

Update information 2016

IT changes due to association requirements

 Switzerland

 Germany

 Austria

 Luxembourg

IT changes due to new developments and functional improvements

(as at 15/04/2016)

The following list contains all PC CADDIE programming that we have developed for the PC CADDIE annual update 2016 based on your improvement requests from 2015 and that we are making available as part of your maintenance contract.

Customer management

Module/Function	Brief description	
E-mail dispatch	In the PC CADDIE mailing system, different e-mail templates can now be saved ' Mail templates can now be saved in the PC CADDIE mailing system, for example for sending invoices, enquiries from interested parties or similar. ' PC CADDIE e-mail complete description	D/CH/A/LU/
Club lists	If you want to print a list for a specific country, you can enter „49“ in the LGV and you will receive the list for Germany (similar to „43“ for Austria or „41“ for Switzerland, etc.). ' Club list	D/CH/A/LU
Data fields	When you enter the leaving date, new reasons for leaving are suggested, e.g. „moving away“. ' Groups of persons can be filtered according to the new reason for leaving and lists of persons can be printed with the new „Reason for leaving“ field. Further reasons for leaving can be added individually!	D/CH/A/LU
	New date logic for all ' Date fields .	D/CH/A/LU
	When copying and pasting e-mail addresses, any useless special characters are filtered out so that the data field is filled correctly.	D/CH/A/LU
	For the mail merge export, the key numbers that are managed in the caddie box and locker management are now also output, for example for locker information to tenants. ' Export	D/CH/A/LU

Module/Function	Brief description	
	About the new CRM category <i>ALINK</i> you can use PC CADDIE ' customer data records with each other in a meaningful way . For example, if a hotel is a green fee voucher customer for you, but the owner in person is actually a member, ALINK can be used to create an informative link, despite administrative separation. ' PC CADDIE CRM\DMS Full description	D/CH/A/LU
WebSMS	There is a new option in SMS dispatch to send a single or serial SMS later at a desired time (date/time). ' Appointment SMS	D/CH/A/LU
Design documents	Development of a graphics editor for the independent creation of letter and invoice layouts, caddie box plans, table plans, room plans, etc. ' Graphic editor	D/CH/A/LU

Handicap management

Module/Function	Brief description	
Course handicap	Due to the extension to handicap class 6 and the associated elimination of the club handicap, the master sheet is becoming more important again as a course handicap document: ' Enter the handicap . If a player with a course licence (PR) takes part in competitions, please pay particular attention to the ' Handicap limits of the tees	D/CH/LU
EDS result input	Already well known at the competitions: you can now also have the ' EDS results read out .	D/CH/LU
	Also for an ' EDS round penalty strokes can now also be entered.	D/CH/LU
Download master sheet	If you would like to download the ' master sheet from the previous home club for new members via the intranet , the list of all master sheet data records is now displayed again before you finally accept the master sheet.	D/CH

Tournament administration

Module/Function	Short description	
Game form selection	The ' Selection of game forms includes a new option Aggregate (handicap effective) option, which is also shown on start lists, scorecards and results lists. If a tournament is to be run in accordance with the rules and with simultaneous aggregate scoring, please note the ' Setting the team scoring for aggregate handicap .	D/CH/LU
Hole betting games	Hole betting games can now also be processed with results directly in PC CADDIE and transferred to the intranet. Try it out now ' Example of a single hole competition!	D/CH/LU
Registration	As a new option for tournament registration, a ' Flexible age cut-off date can be entered independently of the usual association age categories.	D/CH/A/LU
Registration and entry of results	The handicap statuses ACTIVE and INACTIVE are no longer available. Instead, as a registration option you can now restrict the minimum number of result entries the master sheet should contain in order to be able to play for the net prize. Guests automatically play out of competition in the net, unless they manually switch to „hole results“ on the basis of a master sheet. ' Out of competition in the net	D/CH/A/LU

Module/Function	Short description	
CR equalisation	There is a new suggestion list for CR equalisation configuration, depending on the player and tee situation. The simple ON-OFF option for CR equalisation in the price division has been removed. ' Configure CR equalisation	D/CH/A/LU
Scorecard printing	Players and course are now automatically checked at the latest when the scorecards are printed. ' Intranet course check	D/CH/A/LU
	The player's tee colour can now also be printed on the scorecard. ' Scorecard settings	D/CH/A/LU
Define prices	New additional option for „Class limits at 0.4 or 0.5“. The aim of the helper is always to automatically create price groups of the same size. If you now select the new option, this mathematical division is influenced so that, for example, the price group is separated at 14.4 if - without this additional option - 14.7 would have ensured the same group size ' Helper for the price division . As a consequence, this could lead to groups of different sizes.	D/CH/A/LU
	Special prizes: In addition to „Nearest to the Pin“ or „Longest Drive“, the helper can now also be used to define „Hit the Green“ or „Nearest to the Line“ as special prizes ' Helper for the prize classification .	D/CH/A/LU
	Prizes by age: You can ' Set prices for specific age groups . Now simply enter the age directly in the price settings.	D/CH/A/LU
	Prizes by tee: You can, for example, in a men's tournament for the over 50 players ' from the basic tournament settings . Please always do this with caution, as it affects the entire tournament calculation! Study beforehand what you can do with the ' setting of the tee in the prizes and be sure to check which ' tee settings still need to be observed!	D/CH/A/LU
	Prices according to priorities: This is also new: ' Define prices according to player priorities	D/CH/A/LU
Result input	In the result input window, you can now see the SLOPE and CR value of the player's tee shot directly.	D/CH/A/LU
	There is now a new data field for round penalties assigned by the game management, which may be added to the result of an individual hole: ' Penalty strokes for the round .	D/CH/A/LU
Multi-round tournaments in several clubs	Improvement of the processes for ' Organising multi-round tournaments between PC CADDIE clubs .	D/CH/A/LU
	New tournament master for synchronising multi-round tournaments ' via the intranet server GOLFSUISSE or DGV	D/CH

Module/Function	Short description	
Results lists	From 2016, the handicap systems of the EGA countries will differ in some subtleties, which will mean that the handicap changes of players from foreign home clubs can no longer be displayed on the results lists. In addition, the exchange of CBA values will be cancelled. The reasons: On the one hand, there are countries that still calculate a CBA, but in other countries the CBA has been completely abolished. As a result, CBA values are no longer transferred between countries via the international interface or the intranet. On the other hand, in some countries, players in handicap classes 4 and 5 are no longer upgraded, and other countries only no longer upgrade players in handicap class 5. Due to these different characteristics, the results of players with a foreign home club are (as far as possible) transferred between the countries via the intranet; however, the player with a foreign home club should enquire at his home club about the resulting handicap. ' Foreign guests on result lists	D/CH/A/LU
Tournament conclusion „Singles“ game form	The results of <u>not subject to handicap / not handicap-effective individual tournaments</u> are now <u>dutifully transferred to the intranet</u> transferred ' Tournament closure . For this reason PC CADDIE reminds you ' for 30 days to close the tournament . You close tournaments that are not handicap effective with <u>not handicap effective</u> .	D/CH/LU
Change tournament completion	This function has been possible again since 1 April 2016 ' Change handicap effectiveness for tournament conclusion , even if results have already been entered in the tournament. Each ' change to the effectiveness of the handicap in the competition , is logged and sent to the federations via the intranet.	D/CH/LU

Contribution and accounting system

Module/Function	Brief description	
Duplicates	PC CADDIE now remembers the layout in which an original invoice was printed and always creates a duplicate congruent with the original. The original invoice content is only printed in an updated and newly set layout design if the „Create new duplicate“ option is activated. ' Duplicate invoice as a single printout from the sales account or in series ' Invoice duplicates as a mail merge	D/CH/A/LU
Reminder system	The date of the last reminder/reminders is now printed in addition to any existing reminder level for the invoices listed in the reminder texts. ' Print reminders	D/CH/A/LU

Cash register systems

Module/Function	Brief description	
Article management	Article automation with new logic for ' Validity for specific weekdays/holidays and time periods . For example, it can now be installed that the special price of a green fee agreement is only valid from 1 May to 31 October or the winter green fee from November to February of the following year.	D/CH/A/LU
	The selection of days of validity in connection with public holidays has been extended.	D/CH/A/LU

Module/Function	Brief description	
Article export	Even very long article names can now be copied/exported in full to Excel.	D/CH/A/LU
Merchandise management	Merchandise management with serial number management for repair orders	D/CH/A/LU
Components	Items with components can be booked individually. This has the advantage that, for example, an individual component can also be cancelled if it is set in the article with the components that the sub-articles are to be „separated“ when posting. This can be useful in the restaurant as well as in the reception checkout for package items (e.g. consisting of green fee and hotel accommodation). Another new feature is the splitting of receipts according to VAT if different tax rates apply to the individual components of the item.	D/CH/A/LU
OP accounts	It is now possible to post from one cash register area to different OP areas (open items for invoices from the cash register). This is very practical if, for example, a catering establishment not only maintains its own consumption credits, but also makes sales that are to be posted openly to the OP area of an operating company in order to generate a collective invoice from there. ' Open item postings	D/CH/A/LU
Inventory hardware	New hardware: Inventory scanner for faster handling „Datalogic Memor X3“	D/CH/A/LU
Catering	The number of guests and table movements can now be recorded for better statistics.	D/CH/A/LU
	New handhelds: waterproof SONY mobile devices with 6.4„ display, larger on-screen keypad, integrated MIFARE reader for ID chips and ID cards, long-lasting batteries, less susceptible to Wi-Fi signal fluctuations	D/CH/A/LU

Hotel

Module/Function	Brief description	
Daily closing	With the night run, open bookings are now automatically posted to the guest account, e.g. accommodation costs.	D/CH/A/LU

Start time management

Module/Function	Brief description	
Data fields	Date logic and validity information for booking rules improved. ' New date logic	D/CH/A/LU
Booking rules	New special rules for players with course licence or handicap class 6 to determine the maximum number of these players per flight. ' Booking rules	D/CH/A/LU
	The selection of days of validity in connection with public holidays has been extended.	D/CH/A/LU
	A suggestion list of frequent booking rules is now available for online tee time reservations.	D/CH/A/LU

Customer terminal software

Module/Function	Brief description	
Green fee booking	With a new software option, guests can also pay the game fee without having to identify themselves with an ID card, e.g. useful for range fees.	D/CH/A/LU

MIFARE ID machine and card systems

Module/Function	Brief description	
Validity	New options for card validity date: e.g. +100 days from first use ' New date logic: Relative date selection for card validity	D/CH/A/LU
App operation	Vending machine operation now also possible via the PC CADDIE Online app, e.g. for doors, barriers and ball covers. The app uses GPS to check whether you are on site.	D/CH/A/LU
Statistics	For statistics, the ball covers are now also evaluated according to various card types, e.g. for a better overview of course participants, members, holidaymakers or team players, etc.	D/CH/A/LU
Hardware	More powerful readers for vending machines and elegant touch readers for doors. The new vending machine reader can operate up to eight switches/stations for lights, radiant heaters, electricity, doors, etc.	D/CH/A/LU
	New „DIVA relay“, e.g. to control remote vending machines by radio	D/CH/A/LU
	MIFARE ID tags and cards with a larger memory of 7 bytes for payment systems (for comparison: the DGV AusweisPlus has 4 bytes)	D/CH/A/LU
Golf Cart System	The golf carts can now be operated via several radio control centres, enabling several rental stations, e.g. in the hotel and on the range.	D/CH/A/LU

Newly developed PC CADDIE modules and interfaces 2016 for licence expansion

Module	Brief description
Outlook-Exchange interface:	Zur Module description
Course and event management:	Zur Module description
Cash register protocol and efsta procedure:	Zum Article and the interface information
Gastronomy:	New interface to the catering business software KOST .
Golf service terminal:	New PC CADDIE customer terminal with these services: Book and pay for tee times, check-in tee times, start and result lists, register for tournaments, add credit, information screen and advertising display Zur Customer terminal PDF
DGV/BVGA comparison:	Zur Module description
