Simulator/TrackMan services

Information, organisation, booking & invoicing with PC CADDIE - you can rely on it

Via the live interface with the simulator or our online system, the paid simulator hours are activated without further administration, the single and multiplayer mode can be booked in the timetable and is billed correctly, different rules for the possible playing times and duration can be defined for each customer type. Subscribers can optionally be created and billed via the membership management system.

The RFID system can be used to control access to the rooms, book and bill simulator times, pay at the drinks machine or control heating systems. The release of doors and the topping up of credit can also be carried out via the PC CADDIE:// online app.

A self-service terminal with debit/credit card payment is available as an option for operations without staff. An info screen can be used to communicate occupancy, information and advertising.

Facts:
