

Server hosting in the cloud

From any place - at any time: secure access to all golf data

PCCADDIE is fully functional on a terminal server, including regulated 24/7 hardware and infrastructure support. hardware and infrastructure support. Installed in this way: you have flexible access to all data, protect and store it with maximum security on high-performance servers in a German data centre. A full backup of the entire HyperV server is made once a day on an external NAS. Always with the latest update: we keep the operating system and ADS database server up to date.

The facts

- List point cloud service: 1x daily data backup, updates, 24/7 monitoring, ADS database server
