion with groups in mail templates is over - there are now no more groups. This also makes it clear that the full name of the template must be written in commands such as <SENDMAIL:> must be written

Mail outbox list, select several, edit. A new dialogue appears here in which the status of the selected mails can be changed. This makes it very easy to trigger several mails again at the same time if something is wrong with the mail server.

Check of future members returns „Germany“ as secondary club with ID „Heimat“ - The problem that led to this surprising entry has been eliminated

CRM list printing: Output as a list now with clickable column titles for sorting
When outputting as a list, you can now click on all column titles to sort by them. In the screenshot, for example, sorting is by category.

April 2023

Improved multi-team scoring dialogue; to be found under Tournaments > Multiple tournaments and golf weeks > Team scoring

For carts booked online, these are also activated at check-in/booking

Adjustment of addition in the detailed daily closing - do not include internal transfers with type „y“ in the addition

Multiclub installations: Allow certain employees to override the processing block
This is possible with a special parameter that can be entered in the password management in a group for senior employees so that they have the same rights in the person editor as we do.

Restrict printing times according to the number of tournament holes (e.g. 9-hole cannon start)

Correction so that PINs are displayed in the list of cards to be processed

Important update for the reliability of the cash register - please note the details: April update

Correction of the TSC service for the automatic creation of users with TSplus version >= 16

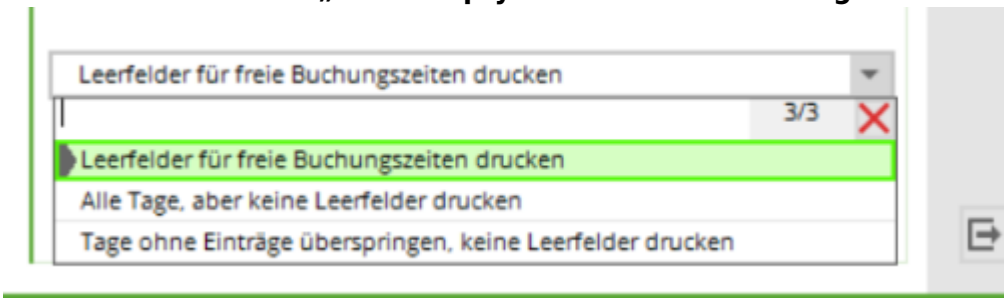

March 2023

Improvements in the configuration of vending systems

Exclude door accesses from card list

Improvement: Do not force cash drawer for self-service checkout process

There is now a choice of three variants in the freely definable booking list in the first tab below instead of the „Print empty fields for free booking times“ checkbox:

Correction of the balance calculation for articles that were booked divided into stock portions

Timetable search - sorting by date corrected

Check whether a card for a person with a different number exists, so that a new chip can be assigned to an existing card account if this is the case

Correction: if a paid green fee is cancelled in the cash register, the entry in the timetable is changed back to „open“; the status „booked“ is deleted

Minor improvement to the display of receipts in the OP billing dialogue

Overall improvement that no location data is required for less important preparations and

the transfer of events to PCConline

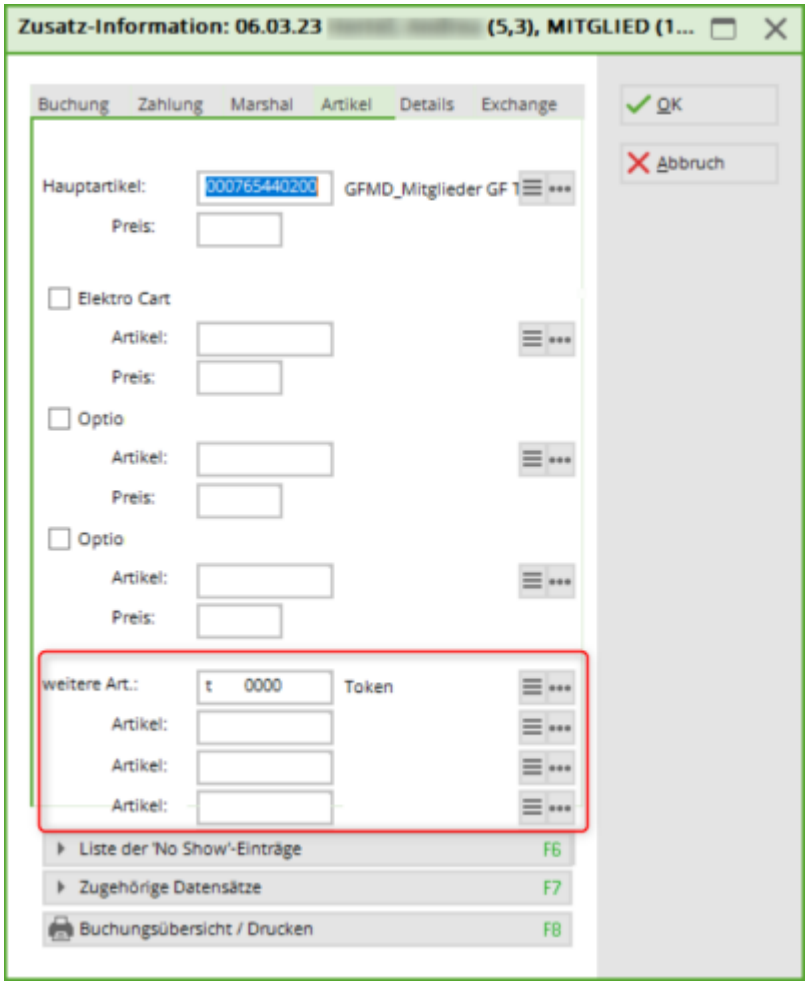

**Correction: an error could occur at the end of the tournament if there were several places in the tournament **

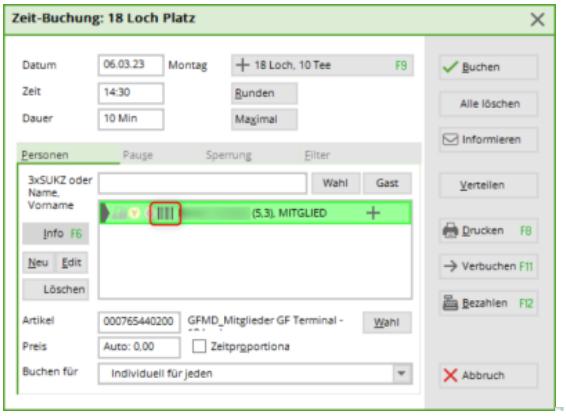

Timetable, correction: problem with refresh by xFindWindow() with changed name
This mainly affected customers with a foreign language configuration

Improvements to the checkout quick selection configuration
Checkout quick selection definition list dialogue: Refreshes after creating a new definition (e.g. upselling) and has a delete button. Only allows copying once the general definition has been created.

Switzerland: Courses or events in the category with the identifier SGPE (= Swiss Golf Public Event) are now transferred to Swiss Golf

Timetable: Display if additional items are entered
In the timetable pop-up and in the timetable booking dialogue, an article icon (the barcode) is now displayed for people who have booked additional articles (i.e. in addition to the main article and the options A-C).
Double-click on the article icon to open the additional information directly in the Article tab.

February 2023

Adjustments to password management for direct re-entry of a password

Accounting export: Cancellation credits are now also output in invoice/accounting export formats
This affects these formats: KHK32; MICROFIBU; DIAMANT; ABACONNDEB; WORKFLOW; SAGE50_TAF

Interception of the error message due to a failed process in event management

Improvement for slow transfer of card information to the timetable mask

Restriction of write-off to OP to certain cash register numbers

Check that HCPI does not already apply to subsequent rounds on the same day

Adaptation for multi-relay devices so that several BARIX can be used in a billing system for radiant heaters or floodlights

January 2023

Print CR table via PC CADDIE - the DGV has again allowed the tables for the course handicap to be printed in Germany

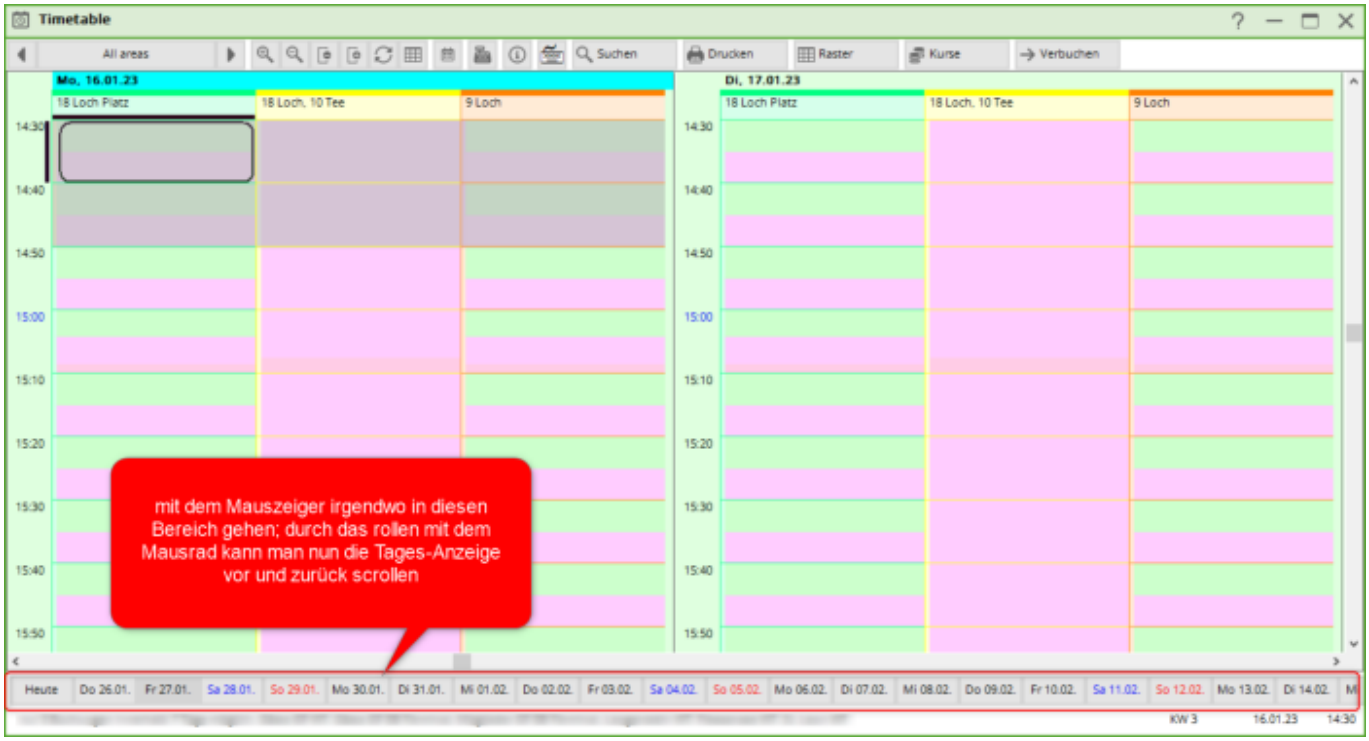

Improvement in the management of timetable areas in multi-club installations

Adjustment for online bookings regarding follow-up rounds that may not receive an article

Adjusted: no CRM alert window for users who do not have CRM rights

Austria: After discussion with the ÖGV new GBE (for players from countries outside Austria) and Stableford points on result lists

New feature to move the daily buttons below the timetable with the mouse wheel
