Adjustments to the DGV association regulations 2019

Counting game with maximum score / Maximum Score | New form of play

The maximum score per hole improves the speed of play in stroke play tournaments. As the handicap is calculated according to Stableford, this form of play can also be used for handicap tournaments. You can find instructions on how to play here: **⇒Counting game with highest score**

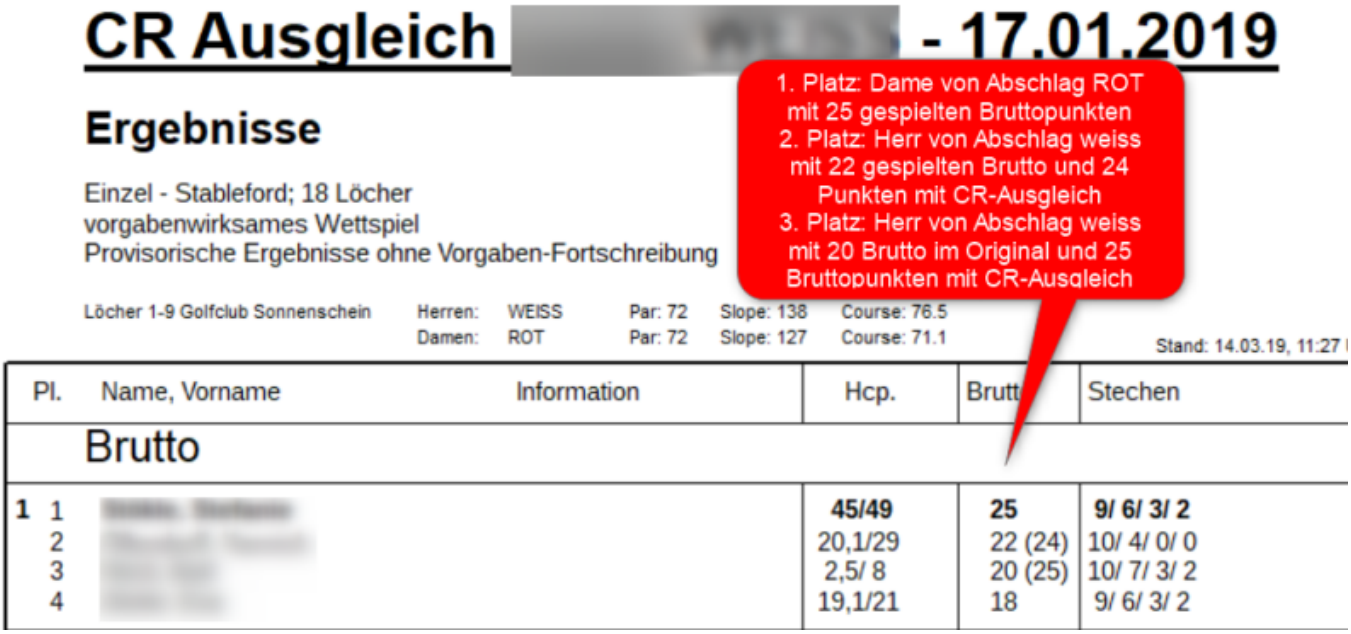

CR equalisation in gross | New sorting

**New from 2019:
Sorting according to original points played, only the players with prizes printed in bold would be brought forward, all others always remain in the row according to original points (see Pos 2 and 3)!!!

**

Example:

In this case *players 2 and 3* have played from the „White men's tee“. The *player 2* is rated better than *player 3*because, without CR compensation, he played better with 22 gross points than *player 3* (Players 2 and 3: both scored from the „tee men white“). However, the gross wins *Player 1*. Because *Player 1* has scored 25 gross points from the „Ladies Red Tee“, and thus she is better than *player 2*who „only“ scored 24 gross points with CR equalisation. The *player 1* is placed in first place.

CR Ausgleich [redacted] - 17.01.2019

Ergebnisse

Einzel - Stableford; 18 Löcher

	4			19,1/21	18	9/ 6/ 3/ 2

Course data | Course rating for up to 18 tees / tees

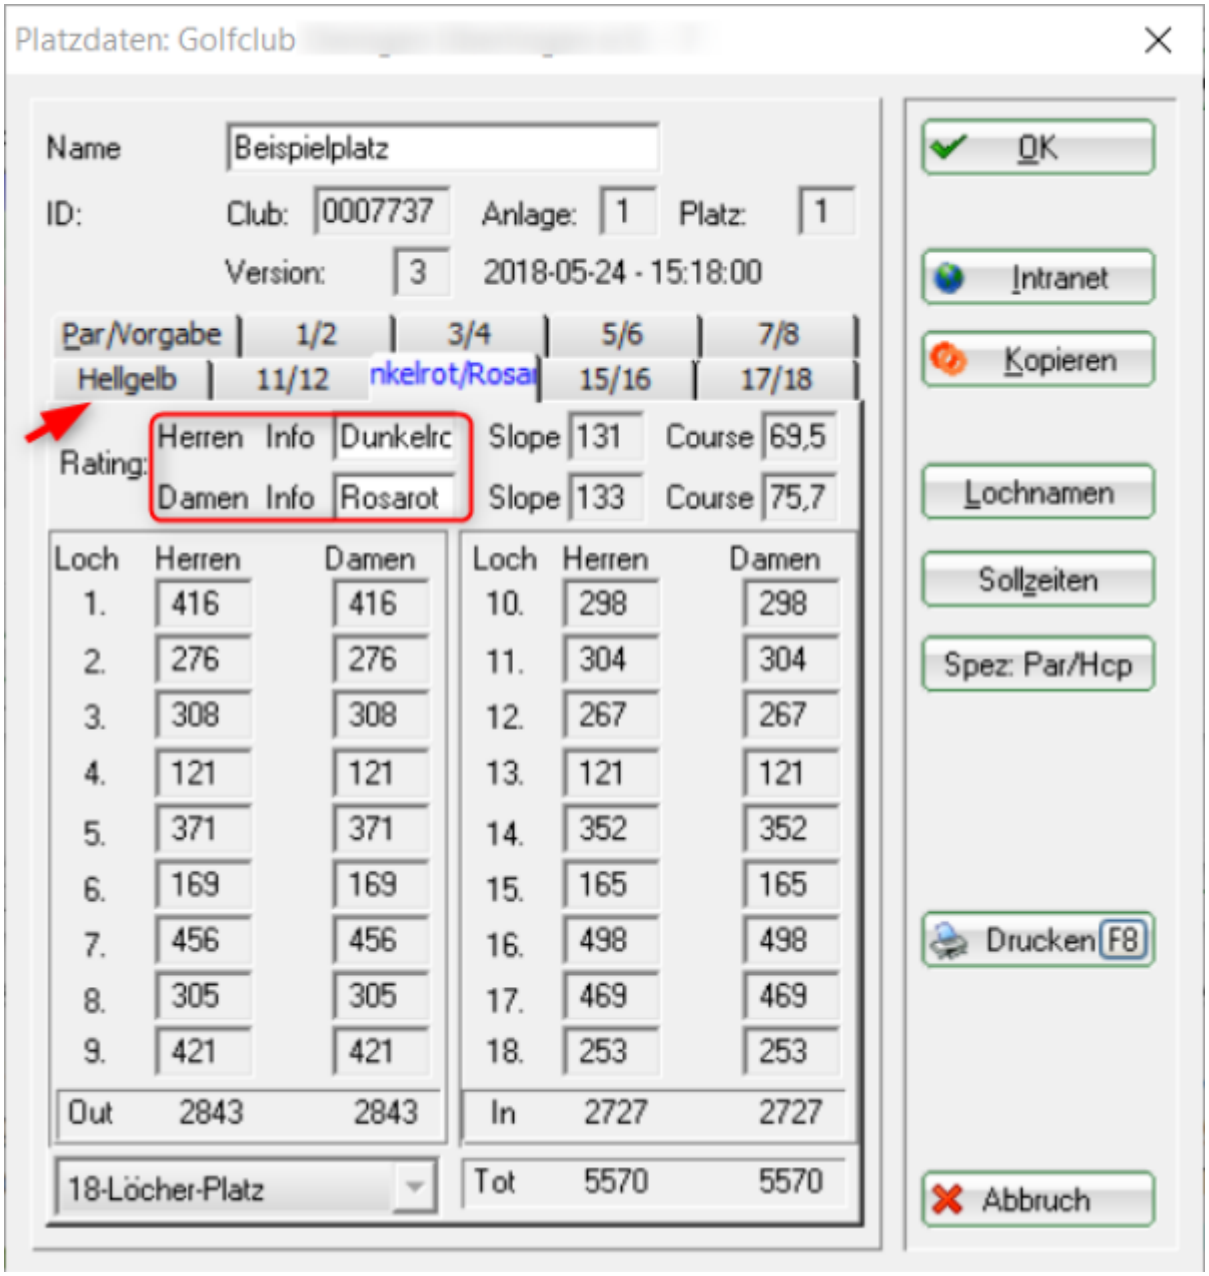

You can now have a course rating carried out for up to 18 tees.
The course data fields have been extended for this purpose: GOLD - SILVER - BLACK - WHITE - YELLOW - BLUE - RED - ORANGE - GREEN.
And you can have every tee colour measured for both men and women!
You can find the instructions for loading the course data: **⇒here**

Course data | Tee colours can be named individually

It is now possible to name the tee colours yourself. However, the tee colours should still be recognisable, e.g. you can change RED → PINK RED. It is not permitted to enter GREEN in the position for RED.

Here is an example of a club with only a few tees, but individual colour designations:

Data protection for functionaries of the golf club

Data protection is becoming increasingly important: e-mail addresses of club persons may only be uploaded to the DGV service portal with their consent.

Data protection for tournament registrations

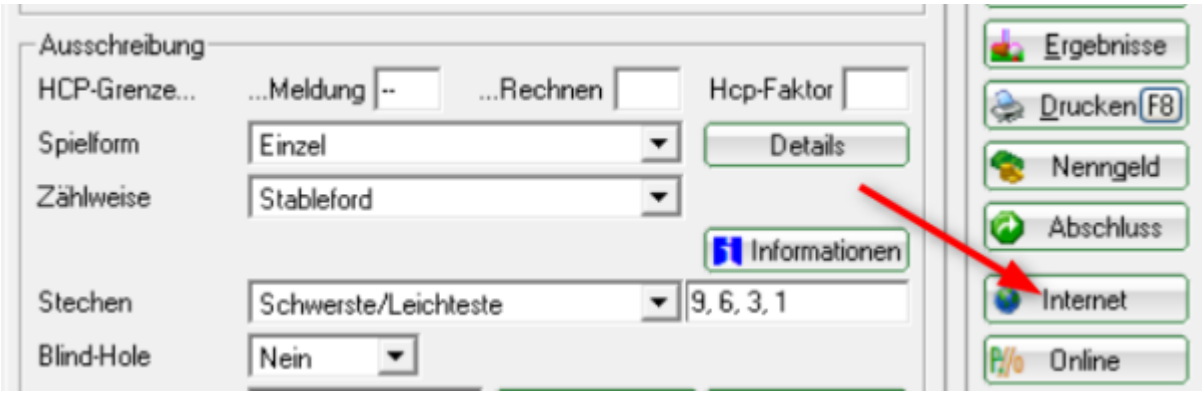

Functions for the qualified electronic scorecard

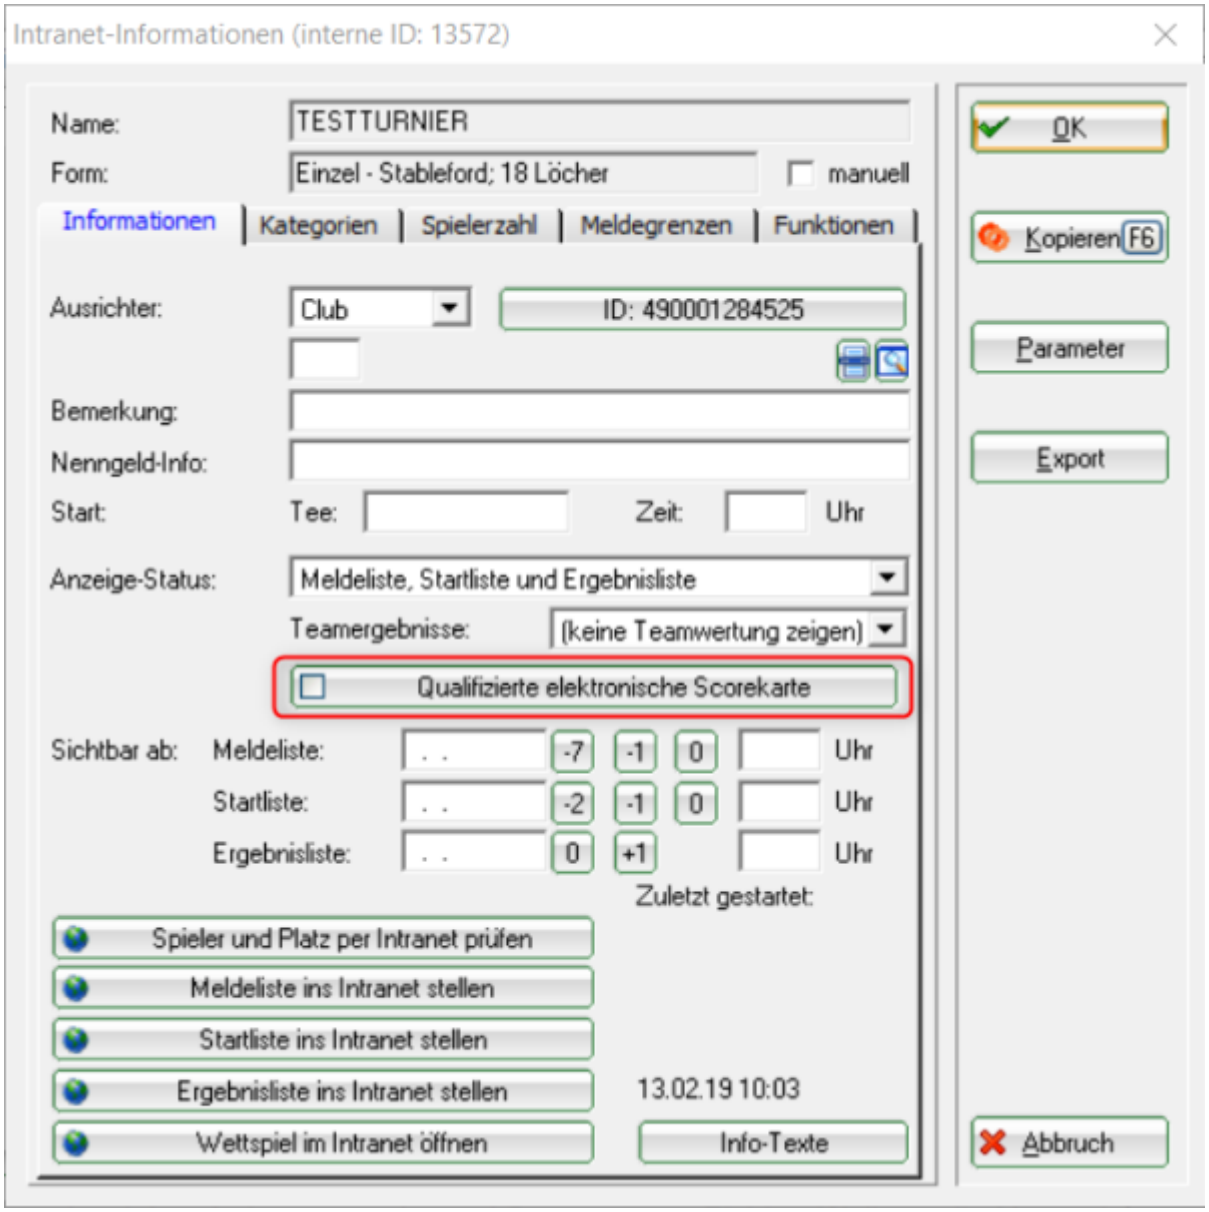

We currently have no information from the DGV regarding the APP interface for the qualified electronic scorecard. However, we are already supporting the preparation in exchange with the service portal.

Once the German Golf Association (DGV) has completed the licensing process for 2019 in the spring and the corresponding APPs have been programmed, you will be able to activate the entry of scores via the APPs in the competitions.
The APPs for entering electronic scores will then send the results to the DGV service portal.
As soon as you retrieve the scores via the DGV service portal, they will be entered and can be viewed directly in your PC CADDIE competition when entering the results.

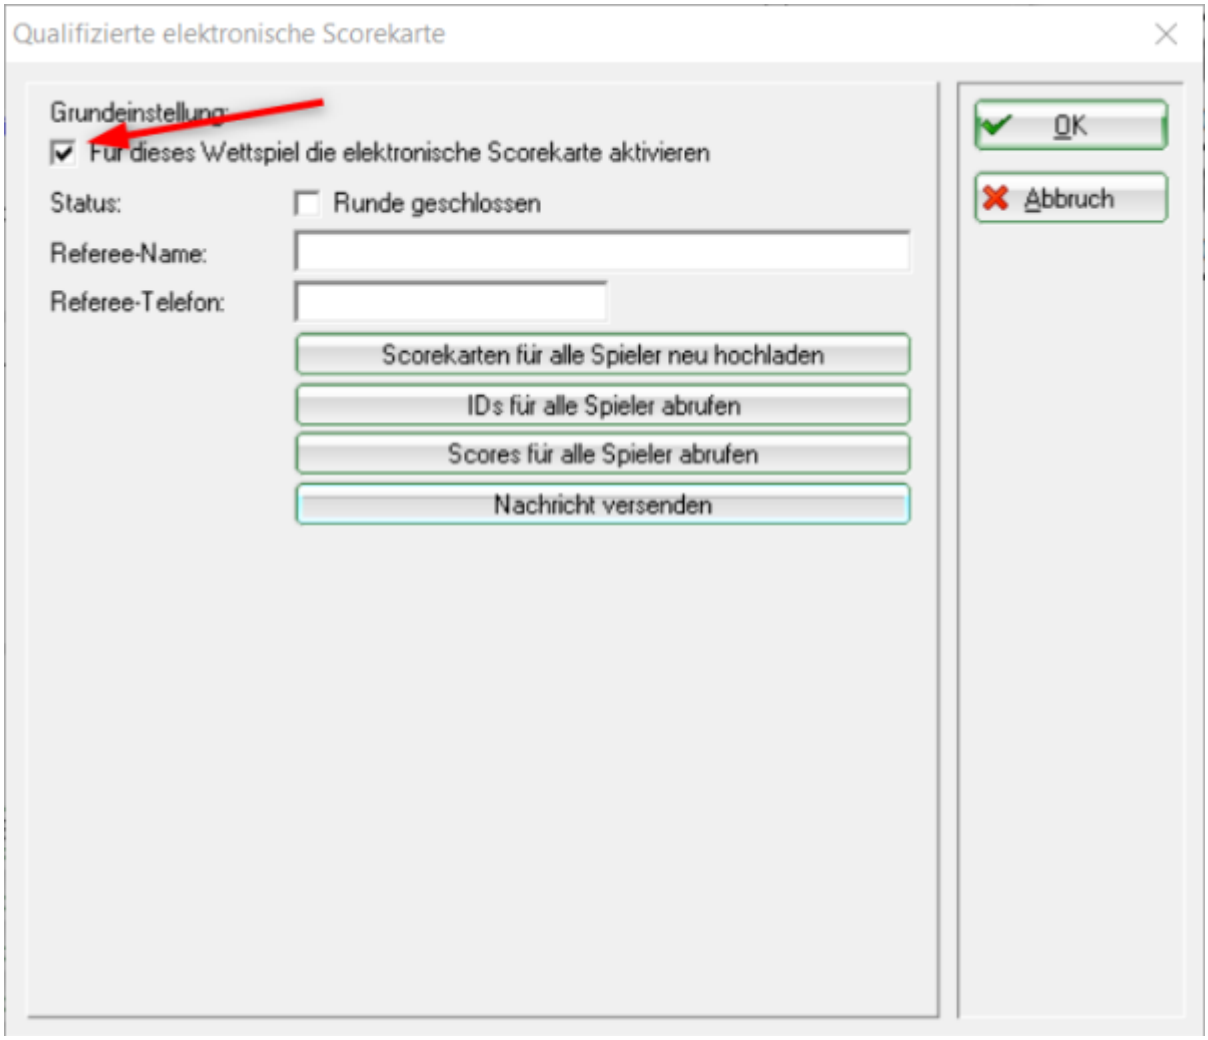

Settings in the competition

As soon as you click on the button ***Internet*** button in the betting game, you have this setting option:

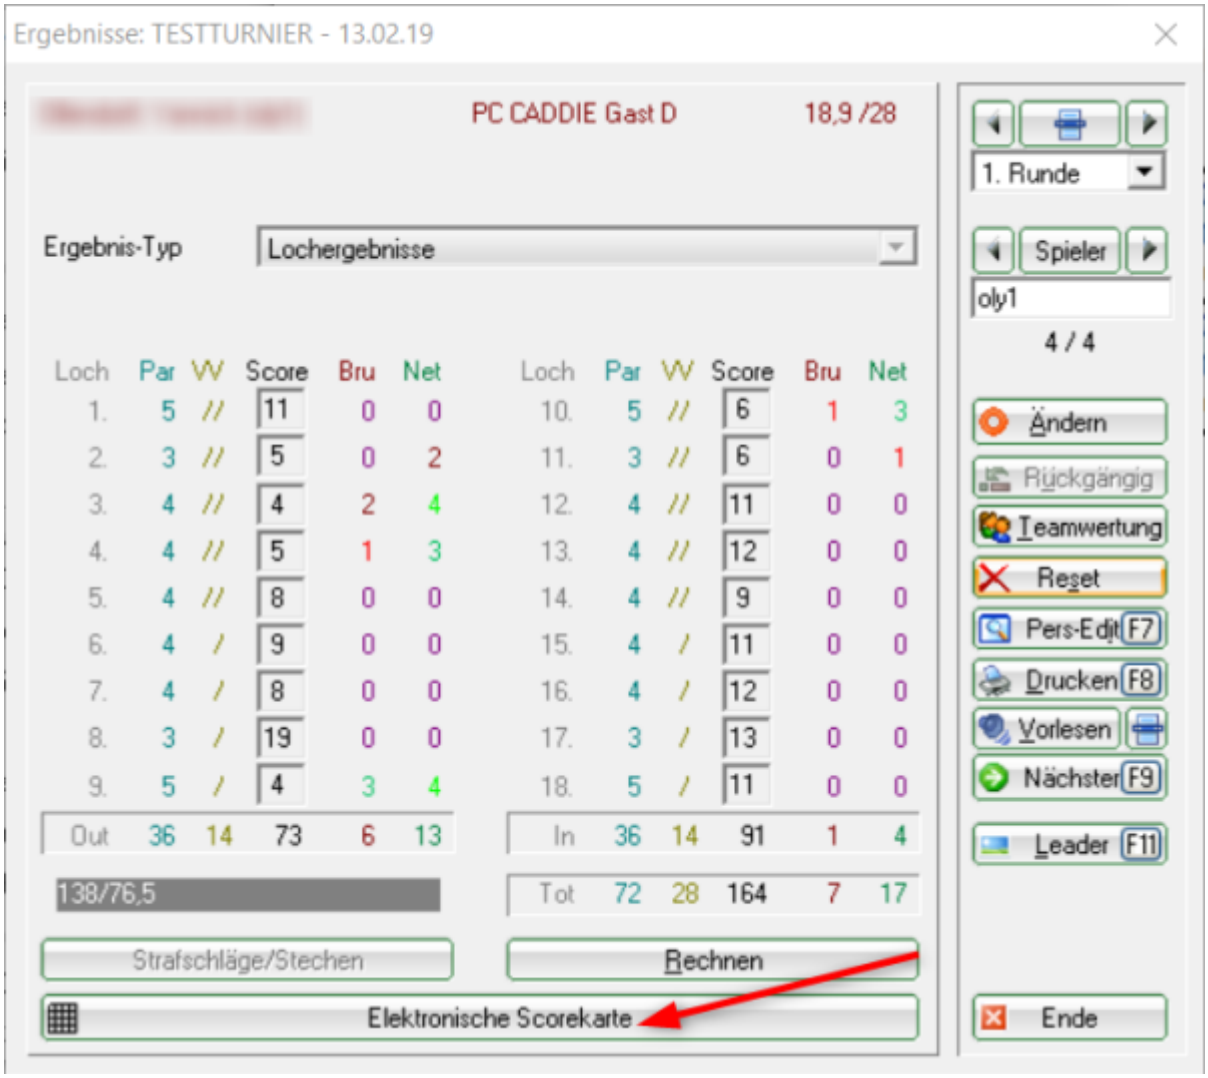

Please select „Qualified electronic scorecard“, and then ***then activate this function by ticking the box!***

View results

When entering the results of the individual players, you have the option of clicking on ***Electronic scorecard*** to click...

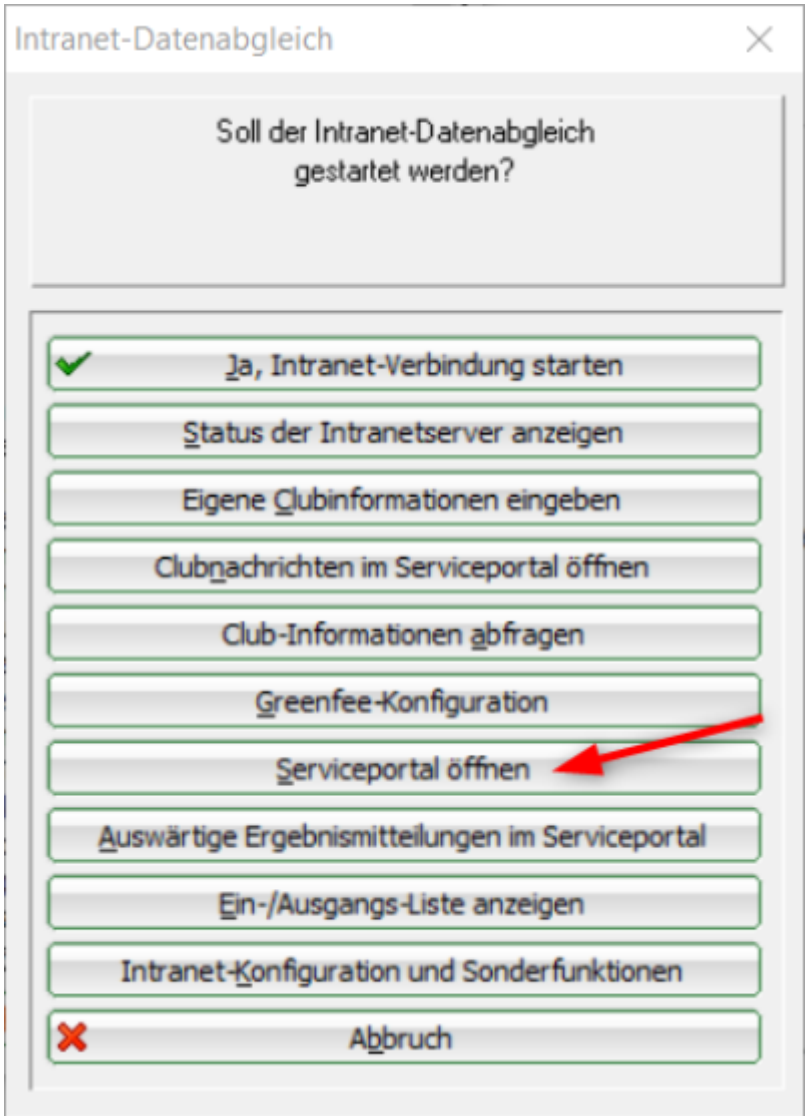

... and here the possibility to send the scorecard of a single player to the DGV-SERVICPORTAL again, or to retrieve only the results of this player from the DGV-SERVICPORTAL!

Dynamic intranet login

The dynamic intranet login has been in place since summer 2018. The login changes automatically every hour so that the service portal access is optimally protected against hacker attacks.

Replacement of the IIS/link to the DGV service portal

The intranet information system has been replaced by the SERVICEPORTAL.
With the PC CADDIE version 2019 the direct links are active again! You can then, for example, call up the external results messages again via a direct link!
