

Reception desk

The PCCADDIE cash register knows your customers

The clear difference to other cash registers lies in its customer-centred approach. Everything remains in one programme. This means that a statement can be printed for the customer in summarised form and debited by direct debit if desired. The interfaces for booking tee times or green green fee bookings are optimal. Particularly popular: the transfer of tournament players to the cash register. The start time is also transferred or an item (entry fee, round catering ...) is automatically added. There is no need for double billing and constant exchange of lists: reception and catering staff are delighted. With an integrated online clearing directly when paying via the PCCADDIE cash register, the cash register closing and the cash register cut of the credit card terminal match perfectly.

Facts
