Tournaments/Events with PC CADDIE://online

General information

If you are interested in placing your tournaments and events on your own homepage, please register for the module ***TURNIER-ONLINE*** module from PC CADDIE. Your events will then be transferred to GOLF.AT at the same time.

If you only want to organise your events with ***TURNIER-ONLINE*** on your own homepage, please let us know. We will then set up your PC CADDIE so that it is only transferred to your website. This requires a decision on your part.

The documentation for ***TURNIER-ONLINE*** can be found here:

TURNIER-ONLINE

The documentation has in the screenshots instead of your known 

the button 

However, this is the same function for you. We have therefore refrained from creating the documentation a second time in full.

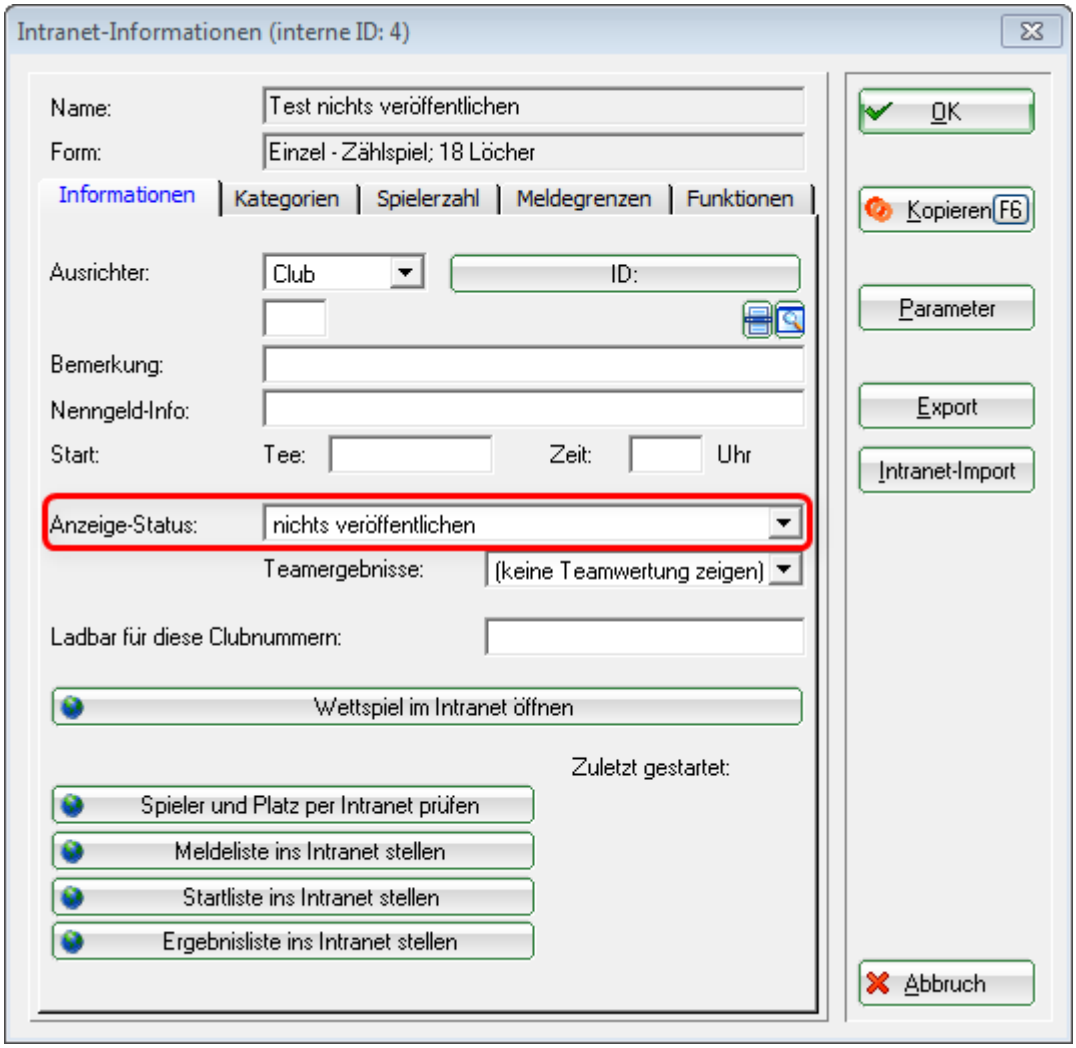

Posting tournaments/events on the website

Important editing tips can be found here:

Putting events on the website

Additions to the link above

- if you click on ***Entry limits*** do not fill in the field REGISTRATION BY (registration deadline), nobody will be able to register online. You could therefore ***event on the homepage for information purposes only***if you leave the entry limits blank.
- If you want to activate the online registration, the ***entry limits and number of players*** and the number of players, especially the total number and the number for online registration.
- if you do not want to ***do not want to publish an event online at all*** you can switch to „do not publish“. See the following screenshot:

Send tournament completion and tournament results to GOLF.AT:
