

Timetable PUR

The timetable PUR is a paid additional module of PC CADDIE and is used in the following cases:

- Display on a screen in the reception area or at the first tee
- Viewing and / or booking option for a separate computer (for example for the golf instructor, a starter or the gastronomy)

The display of the tee times or the timetable ranges is done via a [Timetable View](#).

The screenshot displays the 'Timetable PUR' software interface. The window title is 'Timetable'. The interface shows a grid for two dates: Friday, 01.03.19 and Saturday, 02.03.19. The grid has columns for '18 Holes, 10 Te' and '18 Holes'. The time slots range from 15:20 to 16:40. Two bookings are visible: one for 'Member, Paul (22.0)' and 'Mustermann, Fritz (22.0)' at 15:30 on Friday, and another at 15:50 on Saturday. The interface includes a toolbar with icons for search, refresh, and print, and a navigation bar at the bottom showing a calendar view for the month of March 2019.

The module is available with and without booking options. Please contact PC CADDIE Support for installation.
