

Aggregate hcpi relevant

information

New from 2025: According to the WHS rules, an aggregate **hcpi relevant** may be completed even if the players in a match group are playing in the same match.

As a tournament conclusion is not possible for foursomes game forms or „aggregate foursomes“, continue to play the tournaments with the game form **Aggregate hcpi relevant** game form. This also has the advantage that you can create both a team ranking and an individual ranking.

Setting the team ranking is much easier if the game groups are allowed to start in the same game

Continue reading:

Aggregate hcpi relevant

This results in the following procedure for a tournament that is to be played hcpi-relevant and at the same time has an aggregate rating:

The tournament is classified as **aggregate hcpi relevant** and the aggregate scoring is carried out as **team scoring**.

This setting is not available for the „finished forms of play“. The „ready-made game forms“ are specially set for the Austrian Golf Association and may only be extended if the Austrian Golf Association requires a change.

[Create new tournaments](#)

Select game form

For the hcpi-relevant aggregate, it is important that you select the **aggregate HCPI relevant** is selected.

Alternatively, you can also choose the „ready-made game forms“ **Single counting game according to Stableford** or **single counting game** but you will then see this on the start and result lists and scorecards. The individual team scoring works in the same way as for the „Aggregate HCPI relevant“ game form. Only game forms that are supported by the ÖGV (Austrian Golf Association) are included in the ready-made game forms.

Set team scoring

The aggregate scoring, in which the results of a pairing are added together, is handled with the **team scoring** and proceed as follows:

Check whether the team scoring module is licensed for your PC CADDIE. Look in the tournament input

First create the complete start list!

Then select „Teams“ in the tournament screen and choose „Aggregate from partners with the same priority“. You can then sort the teams either by priority or by the completed start list.

You will receive another selection window:

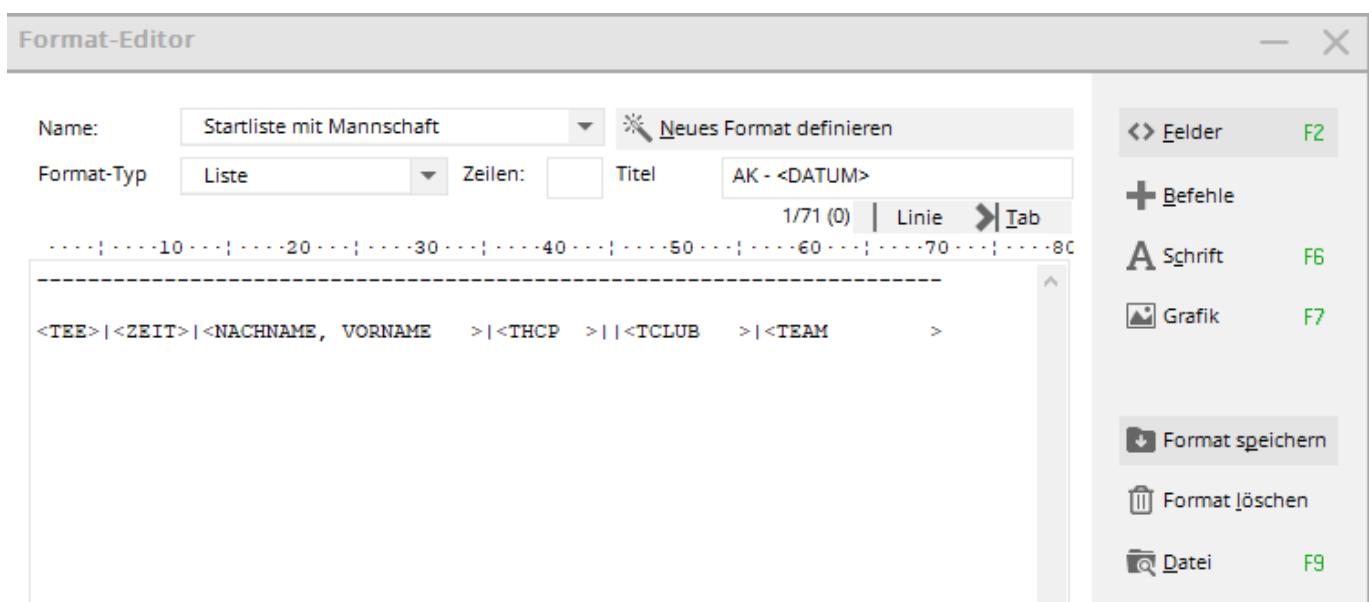

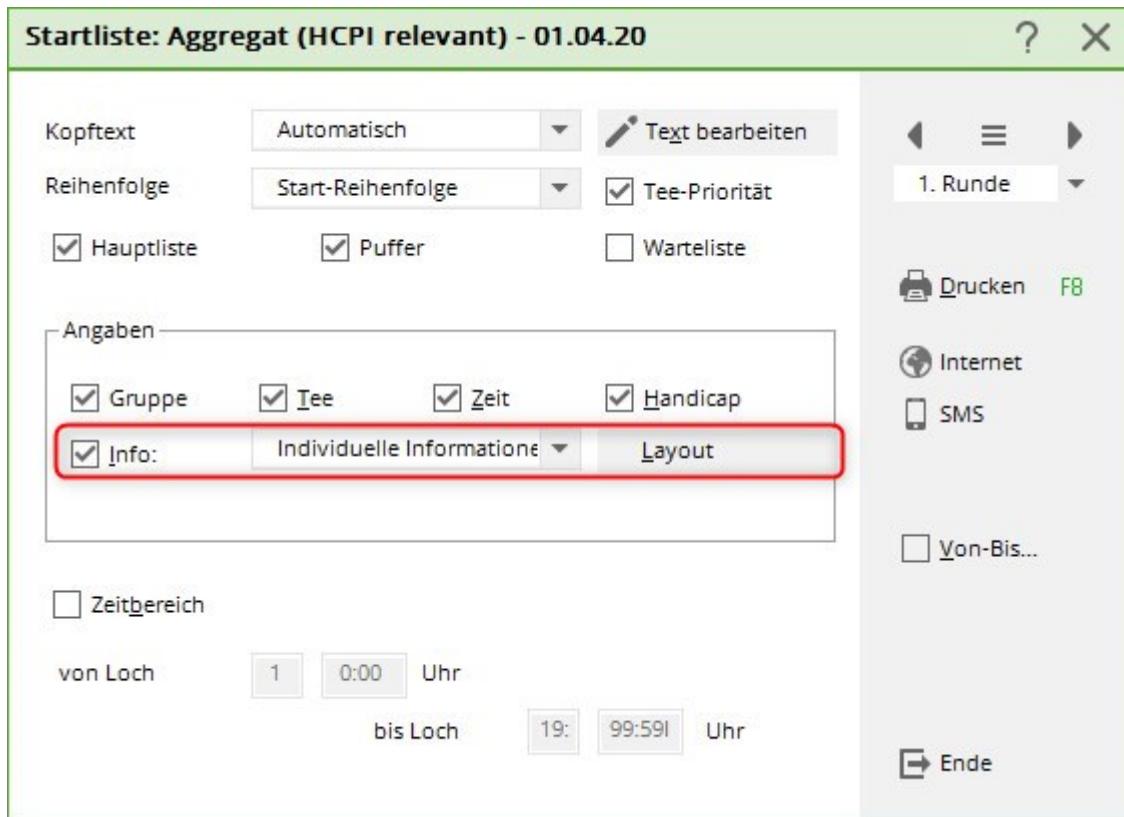

Optional: Assemble teams with priorities

Print start list with team names

If you have assigned team names, you can also print these with the start list. Store a customised start list layout.

General information on [Printing start lists](#)

Procedure until 2024

You can compile the teams directly in the player editor:
 Select the player and click on the „i“ on the right

Startliste: Test Aggregat, 1. Runde - 06.02.24

Turnier Bearbeiten Sortieren + Formatieren Block Puffer Drucken Info Speichern Ende

Gruppe: 1/1 - Spieler: 1/4

Here you can see whether all players are assigned to a team. Via the button **helpers** button you can then make sure that „Overall best“ is set for all players or set the rating here.

Pay particular attention to the point **Leave teams!**

Select „Sum of the 2 best results per club/group“ and click on **Assign**.

! Particularly important: Select here **Keep teams** and confirm with **OK**.

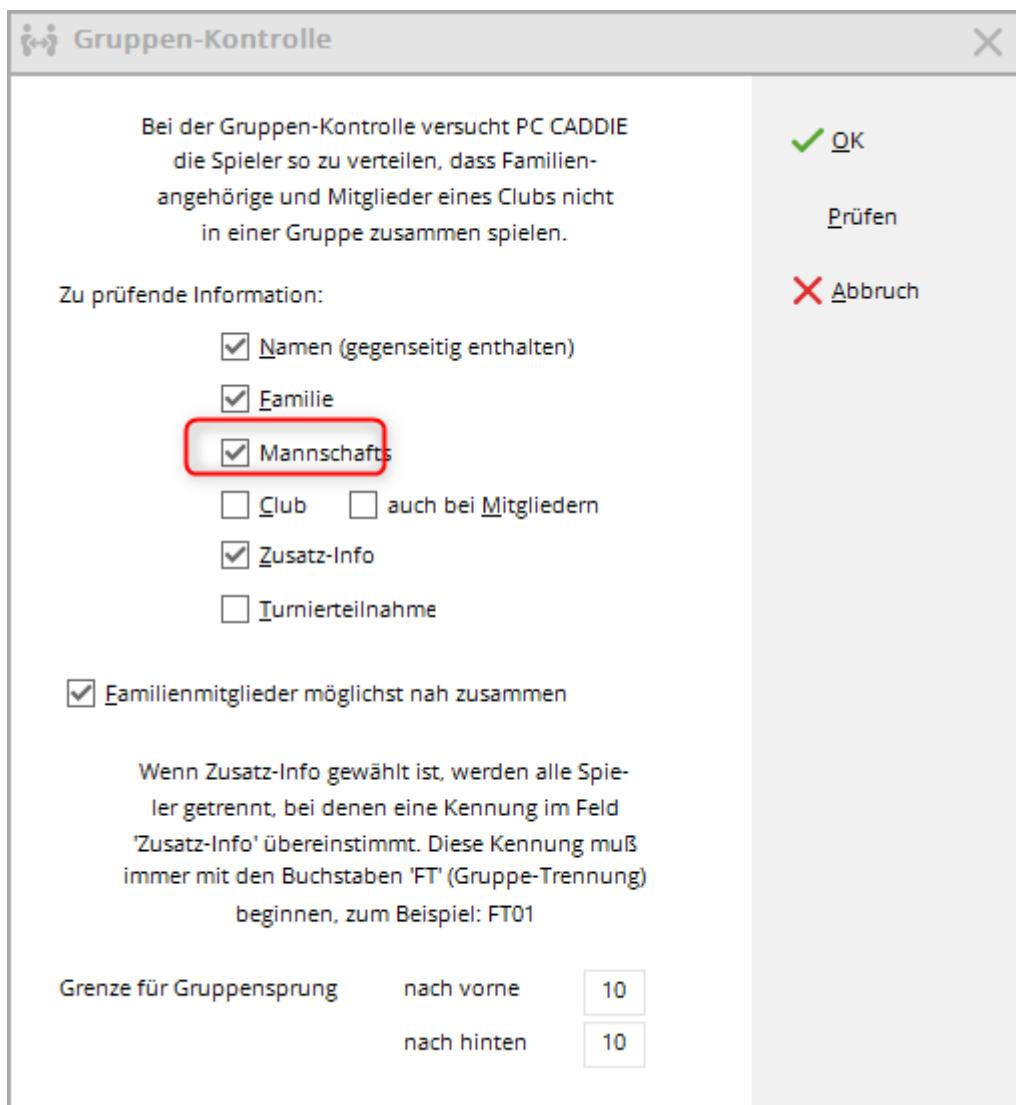

You will be asked this question, which, if you are sure, you can answer with **Yes** if you are sure.

Starting list teams with separate matches

When creating the start list, the players belonging to a team can be separated automatically. In the „Composition control“ for the games, tick the box next to **Team**. This means that players who belong to a team are assigned to different games:
