Cloud Backup

Your data backup in our data centre

Protect yourself against complete data loss due to fire, water and theft, or from Trojans that encrypt your data. Our daily cloud backup complements a local local data backup perfectly. Not only the PCCADDIE data, but also other desired software software applications and documents are copied and stored in encrypted form in a German data centre, to high security standards and in multiple versions so that older data can also be restored.

The facts

Services	Standard service	Individual
1x daily data protection-compliant backup of the PCCADDIE database in a German data centre up to 10 GB, maximum 30 days retrospectively	X	
14-day restore test including proof	X	
Backup extension for PCCADDIE workstations, UPDATE and ATTACHED folders		X
Backup extension for other software applications		X

Prerequisites:

- A permanent internet connection with a bandwidth of at least 2 MBit per second (if the bandwidth is lower, it must be tested whether the transmission time is sufficient for night backup).
- The computers and servers must be equipped with a Microsoft Windows 7, 8, 10 or Server 2008 or 2012 operating system.

Prices:

- Standard: € 25.00 per month or: € 300.00 / SFr. 400.00 per year plus VAT.
- Customised backup extension: € 2.00 per GB per month or: € 24.00 / SFr. 30.00 per year plus
