Server

Please contact our support team in advance to clarify individual details and to arrange a date when we can support you.

You can find the following information here:

Transfer of the data

The data directory of the old server (main computer) must be copied completely. **The database must not be accessed during the copying process.**. All running PC CADDIE instances must be terminated, including any PC CADDIE services on the server. It is best to name the folder **\DATA** folder in the PC CADDIE share to ensure that the database is not accessed. Please note that the intranet login will be deleted at the request of the German Golf Association.

In the following description we use the abbreviation ADS for the Advantage Database Server . Please check now on the old server via macro ads whether an ADS server is installed.

Server relocation without ADS

1. Configure the virus scanner
2. Firewall and access rights
3. Install the PC CADDIE Service Manager (macro: sma)
4. Install the services (PC CADDIE://online services, card systems, etc.)

Server relocation with ADS

1. Advantage Database Server
2. Configuring the virus scanner
3. Firewall and access rights
4. Installing the services (PC CADDIE://online services, card systems, etc.)

Server relocation terminal server

1. Advantage Database Server
2. Configuring the virus scanner
3. Firewall and access rights
4. Installation of the PC CADDIE client folders
