Change password

To change the password, either click on the Windows key + A on the keyboard, or on ***End/Change password,*** or click on the lock in the picture bar:

In the dialogue, you will see that you can access password management directly by right-clicking on the small lock - read more about this here: Password management

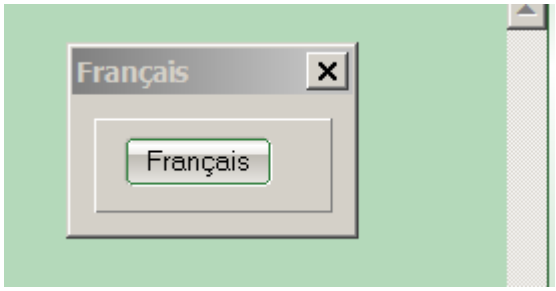

The familiar window opens in which the new user can log in.

If you have not installed password management, you can set it up/activate it as described here: Password management

French button

In the French PC CADDIE version, a „Français“ window opens when PCC is started.

No matter where you are in the software, pressing this button takes a screenshot and at the same time the window opens to send a direct e-mail to the PC CADDIE translation team.

1. Indicate your suggestions for improvement.

2. Name the contact person so that we can get in touch if we have any questions.
3. Attached is the screenshot, which you can supplement with markings.

This will help us to improve the French version in your favour. Thank you very much!
