Update Switzerland Version 15.1 - 2026

Game form Fourball HCPI Relevant

The update will be available soon - if you already need the selection, please contact us

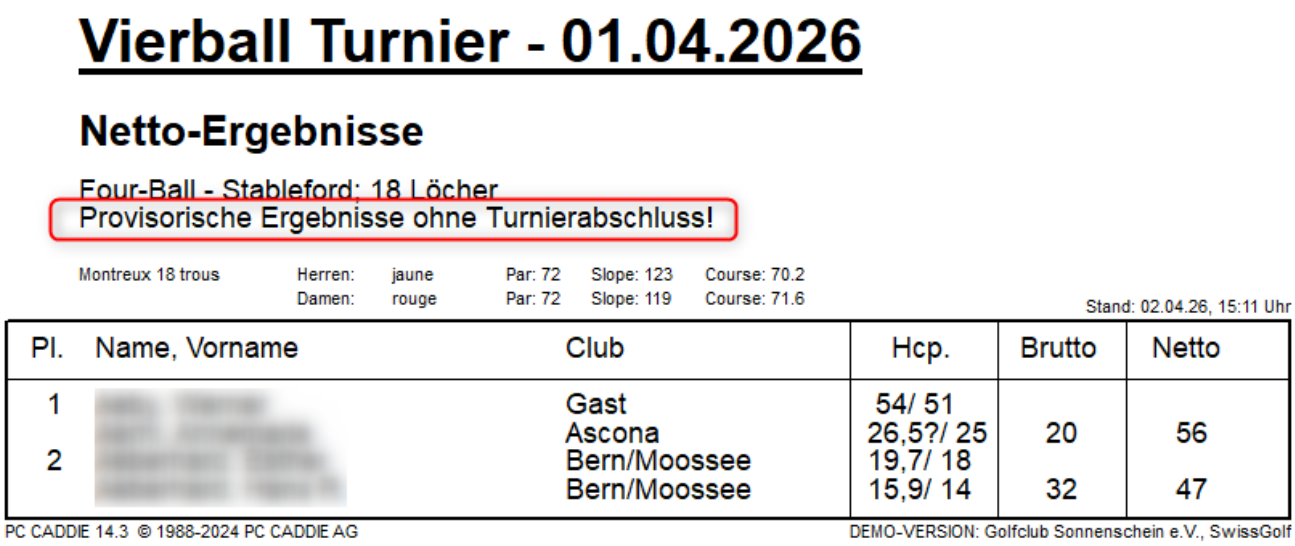

In Switzerland, there is now also the option of completing the HCPI Relevant tournament for the fourball format.
The AGS (Adjusted Gross Score) is calculated for this form of play after the tournament has been completed and transferred to the SwissGolf intranet (and transferred to the Handicap History Sheet), which is why there can be no AGS values on the PC CADDIE results list. PC CADDIE does not have the AGS values in this case.
SwissGolf calculates according to rule 5.10 from the WHS rules. If you have any questions about the calculation, please contact SwissGolf exclusively!

For the fourball, please pay attention to the HCPI relevance setting in future, as with singles:

Complete the tournament as usual! If the results have been entered and you have not yet completed

the tournament, the corresponding message will appear on the results list:

After you have finalised the tournament, the text „provisional results…. “ text disappears from the list, as it does if you accidentally set the tournament to HCPI Relevant and change it to „not HCPI Relevant“.

The tournament is finalised as usual by clicking on Finalise:

..and then „start“
