Changelog - Archive

Changelog 2022

December 2022

With the general club number changeover, the customer number in the subscription table will now also be changed

Intercepted: Error message when printing till receipts from an archive

Improvement to the internal handling of open CRM entries

Search TT booking for PCCoVoucher

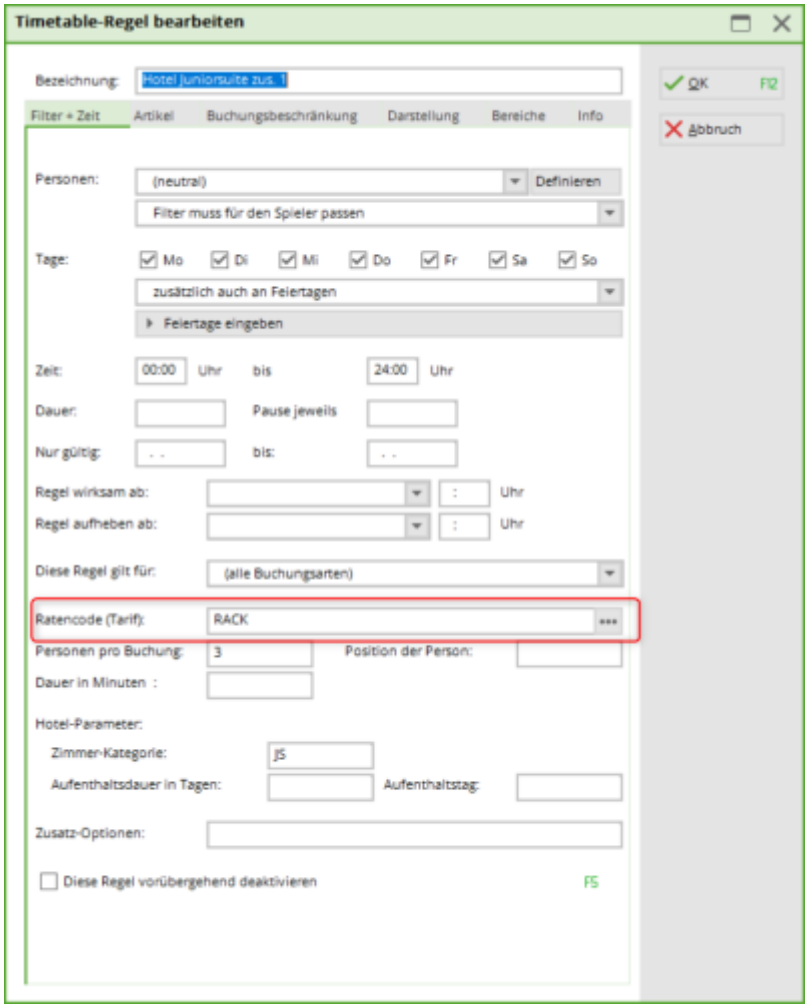

- Voucher list in the Sales menu accelerated
- New display of linked timetable bookings in the list with icon and indication of the timetable area and booking date

Adjustment that spaces or full stops, commas etc. are no longer possible in person abbreviations

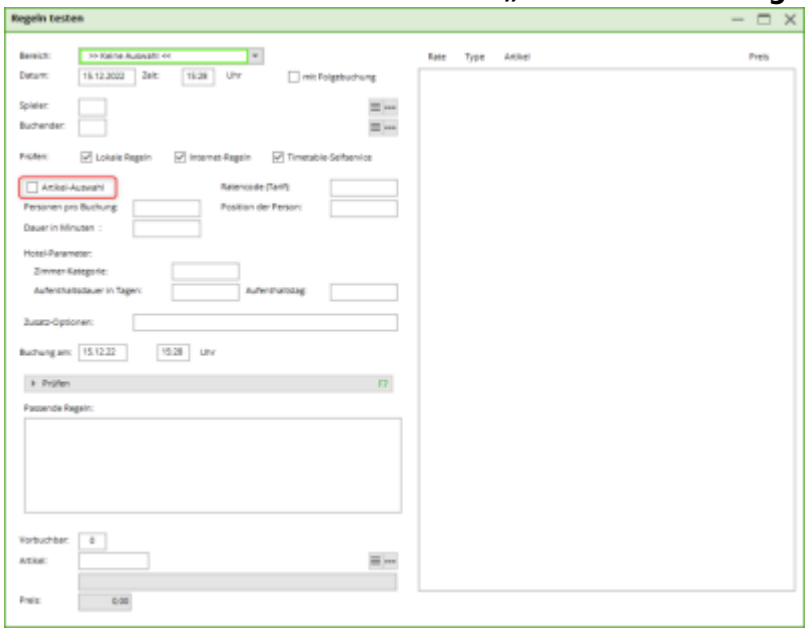

Improvement in contribution allocation with regard to special setting for the date of contribution entry

Improvement to the TicketGenerator (additional warning if the address is missing)

Rate code selection in timetable rules

Article selection in the timetable „Test rules“ dialogue

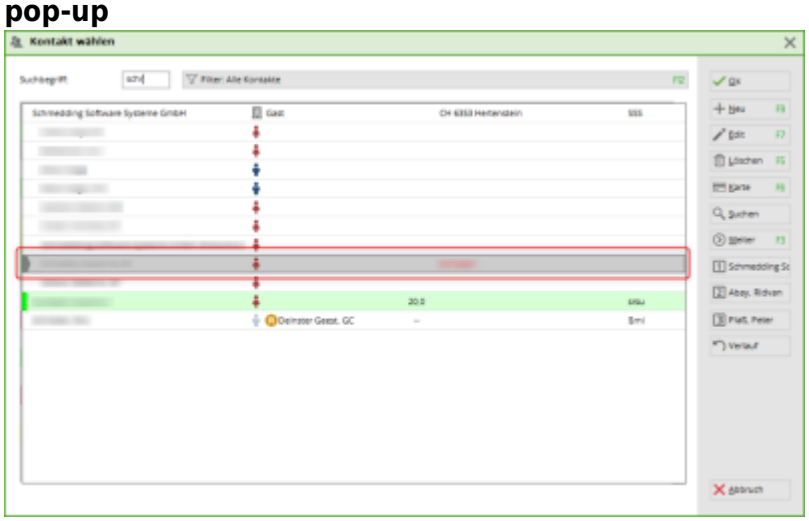

Correction event category selection

Consider discount during automated open clearing in OP; is activated via special parameter

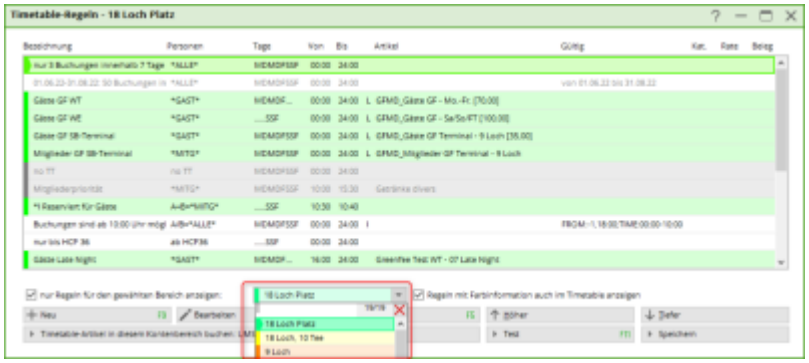

Extension of the article automation. This now also supports the rate code check. Rate

codes can also be checked in the timetable rule check

Improvements to the person search - old contact persons are also greyed out in the search pop-up

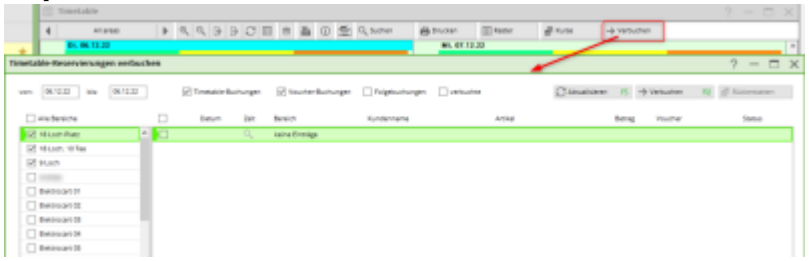

Improvement when editing timetable rules: The range filter can not only be activated below the list, but now the range whose rules are to be displayed can also be selected here

Improved communication with the payment terminal and the PC CADDIE cash register in the event of prolonged inactivity

Previously, results recorded via eScoring were not immediately counted when displaying the number of recorded results - this has now been corrected

Improvement to the book button in the timetable

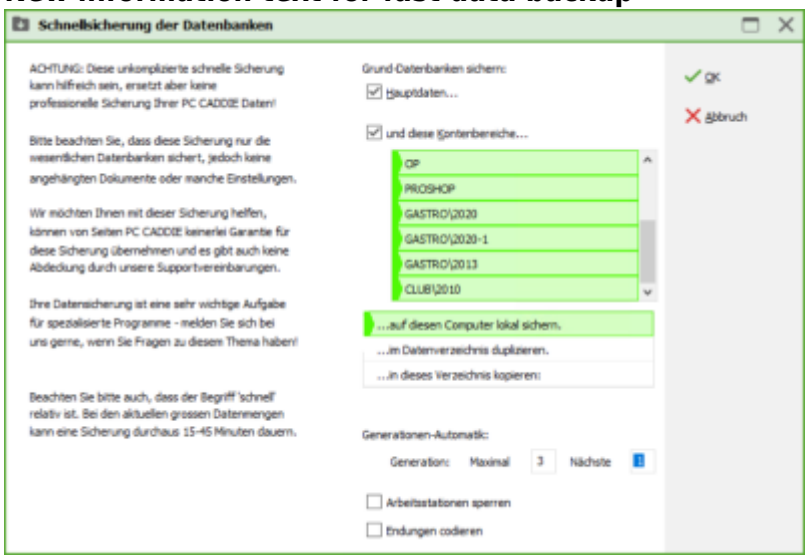

- Sort ticked areas upwards in the list (tip: select the view beforehand)
- Display personal names for text entries
- Post text entries

Social media buttons directly in PCCADDIE

New information text for fast data backup

Customisation regarding window handling in CRM/DMS

Missing data record lock for new member creation corrected

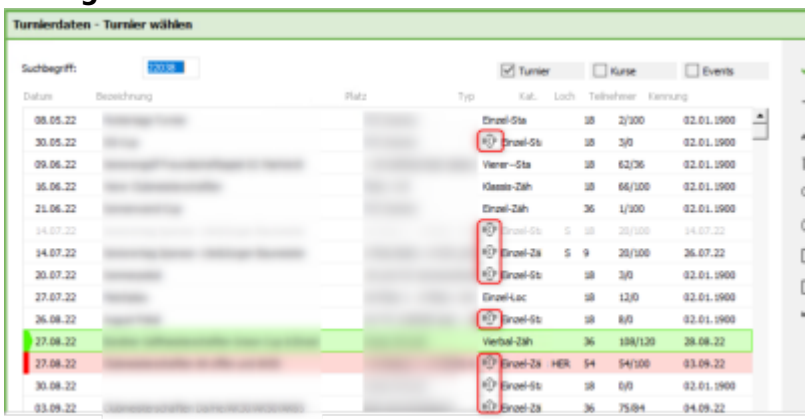

Corrected: Information message that a company cannot be assigned as a contact person led to an error message

November 2022

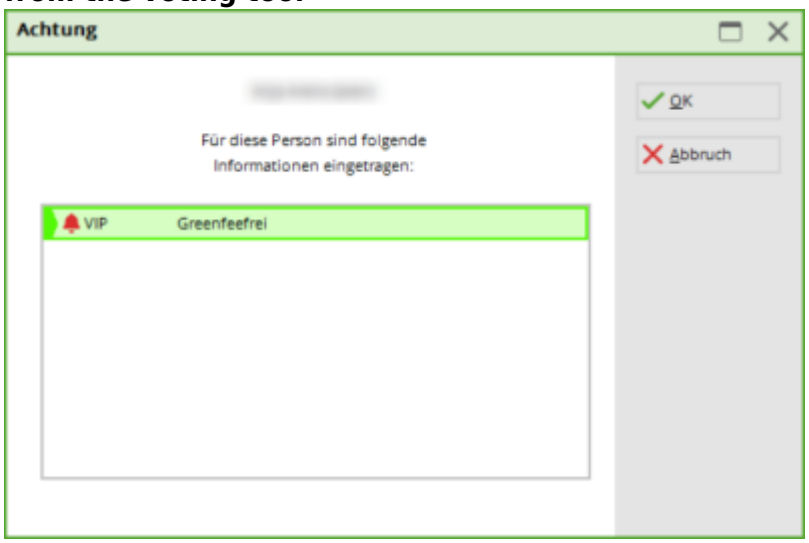

When paying via the checkout, the payment methods are checked more closely:

- Only items with the status „Payment method“ are allowed
- If Fiskaly is active, items are only allowed if the item has the DSFinV-K settings set

Hcp relevance is now displayed in the tournament selection by icon - suggestion from the voting tool

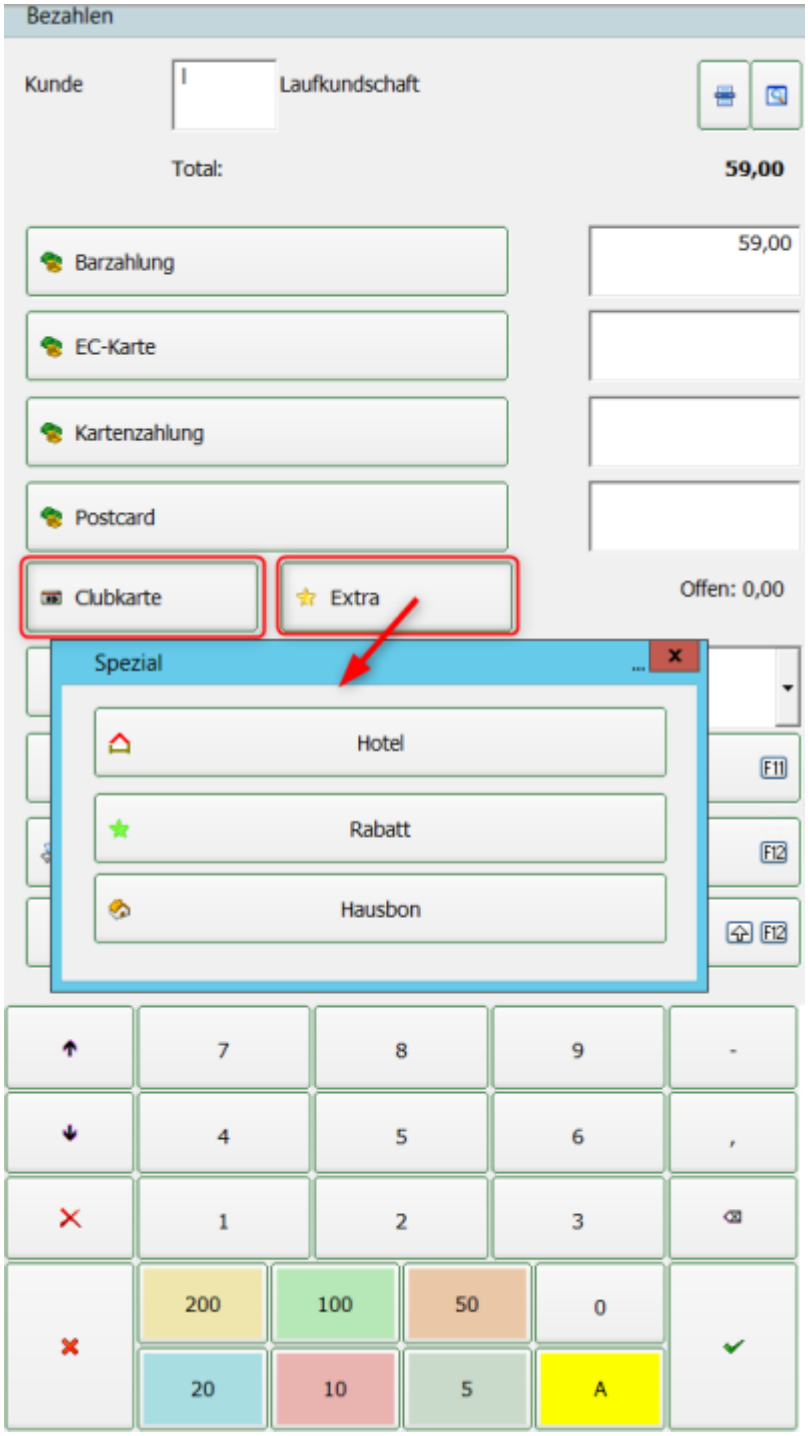

Text „warn:“ is replaced by the alarm icon when the warning is displayed - suggestion from the voting tool

Correction when saving the SEPA mandate date in the player editor

Use article button text on the handheld instead of the article short description; is activated via special parameter

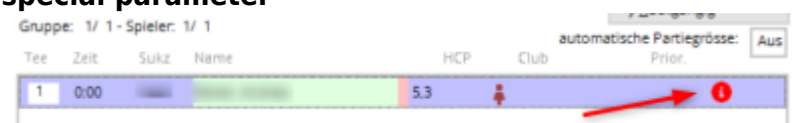

Additional buttons (card/hotel/discount/house voucher) in payment screen also for handhelds; activated via special parameter

Refresh cash register after transfer posting in the OP billing dialogue

Switzerland: Do NOT double par when reimporting a scoring record from Golfbox

Colour icon for info in the start list editor red as soon as info is entered; is activated via special parameter

Correction in the CRM module: Filing attachments could lead to an error

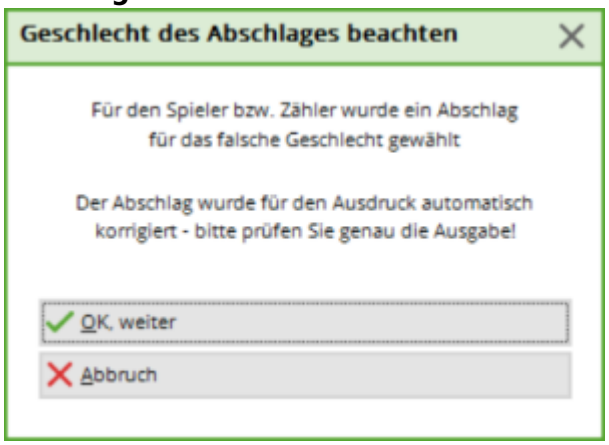

Correction of the „last“ list in the CRM window for certain, less frequent user abbreviations

Hotel: separator for export area overview; a semicolon can now also be selected as a column separator instead of the tabulator

October 2022

Warning if an incorrect tee was selected for RPR (men's tee for a lady and vice versa)

Rapidmail: Delete list with fixed name first and then create a new one

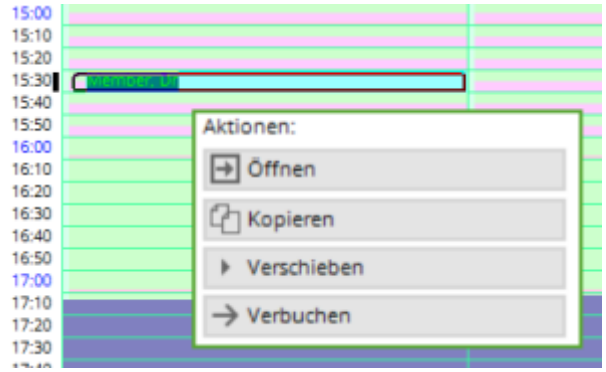

Correction: In some cases, scrolling through the article list could get stuck, this should no longer happen

Luxembourg: Check for duplicate Hcp entries

Removed local path settings

Block open item postings in own account area = Open item postings from the cash register only possible with corresponding open item account area

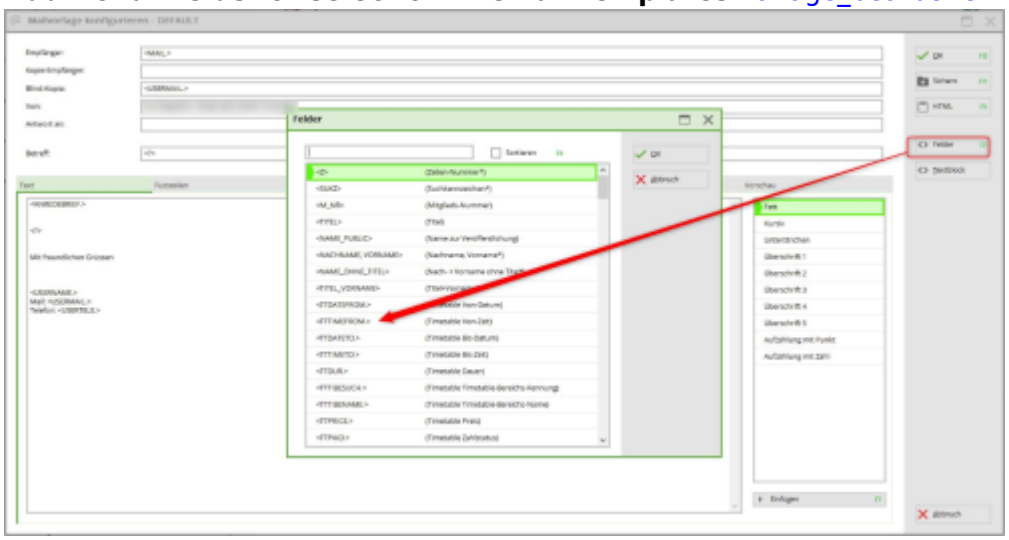

Improvement: Moving and copying postings in the timetable via a context menu after clicking with the right mouse button

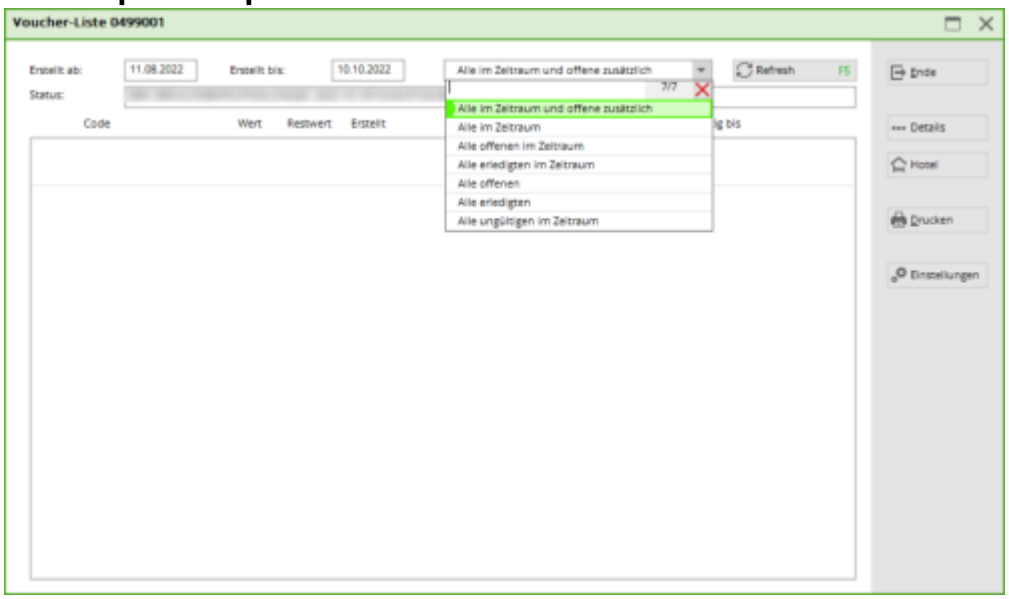

Correction: obsolete special solution for Hcp display 37* in the case of HCPI 36.9

Intranet: To determine the home club status and playing rights, the rating is now based on the real date and without taking into account the advance by X days

Additional fields for selection in email templates vorlage_bearbeiten

Voucher list can now be filtered by open, completed vouchers in a period or independently of the specified period

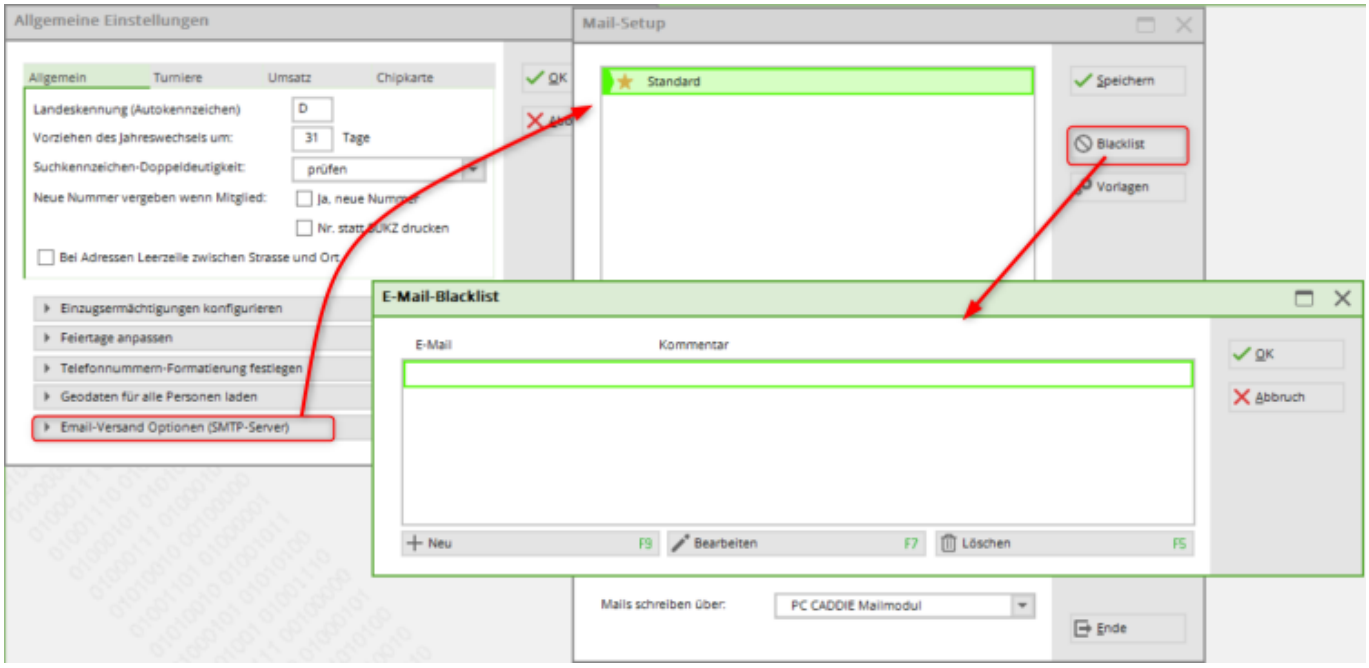

In individual cases, an error message could appear when swapping the partner of four from the buffer to the main list - this has now been corrected

September 2022

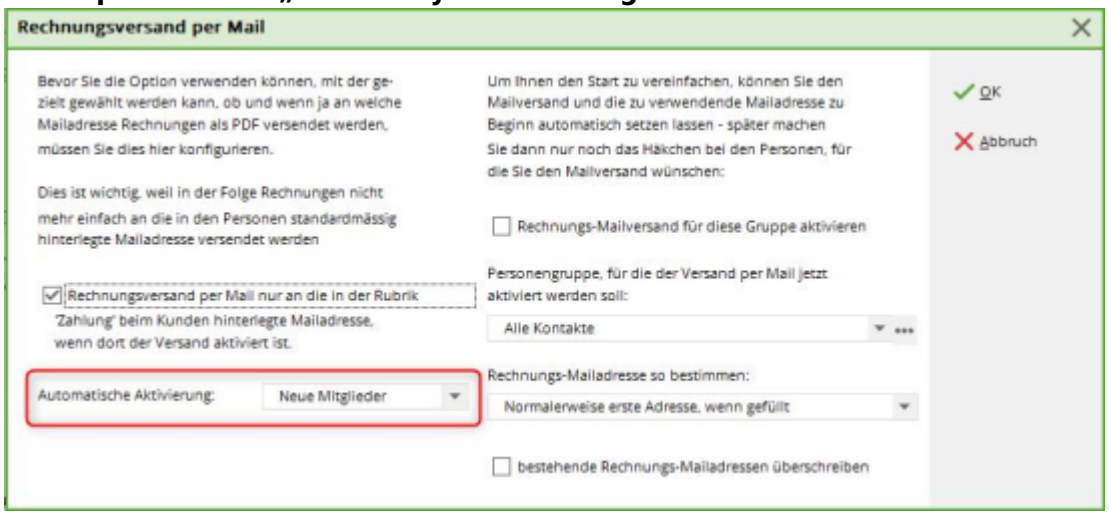

Change to the password management

Mail blacklist of mail addresses (blacklist)

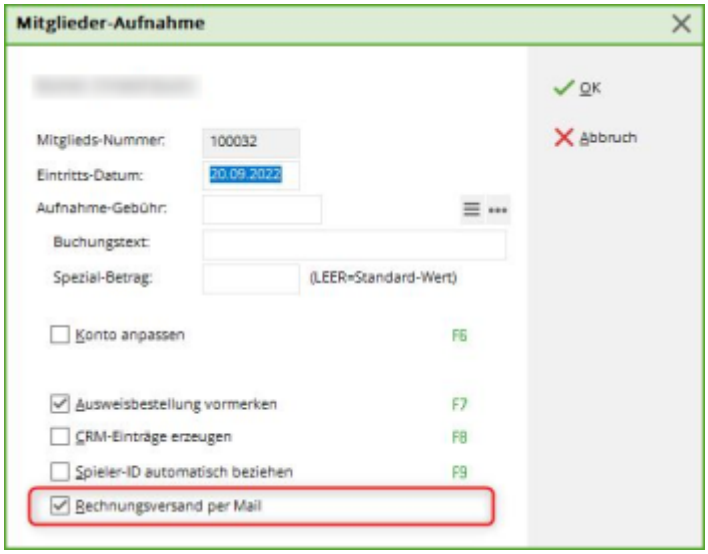

Improvements to the tournament transfer to the Italian intranet

New option in the „Invoice by mail“ dialogue

New option in the member admission dialogue

Send mails with your own Meesage ID

Intranet Austria: Improved handicap display in search results

Correction in the integrated browser

Improvement in address management - the automatic filling in of city and area code can be switched off if required (with special parameters)

Error message intercepted when cancelling in the cash register

Error correction person editor

Always exclude intranet check of company data records

August 2022

Double-click in payment dialogue deactivated

For PCC-online, output the current HCPI value in the transferred scoring record, and no longer the value calculated by PCC

Intercept error message if the information on the QeSC is transferred to the intranet but is not used at all

**New field <XIBAN.> for printing the IBAN from the tournament player information
new field <CHCP> for printing the course HCP in the individual start list layout**

No more notification of membership if the club number belongs to one of the other multi-clubs

24/08/2022 - New version 2022b

Check when incrementing the invoice number („to invoice in account“) - Adjusted so that there is a clear message if the reassignment of a document number fails - the posting

process is then cancelled

Special case of an error message with empty sales statistics corrected

Improvements to the hotel module when used in the network

Switzerland: QR-bill improvements

- IBAN number is printed in blocks of 4 (5×4 group, last character separate)
- Long person/company names are split over two lines

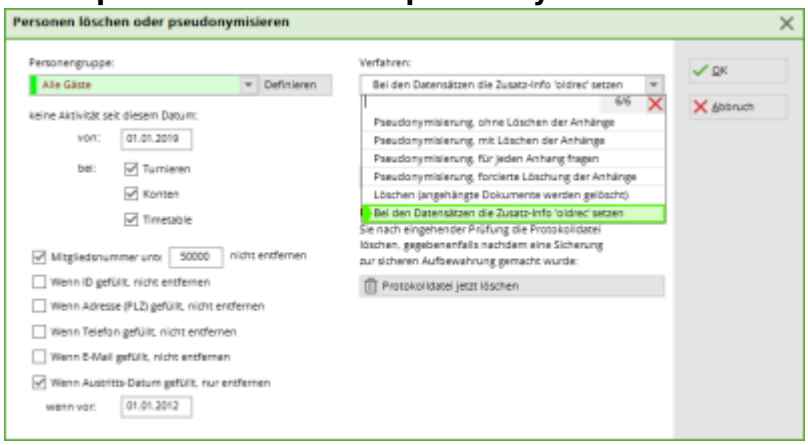

Improvements in the handling of programme errors (error handling)

Correction of tournament copying

Avoidance of hangs with defective parameter files

Correction for bookings via the online portal that persons who did not yet exist locally were not newly created

New option introduced for pseudonymisation function

Standardise course tee information for foursomes

Check Hcp distribution (from counter to scorecard) for foursomes from different tees

Correction that due to rounding errors it was sometimes incorrectly stated that it was not a tax document

Correction for individual Stableford points if the difference remains blank

Correction that the cart booking is only generated after the definitive entry of the first start time and subsequent start time, so that the booking duration of the cart is made depending on the number of holes played (9 or 18 holes).
cartbuchung_online_fuer_9_oder_18_loch

No longer display information on playing rights in the home club for local home members, as this would be duplicated and is usually not filled or updated

Minor improvements hole competition foursomes/singles

- Omit line for foursome line

- Query results next to each other for several rounds in the layout
- Defines used for the counting methods

Improvement in the calculation of public holidays

Correction for player ID query; numbers are now ignored as a function (function in the club) and no longer transmitted to the intranet

July 2022

Improvement in EFT device commissioning - automated search for an EFT device connected to COM

Adjustment of tournament result display at golf.de: Pre-determine display status and then transfer it to the individual records so that it remains uniform in the file

Revision of account settlement (especially hotel) OP settlement dialogue

- OP document no longer worked for transfer postings
- Update total amount; after „REFRESH“ it could lead to incorrect display and after „RELOAD“ it was not necessarily recalculated
- „Toggle activation“ now does what it says
- Also new guaranteed display of the „Turnover“ account when clicking on „Show account“, even if the OP area was still active

Germany: Only send person if there is also a DGV ID for the person (former member is now in a CH/AT club)

Adjustment due to 9-hole result list WHS - for 9-hole competitions it could happen that the title „Result list WHS“ was not displayed correctly and the column with the new Hcpi values did not have a complete name (heading)

Locking for member number adjustment added

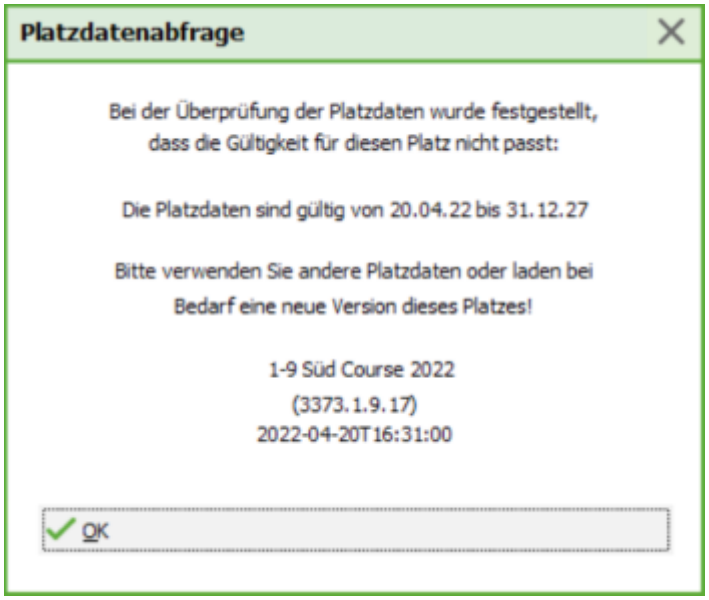

Implement code signing - In future, our programme file (EXE) will be digitally signed

Adjustment so that a new RPR is generated if there is a time difference of more than 60 minutes between the existing RPR and the new print (previously it was 120 minutes)

Correction when posting items with components from the cash register

Austria: Correction when loading tournament registrations from the ÖGV server for newly created guests
In addition, umlaut problem when loading the text info in the registration corrected

Added more information about the pitch data to make it easier to see for which pitch a problem is reported

Print article cancellations again with booking text via the sales statistics (only for new cancellations)

You can enter with or without a colon:

Sales without cancellations:

June 2022

Tournament completion: Selection point changed to „not possible“ for the hole game

Data record change by the member himself - dialogue „Save information“ revised and corrected

- Instead of the „Ignore changes completely“ tick, there is now an „Ignore“ button
- „Ignore“ now sets the CRM entry to „left“

The PC CADDIE TCP/IP cash register interface has been extended by the option to post openly to the account (OP posting)

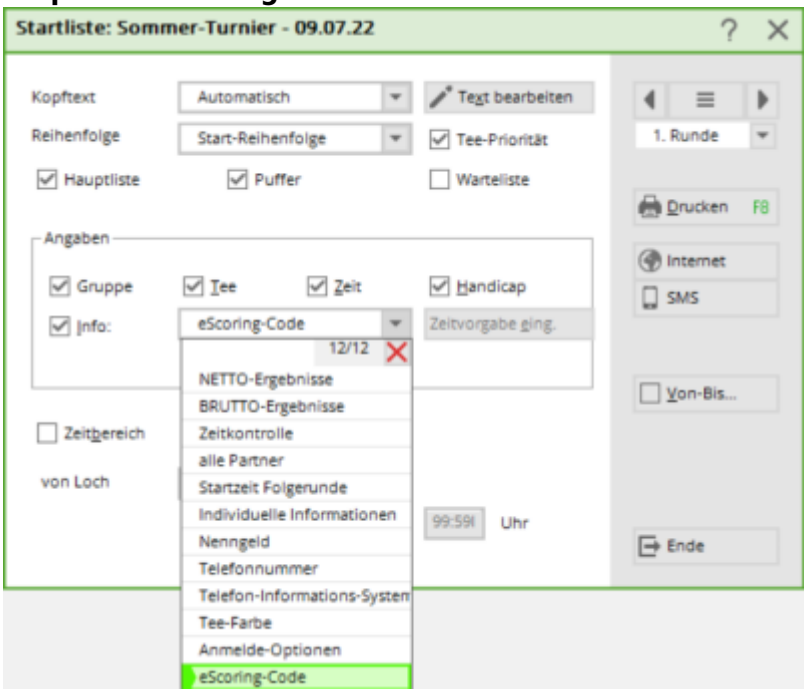

Splitting optimised with regard to special problems relating to the Cash Register Security Ordinance

Customise so that a text behind square brackets is also cut away (dummy timetable booking should become a real data record)

Guest player query: More precise check of the name if the date of birth is not the same (or empty in the query)

Switzerland: Interception if an attempt is made to enter PR via an adjustment

Check output of eScoring code on start list - also new direct info selection „eScoring“ added

Adjustment to ask whether the invoice should be cancelled as soon as the cancellation button is clicked when the invoice is sent by email and the email is processed

Adjustment that subscription counting does not take place for the FG selection in the

checkout, so that you can select redemption items even without a credit balance of the currently active customer

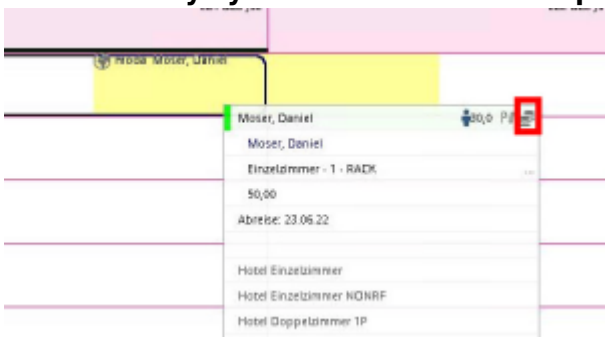

Extended support for payment terminals (EFT) at unattended points of sale (self-service terminals)

Hotel: Protection of the hotel night run against duplicate execution

Hotel: intercepted if arrival date is changed in room mask without room

Hotel: improvements when editing existing hotel bookings - articles/prices of booked days can no longer be changed

Hotel: Money symbol in the timetable popup for hotel bookings with online payment

Hotel: Note the price levels from the timetable's daily info when determining prices

Optimisation of flight sorting for foursomes („sort pairs within the group according to HCP“)

Green fee checkout: Adjustment so that if the surname contains „table“, it does not become „customer“

Swiss intranet: Hcps check for 9-hole EDS card

Swiss Intranet: Interception of club searches for non-affiliated countries (when entering an EDS from abroad)

Sort daily closings in the voting list by date

Course&Event: check current Hcps from local database when loading player list for player export to PCCO

Correction - if a TT booking with subsequent booking is moved in the booking mask via the Date field or via the Time field, the subsequent booking is now moved as well

Team scoring „Viennese waltz“ backwards
This special parameter reverses the Viennese waltz: TUTE_TEAMWWR

Realisation of individual input of a Playing Hcp playing_handicap_manuell_anpassen

Adjustment of tournament conclusion in details regarding Hcpi relevance if the rounds have different forms of play (foursome / singles)

May 2022

Correction - if you want the price class division by starting Hcp for foursomes, the halved 9-hole value is now used for 9-hole rounds

Adjustments in connection with PCC-online

- New search for free timeslots, e.g. within the next 30 minutes, possible in the member SB check-in.
- Display matchplay tree tick only after more than one round
- eScoring codes are no longer sent with result SMS.

Improvement in the display of e-scoring codes

April 2022

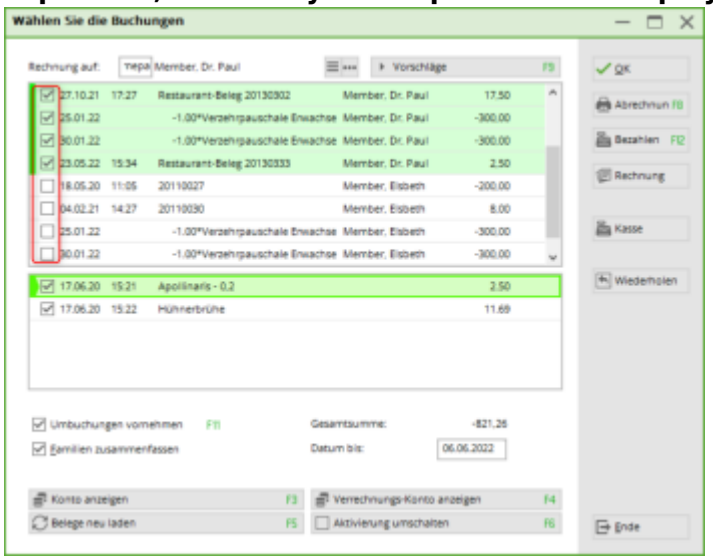

Caught - XML validation error when player is in buffer and sent to QeSC

Adjustment that eScoring code is also easily visible to the marker

Problems with the column width in versions from 14.4. to 26.4. - was corrected with an update on 27.4.

Security measures when changing the number of items in the checkout

Correction - family summary for cash account posting; for „separate invoice“ and „all separate“, the family's receipts are also displayed, but are not marked

Correction - various error messages intercepted

Adjustments so that subscription bookings go through during online check-in

Also check timetable filter with active warning (tick) for collisions; e.g. for tournament cart bookings

Information on remaining time and automatic shutdown of Trackman

Swiss intranet: Adjustments to corrections made by GolfBox in relation to player synchronisation from Germany and Austria

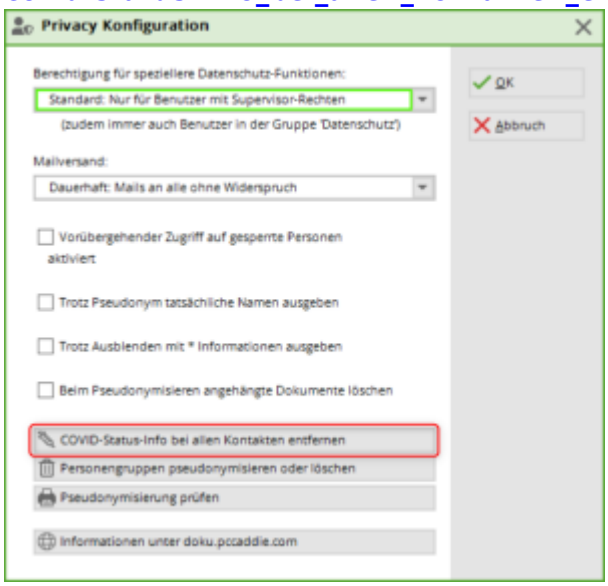

Correction - Adjustment of customer number no longer worked in the accounts since versions from 28.3.

Improvements when cancelling a subscription article

CRM category improvements:

- Short ID is locked for editing
- Internally used categories can no longer be deleted

Delete function for vaccination status information integrated into the privacy dialogue covid-status-info_bei_allen_kontakten_entfernen

Interface to Players1st - enables definition of the group of people to be transferred

Optimisation of the electronic score via the app for four-man scrambles; only one code is generated for the team, which must be accepted by all players

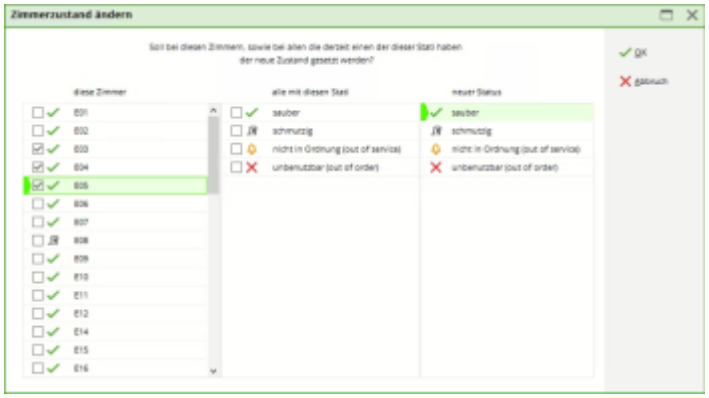

Accounting export: collective posting summarised not only per G/L account and customer, but also per day Can be activated if required

Correction when cancelling open item documents; it has also been added that the cancellations are better marked with „Cancellation:“ in the account and on invoices

March 2022

Hotel: Correction for cash register invoices with combined articles from external areas (catering etc.)

Hotel: set several selected rooms to clean

Optimisation of automatic daily closing with cash register numbers

minor corrections to the player editor

Timetable: More information when deleting/deactivating a booking option; Now it is displayed what exactly an option (which carts) was booked option_a_b_c

Cash register: Show warnings and birthdays again if the person is already in the cash register (after more than 5 minutes of not working with the person) - can be activated via special parameter

Extension of the regionality display in the cash register (see January 2022) to the person selection list and timetable pop-up (can be switched off if required)

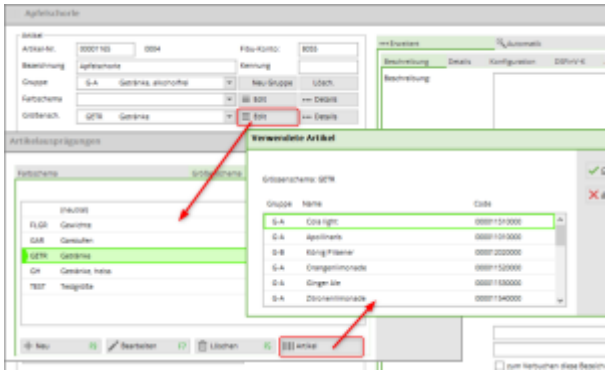

Can be activated if required: Saving till receipts in CRM when booking to a person and printing to a Windows printer (A4)

Correction when transferring results to SwissGolf if no scoring record is available

Correction for tournament import from the DGV intranet

Correction for billing of composite articles with adjusted prices

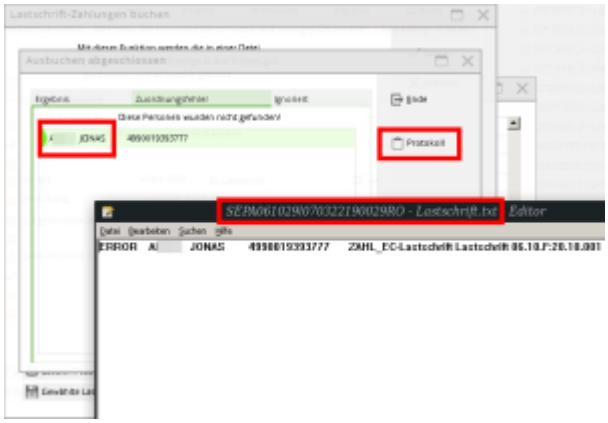

Correction for quick editing of colours in the selection mask for FG combinations
The previous button to the right of the colour/size is now called „Edit“ and opens a new window „Article characteristics“. Here you can see all colour/size schemes, edit them, create new ones (delete them) and - brand new - see in which articles they are currently used.

Default to „All operators“ for operator billing for „normal“ tills (not for catering tills)

SEPA write-off

- New error list with clear names; previously only the member code was visible
- New is also the button on the right that opens the (new) log file
- However, if no error occurred at all, there is neither the log file nor the button on the right

Switzerland: Website links - "https://" remove when sending to Golfbox

Switzerland: Some adjustments when synchronising the course data - HCP distribution is entered at the association and loaded with the course data from the intranet besonderheiten_schweiz

Correction of a very specific problem when converting subscriptions from old to new subscriptions

Adjustment of icons in the account and cash register view - direct debit icon has been

changed

February 2022

Mailing from PC CADDIE: The mail option „Sending via HTTP service“ has been removed

GBE also calculates correctly on result notification circulars

Turnover statistics - Catch purchase price errors for contribution account areas - It is now pointed out that there can be no calculations with purchase prices for contribution account areas

In timetable views, switch to the area by double-clicking on the column title

Adjustment that you can also hide the contact characteristics 2-4 for issues

Improvement of the automatic write-off of daily reservations (if the identifier of the TT area is shorter than four characters)

In the tournament list, you can now also search by date and by name components turniere_suchen

With the PCCADDIEonline module „online payment“, guest players can now also buy card credit for the ball machine. Please check your card settings before activation vorschlag_fuer_gaeste

Transfer unrounded Playing Hcp to PCConline with decimal place if necessary

Adjustment so that a player with a maximum score with a copurse HCP of ZERO also receives the maximum number of strokes on the scorecard

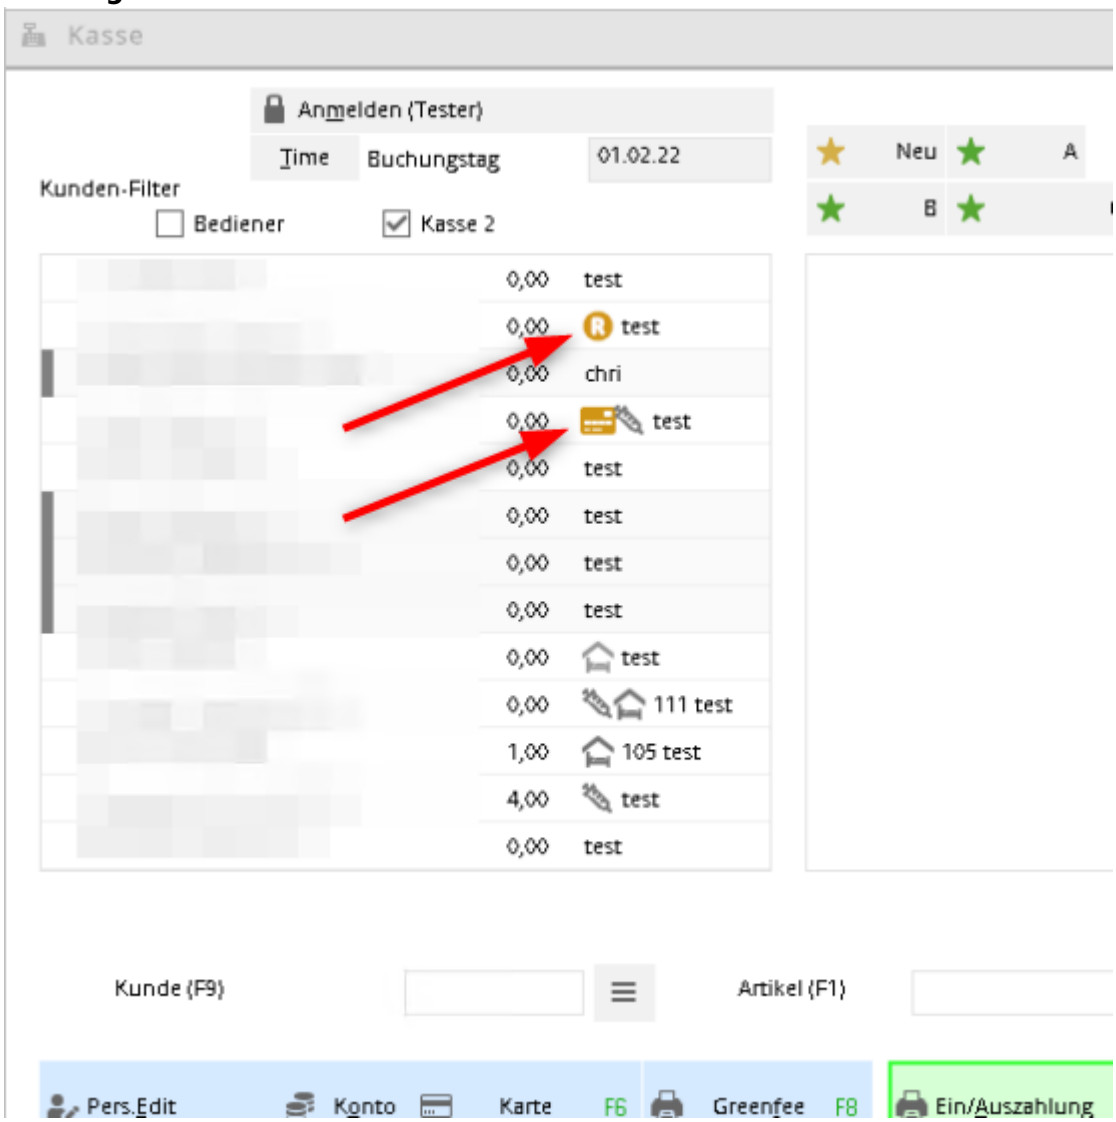

January 2022

Accounting export Switzerland: Adjustment Abacus export due to QR reference payment slip

Do not apply timetable rules for breaks, blocks and filters

Covid status is displayed in the checkout, can be activated by ticking the box in the Covid settings covid-status-dialog

Voting tool - wish fulfilled: regionality labelling can be displayed in the checkout in Germany
Improvement for our golf group tool: Premium membership status can now be displayed with a gold card in the checkout

The posting of composite articles to components has been improved with regard to fiscalisation in Germany - therefore a current update from 28 January 2022 is very important for cash register customers!

Changelog 2021

December 2021

Catch error message when entering three commas in the search field for contacts

Adaptation of SelfserviceTerminal to current association specifications (Germany) - entry „HCP master sheet“ is hidden in the configuration

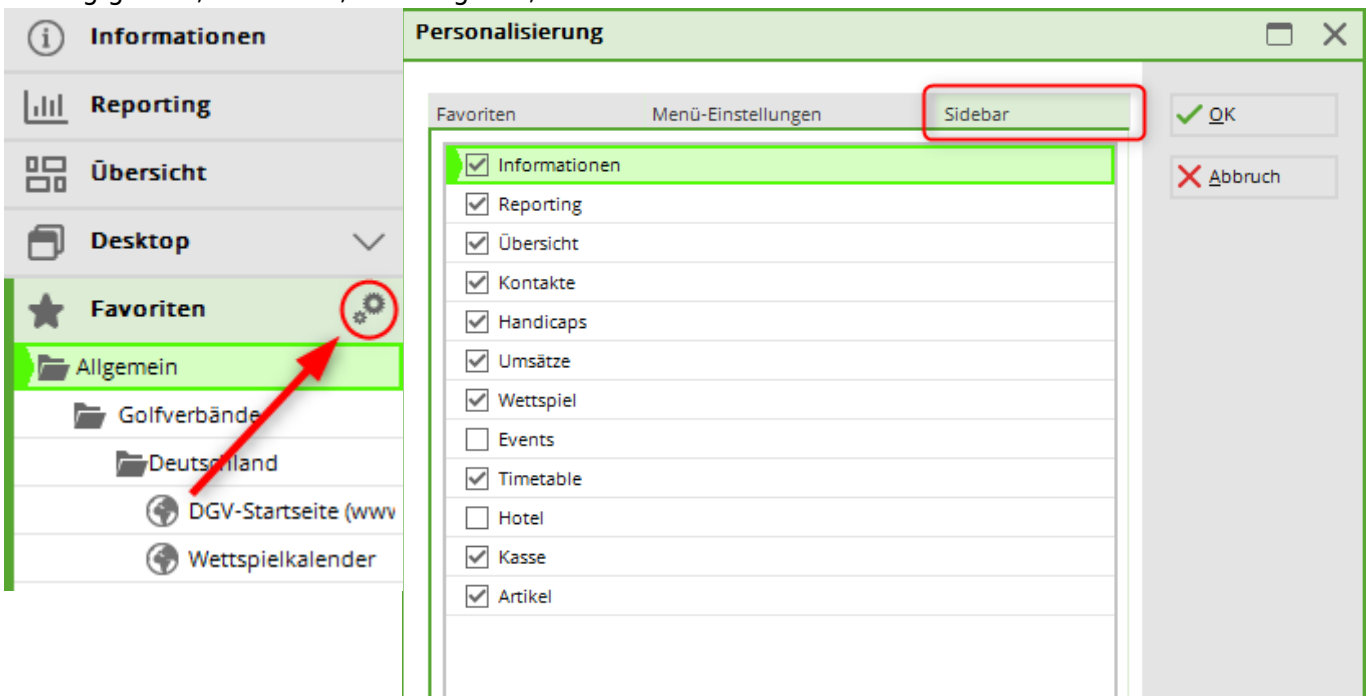

Improvement when printing the entry list for 2-person scrambles

Vaccination status for online bookings

- The local check status is cancelled if the basic status (online) is changed
- Covid status is only overwritten locally if the online date is newer; i.e. old information COVID:V.20210605 no longer overwrites the newer local information COVID:B:20211128 (booster was entered locally)

Hotel - Room reservations via the Chanel Manager no longer change the gender of the contact to „Divers“ in PCCADDIE

Sidebar topics selectable
The user can now click on the cogwheel at the „Favourites“ button on the left in PC CADDIE and show or hide the buttons according to preference in the third tab. Buttons: Contacts, handicaps, turnover, betting games, timetable, cash register, articles etc.

Competitions - header text for announcement (and entry, start and result list) - additional fields for individual text

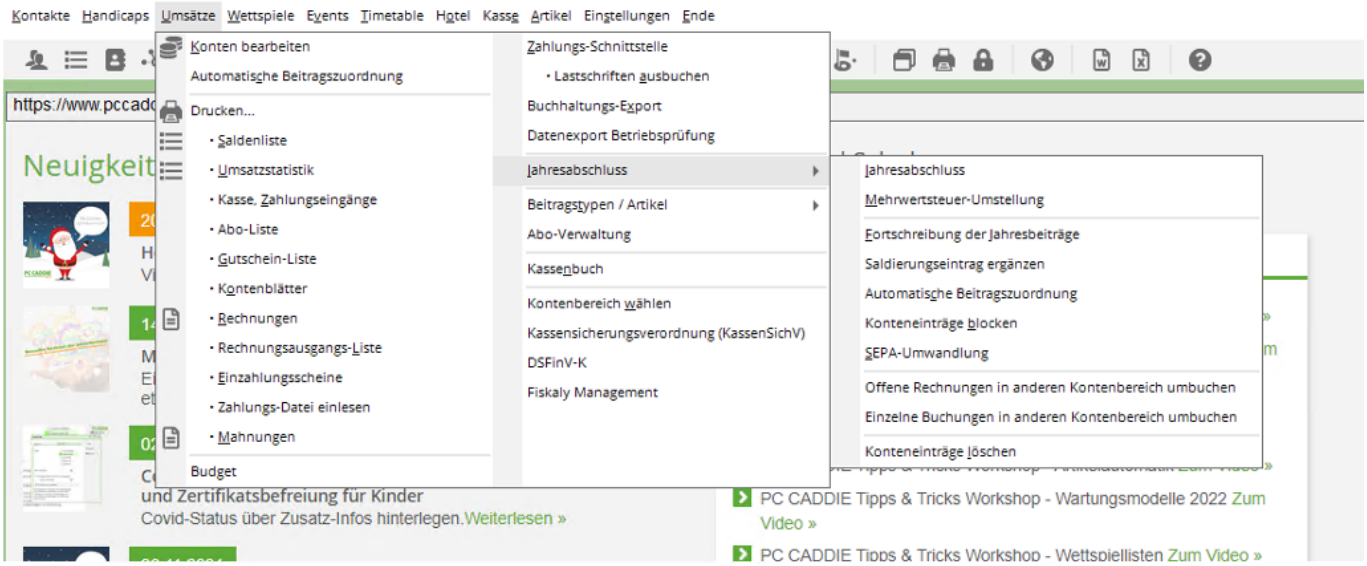

- <TURNSTR1> Type of game (with counting method) and number of holes
- <TURNSTR2> HCP-relevant
- <STROKEMAX> Highest score

Import data from other programmes - the „Payment method“ field can now be imported

The check as to whether the person is a member for a future order in the ID card year now runs until 31 January (previously 01 January)

Accounts: Change the account area (between sales and OP account area) by double-clicking on the transfer posting

Main menu is cancelled if it does not fit on the screen

Internal: Fiskaly invoices - check automatically

November 2021

Betting game, course and event list - all three ticked by default via special parameters

Adjustment of the position of the player buffer window

Gastro cash register; correction of the OP invoice in relation to split articles

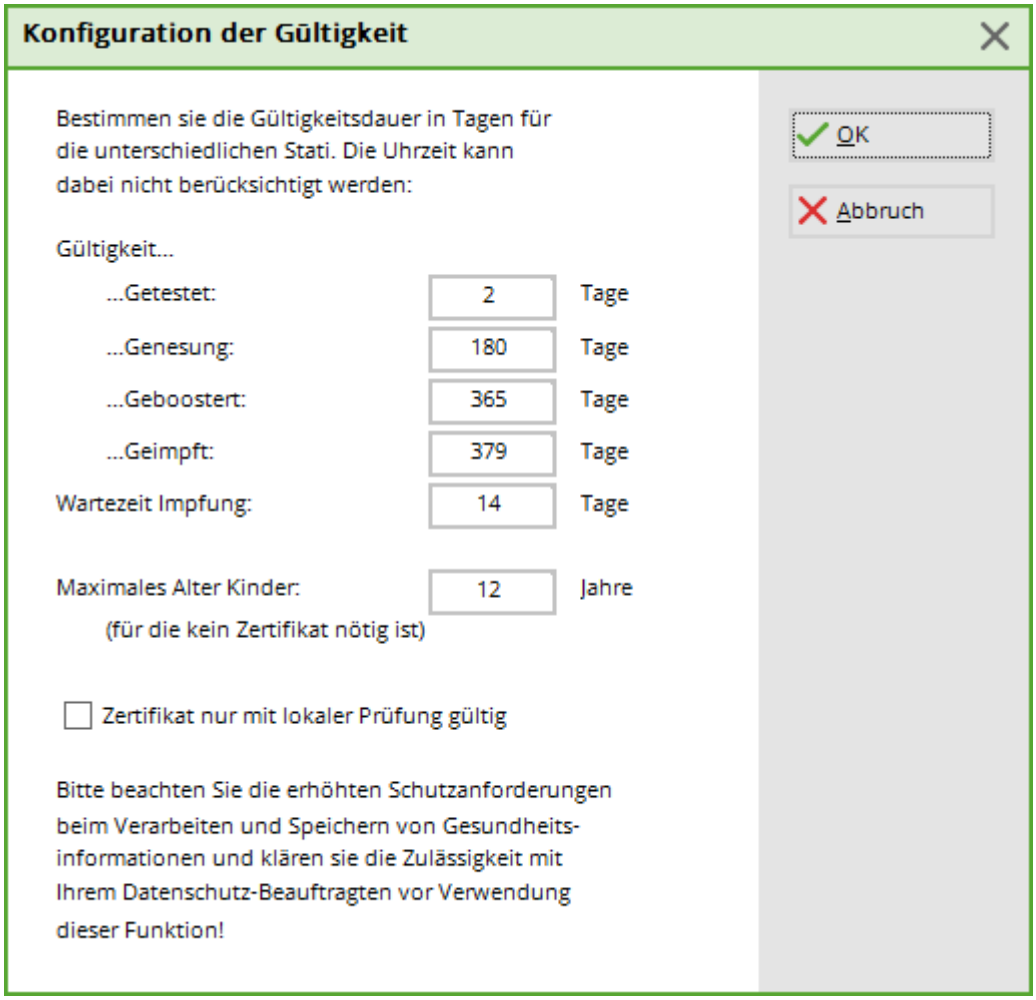

Adjustment of the HCPI transmission to the DGV for RPR

Activation of the AHR in Switzerland

Colour adjustment of TimeTable bookings when booking green fees via the cash register, even when the hotel TimeTable is active

New icons in the Business Edition

For Germany only: Booster status added and certificate exemption for children

Correction CR calculation for multi-round tournament with mixed counting game/stableford and manual play-off

Scoring record can be queried in the PCConline app in Luxembourg, Liechtenstein and Switzerland

Preparations for improvements for time-critical file accesses

Switzerland - Improvements to the review and display of the scoring record

- After sending the adjustment, the scoring record is completely reloaded so that the display in the Hcp history is correct immediately
- the Hcp was saved directly in the adjustment record, as otherwise the previous Hcp could be displayed as the current Hcp in PC CADDIE
- the adjustments are now listed individually in the scoring record so that the review adjustments can be recognised more easily
- The screen display and printout have been adjusted so that the oldest round in the scoring record is marked in red and with „<ignore> «“

<ignore><ignore>**</ignore></ignore>Implementation of GreenBill in the PC CADDIE POS systems<ignore><ignore>**</ignore></ignore>

<ignore>=====</ignore> October 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>Optimisations for data exchange with PC CADDIE-

<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>Text filter analogue to extensive timetable statistics<ignore><ignore>**</ignore></ignore><ignore><ignore>\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>Optimisation for eclectic tournaments if these are to be played over rounds with fewer than 18 holes each (blind hole)<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Correction of the display of handheld splits<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Warning during accounting export if you have activated combine families AND family transfers<ignore><ignore>**</ignore></ignore><ignore><ignore>\\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore><ignore>****</ignore> For Germany only: Warning when using <ignore><ignore>*</ignore></ignore>*Handicaps/Printing/…RPR*<ignore><ignore>*</ignore></ignore> a club number (course data) is entered that does not begin with 49<ignore><ignore>**</ignore></ignore><ignore><ignore>\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>RPR - Improvement of place information when entering results hole by hole<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Scorecards for foursomes matches optimised - commands for 2nd player lengths (also 3rd and 4th) implemented<ignore><ignore>**</ignore></ignore></ignore><ignore><ignore>\</ignore></ignore> <ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>WHS - Adjustment for 9-hole entry in the master sheet (RPR) in Austria - add 18 points (instead of 17 points as per EGA in the WHS)<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Coloured identifier with active special filtering in a person filter<ignore><ignore>**</ignore></ignore><ignore><ignore>\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>Hotel: Display of availability in the timetable below the date<ignore><ignore>**</ignore></ignore>

- as „daily info“
- Can be activated under Hotel / Settings / Room categories / Show availability in timetable

<ignore></ignore></ignore><ignore></ignore>

<ignore></ignore>

<ignore><ignore>\\</ignore></ignore>

<ignore>=====</ignore> September 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>Adjustability of COVID status via the person additional info and new fields for printouts regarding COVID status<ignore><ignore>**</ignore></ignore>

- <ignore></ignore></ignore><ignore></ignore>
- <COVID></ignore> <ignore>=</ignore» only prints „OK“ if the status is correct
- <ignore><COVIDI></ignore> <ignore>=</ignore» prints a little more information about the status

<ignore><ignore>**</ignore></ignore>Adjustments in timetable rules - timetable filter with new options<ignore><ignore>**</ignore></ignore><ignore><ignore>\\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>Correction of the receipt for 100% discount<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Optimisations for new database access in the tournament editor<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Interface Belgian Intranet - Adjustments to current interface definition<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Optimisation when saving inventory values - unrealistic values are intercepted instead of error message<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Selection window regarding Hcp distribution for RPR scorecards<ignore><ignore>**</ignore></ignore><ignore><ignore>\</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore>Correction for foreign result entry - check time formatting for Hcp result entry<ignore><ignore>**</ignore></ignore>

<ignore>=====</ignore> August 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>Scorecard printing<ignore><ignore>**</ignore></ignore>

- Correction of the counter lines for 9 holes

<ignore><ignore>**</ignore></ignore>Hotel - room lists<ignore><ignore>**</ignore></ignore>

- In the hotel module, various lists can now be printed directly from the menu, e.g. the departure and arrival list. Lists for catering or housekeeping can also be printed. Once the lists have been set up correctly and possibly configured with a customised print template, these lists can be produced even faster

<ignore></ignore>

<ignore><ignore></ignore></ignore>**Extension of receipt priorities up to 9 and X, Y, Z<ignore><ignore></ignore></ignore>**

<ignore><ignore></ignore></ignore>**Improvement in voucher management<ignore><ignore></ignore></ignore>**

- Validity date is also on the voucher list
- Expired vouchers are hidden in the checkout 31 days after the expiry date - can be skipped; hold down Shift when calling up the redemption item
- (expired) promo vouchers can be redeemed without prior article booking - when redeeming, enter a value less than 1 but greater than 0; e.g. 0.10

<ignore></ignore></ignore><ignore></ignore>

<ignore>======</ignore> July 2021 <ignore>======</ignore>

<ignore><ignore></ignore></ignore>**Result entry<ignore><ignore></ignore></ignore>**

- The counting of the recorded results for the corresponding result input has been corrected

<ignore><ignore></ignore></ignore>**eScoring - Codes and player selection<ignore><ignore></ignore></ignore>**

- Corresponding icons have been implemented for the game selection in eScoring. The eScoring codes can also be saved and displayed.

<ignore><ignore></ignore></ignore>**Four-ball tournaments<ignore><ignore></ignore></ignore>**

- Numerous improvements have been made here, such as the improvement of the Hcp lower limit and the adjustment that the HCP effectiveness is checked round by round in the scorecards

<ignore><ignore></ignore></ignore> **9-hole Hcp check during score entry<ignore><ignore></ignore></ignore>**

- the number of holes is now already suggested based on the course selection
- 9-hole stroke count on the first 9 holes is the ABrounded half of the courseHcp
- Limitation to par+5 for AGS
- AGS for 9 holes should now also be correct when entering

<ignore><ignore></ignore></ignore>**Course rating and par compensation<ignore><ignore></ignore></ignore>**

- The processing of the course rating has been further improved so that the par and CR equalisation is correct. Especially as „half“ rating values are used for 9-hole competitions.

<ignore><ignore></ignore></ignore>**Scorecard printing from the timetable for 9-hole courses with WHS course data<ignore><ignore></ignore></ignore>**

- the description can be found <ignore></ignore></ignore>here<ignore></ignore>

<ignore><ignore>**</ignore></ignore>online reporting list - sorting<ignore><ignore>**</ignore></ignore>

- The default value for the sorting of the online message list can be easily defined using special parameters. It can be sorted alphabetically, by HCP, by teams or by time of entry

<ignore><ignore>**</ignore></ignore>Correction in relation to 9-hole rating and RPR<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Status Pro<ignore><ignore>**</ignore></ignore>

- It is possible to calculate the Pro specifically via a special parameter.

TUUT_PRO_NOHCP_FILTER<ignore><ignore>\\</ignore></ignore> <ignore>=</ignore» Pros are listed with the filter „Pro to Pro“ or „Pro to Hcp X“, but not with a filter „0 to 20“, even if they have Hcp 10.

TUUT_PRO_NOHCP_NET<ignore><ignore>\\</ignore></ignore> <ignore>=</ignore» a pro who also has the identifier „pronohcp“ in the additional info is counted in the net as before without Hcp, even if he has an Hcp.<ignore><ignore>\\</ignore></ignore> <ignore>=</ignore» For the calculation of the AGS for handicapping, however, the „real“ index is of course always used.<ignore><ignore>\\</ignore></ignore> <ignore>=</ignore» The players with the additional info are also filtered as pros when filtering within price categories as above.

<ignore><ignore>\\</ignore></ignore>

<ignore>=====</ignore> June 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>Scorecard<ignore><ignore>**</ignore></ignore>

- Adjustments to the course data format, assignment of tees and security features for optimal scorecard printing

<ignore><ignore>**</ignore></ignore>Zoom and horizontal scrolling with mouse wheel in the TimeTable<ignore><ignore>**</ignore></ignore>

- with ctrl/ctrl + shift pressed, you can zoom horizontally with the mouse wheel
- with ctrl/ctrl pressed, you can zoom vertically with the mouse wheel
- with shift pressed, you can scroll horizontally with the mouse wheel

<ignore><ignore>**</ignore></ignore>Tournaments - Course details<ignore><ignore>**</ignore></ignore>

- The tabulation of course information has been further improved in combination with manual tees

<ignore><ignore>**</ignore></ignore>Handicap limits and playing handicap for the Capman foursome<ignore><ignore>**</ignore></ignore>

- The display and setting of handicap limits in the tournament have been revised. There were also previously problems if you set a limit to the common HCP in foursomes. These have now been solved

<ignore><ignore>**</ignore></ignore>Correction in the subscription takeover function<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Covid - Save vaccination and recovery status<ignore><ignore>**</ignore></ignore>

- Players can save their vaccination and recovery status in the app under „My settings“. There, players can also decide whether they want to pass this information on to the club when making a booking and whether the status should be displayed to other PC CADDIE online users. In the Club Manager under „Teetimes“, you as the golf course decide whether you want to receive this information at all when making a booking and whether it should generally be displayed in the online timetable. If you transfer this information to your local PC CADDIE for bookings, you can use it in timetable rules, for example

<ignore><ignore>\\</ignore></ignore>

<ignore>=====</ignore> May 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore><ignore><ignore>*</ignore></ignore>WHS<ignore>*</ignore></ignore></ignore><ignore><ignore>**</ignore></ignore>

- add 18 points for 9-hole results in Austria (instead of 17 points according to EGA in WHS)
- DQA and DQO the text was swapped
- optimised for NRO
- Omission of the exclamation mark for incomplete results with NR or DQ; instead two letters after the result

<ignore><ignore>**</ignore></ignore>Limit of the course HCP to 54<ignore><ignore>**</ignore></ignore>

- The course handicap limit of 54 applies to the calculation of the „Adjusted Gross Score“ or the „Weighted Gross Score“. This also only applies to the calculation of the AGS/GBE! You can find an example <ignore><ignore></ignore></ignore>Here<ignore></ignore>

<ignore><ignore>**</ignore></ignore>Loading the 9 hole course data<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>New members and handicap guide<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Discounts for the PRO<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Adjustments regarding GBE and WBE in DS_MATCH_RESULT<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Automatic pricing<ignore><ignore>**</ignore></ignore>

- The filter rules have been optimised - skip subarticle „0000“ when filtering the colour-size suggestions

<ignore><ignore>**</ignore></ignore>Improvement of the configuration of article

individualisation<ignore><ignore></ignore></ignore>

<ignore><ignore>**</ignore></ignore>Checkout - Switch off the automatic index check when opening<ignore><ignore>**</ignore></ignore>

- The index check is no longer active by default. This can only be activated with the CASH_INDEXCHECK

<ignore><ignore>\\</ignore></ignore>

<ignore><ignore>\\</ignore></ignore> <ignore>=====</ignore> April 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>Matches in the WHS - Corrections<ignore><ignore>**</ignore></ignore>

- Calculation four-ball tournaments
- Playing Hcp in foursomes over 9 holes
- Specifications for 9 hole competitions
- Result list, calculation of adjusted cross score for HCPI 54

<ignore><ignore>**</ignore></ignore>Starting time booking - cancellation email to member<ignore><ignore>**</ignore></ignore>

- Members receive a confirmation email when they cancel their start time. Using a special parameter (and with the PCC online timetable module), you have the option of sending emails to the selected flight via an inform button in the timetable and thus informing them of a cancellation by the club.

<ignore><ignore>**</ignore></ignore>Automatic contribution - setting a playing rights filter<ignore><ignore>**</ignore></ignore>

- Correction and adjustment of the playing rights filter, according to which different variants can be selected. No playing rights, full playing rights, general playing rights and only with gold logo can be selected

<ignore><ignore>**</ignore></ignore>Automatic mails - birthday greetings<ignore><ignore>**</ignore></ignore>

- in the new Business Edition and with existing PCC Mail module, automatic birthday mails can be generated in the menu item „Contacts/Automatic mails“

<ignore><ignore>**</ignore></ignore>Invoice printing - single PDF print<ignore><ignore>**</ignore></ignore>

- In order to print individual invoices, e.g. monthly invoices that should not appear together in one document, it is possible to output them via data export operational check. See <ignore><ignore></ignore></ignore>here<ignore></ignore>

<ignore><ignore>\\</ignore></ignore>

<ignore>=====</ignore> March 2021 <ignore>=====</ignore>

<ignore><ignore>**</ignore></ignore>WHS:<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Exchange of various terms<ignore><ignore>**</ignore></ignore>

- obsolete terms that are no longer used with the introduction of the WHS such as „Spielvorgabe“ or „Stammvorgabe“ were also updated according to their abbreviations in the free text elements according to WHS when printing scorecards and can thus be printed

<ignore><ignore>**</ignore></ignore>as well as switching off the old HCP calculation routine, correcting the master sheet printout in Switzerland, uploading the language database, checking and correcting the price category classification for foursomes <ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Article management - setting colour scheme<ignore><ignore>**</ignore></ignore>

- An individual colour scheme or colour designations can be created for articles according to size gradations

<ignore><ignore>**</ignore></ignore>Adjust SALDKONT dialogue and query account for deposit in the cash register<ignore><ignore>**</ignore></ignore>
<ignore></ignore></ignore><ignore></ignore>

<ignore><ignore>**</ignore></ignore> Postcode country codes<ignore><ignore>**</ignore></ignore>

- With the implemented improvement, it is possible to enter special country designations manually. If you leave the field empty, the country will be printed according to the text in the combo box above. If you enter „Special“, you can enter anything for countries that are not in the list. When entering a postcode with country code, the query appears automatically, otherwise you can also make these adjustments by clicking on the geo-sphere next to the city

<ignore><ignore>**</ignore></ignore>Sum several identical items on invoice (monthly)<ignore><ignore>**</ignore></ignore>

- With this implementation, the distribution of individual articles over several months now also works

<ignore><ignore>**</ignore></ignore>Invoice - contribution with different FIBU accounts<ignore><ignore>**</ignore></ignore>

- Summing up different contributions with different FIBU accounts for annual invoices, for example → see <ignore><ignore></ignore></ignore>Artikel</ignore> auf Rechnung Summieren<ignore></ignore> und <ignore><ignore></ignore></ignore>Contribution with components<ignore></ignore>

<ignore><ignore>**</ignore></ignore>Subscription - Change the order of the article check in the checkout<ignore><ignore>**</ignore></ignore>

- Subscriptions can be posted without a business transaction after the basic admissibility has been checked with BeitActive(). Subscriptions are then posted

<ignore><ignore>**</ignore></ignore>QeSC - Retrieve scores corrected<ignore><ignore>**</ignore></ignore>

<ignore><ignore>**</ignore></ignore>Cash register - permanent receipt notes through additional customer information<ignore><ignore>**</ignore></ignore>

- In many cases, permanent notes should be printed on the receipts for the customer - especially in Gasto - e.g. intolerances etc. These can be printed via any additional information. These can be printed via any additional information:

1. Define additional personal field (one of the 8 with 20 characters, for example)
2. Remember the name of the field! (e.g. comment GA)
3. Insert the field in the receipt where you want it:

<ignore><note GA></ignore>

<ignore><ignore>**</ignore></ignore>Goods management - warning regarding missing business transactions<ignore><ignore>**</ignore></ignore>

- If business transactions are missing, a warning is automatically issued when they are entered and you can set this to „Sales“ immediately
