

Result messages

Information about the intranet. Where are the results notifications sent automatically?

Please read => [here](#)

The function **Tournaments/Multiple tournaments and golf weeks/Print.../Results messages** is largely identical to the function **Tournaments/Print.../Results messages** function. With the introduction of the WHS (World Handicap System), this function is increasingly used again, but only for players with a home club from another country for which there is no international interface between the national golf associations.

Here you also have the option of printing result notifications for several tournaments at once, while printing the result notifications can be done directly under: **Competitions-Results notifications** is intended for a single tournament:

In this dialogue, determine which **tournaments** and which **group of people** should be taken into account for printing. You can also change the text **above the results** and determine whether the letterhead and/or sender should be printed. You can now start the printing process as usual by clicking on the **Print** button (F8) as usual.
