Update information 2017

IT changes due to association requirements

Germany

Austria

IT changes due to new developments and functional improvements

(as at 15/04/2017)

General update information on PCCADDIE innovations 2017

You can read information on cash register interfaces, self-service terminals, GoBD principles for cash register management, subscriptions & packages, courses and events, and many other details... Read the comprehensive list:

PCCADDIE Update Information 2017

You will find further links to the following points in our ONLINE Wiki:

Betting game - Game form text for Internet

There are forms of play that often want to be named differently in the club, e.g. the scramble form of play.
You now also have these options for the Internet:
Name the game form individually

Accounting export

Interfaces are regularly adapted for the accounting export. Please ask our PC CADDIE support if required!

The new export format Datev 5.0 with a new interface description as a .CSV file has been programmed for the DATEV accounting programme.
Accounting export with the Datev 5.0 format

annually increasing membership fees

If your club has annually increasing membership fees, please read here:
Manage annual membership fee increases

Caddie box plan

It is currently also possible to store your individual caddie box plan.
Working with the caddie box plan

Data export audit

Similar to the account areas and archives in PC CADDIE, you can now export the data directly:
Data export audit

Subscriptions & Packages

From 2017, it will be possible to convert the existing subscription articles per account area so that you can then immediately see which subscriptions a customer has purchased, especially when redeeming a subscription.
You can also create customised subscription articles to specify which subscriptions should always expire at the end of the year, for example.
Please ask our PCCADDIE support team if required.

Relaunch checkout interfaces

Please take a look at the example for the catering POS interface:
new cash register interface catering
Would you also like to modernise your POS interface? Get in touch with PCCADDIE Support.

Courses and events online

Courses and events can be managed in the same way as competitions and released for online registration on your homepage.
Courses and events
