

Pro On the practical example

„This page has been revised in relation to the 2014 tender“ (as of 27/06/2024)

Here you can see a [sample tender from 2014](#) for a PRO AM.

Check for yourself which parts of the tender apply to your tender, for example!

It is particularly important to note that the tournament has 2 rounds, albeit with different participants in some cases, for which a joint scoring over 2 rounds is required in some cases (Pro over 36 holes). In order for this to work, the tournament should definitely be created as a 2-round tournament and exported to the club that is handling the 2nd round after the 1st round has been completed. The **The start list should then be copied to the 2nd round** and only then should the necessary player changes be made in the 2nd round.

Only if you adhere to this procedure will you receive appropriate scores over 2 rounds!

Procedure of the tournament

- Play the 1st round as usual in the 1st club
 - Start list for the 2nd round [download](#)! Be sure to select **Load players with time allocation**
 - Players who have only played in the 1st round should only be removed now in the 2nd round and new players should be added, if possible keeping games if the players are still playing.
-  This can also be done after exporting and importing the tournament at the next club.
- As soon as the 1st round and the transfer of players to the 2nd round is complete, please export the tournament to the 2nd club. [export](#)
 - [Import](#) the intermediate standings of the tournament at the 2nd club
 - If there are still player changes in the 2nd round, you can also process this after the export and import, and of course adjust your start list.
 - [Set the team ranking](#) for 2 rounds: **Select under Helper: ProAm: Pro+2 best amateur balls** in both rounds.
 - It is important that the team numbers and team names are identical in both rounds at the end. To do this, it is important that you have previously loaded the start list with the start list classification from the 1st round into the 2nd round. This makes it easier to compile the team for the team ranking at the end. Depending on how many player changes you have had and if different pros play for the same team, it may be necessary to adjust the teams manually (team numbers and team names)

Create tournament

Basic settings

Form of play and counting method

Set the tournament to „Singles“ and „HCP good:Counting game, high Stableford“ counting method. and organise the tournament as usual! The pros play counting play and are also counted as counting play.

As there are now also pros with HCPI, please set these pros manually in the player editor under player information to **Stroke play**. Please read =>[here](#)

In Austria, please select „Ready-made game combinations: Pro-Am“.

The screenshot shows a software interface for configuring a tournament. The title bar reads "Pro Am - 30.06.24 - Teilnehmer: 0 / Gäste: 0". The interface is divided into two main sections: "Name, Datum, Platz" and "Ausschreibung".

Name, Datum, Platz:

- Kürzel: 15010
- Name: Pro Am
- Lochzahl: 36
- Datum: 30.06.24 (Start), 01.07.24 (End)
- Platz: Mehrere Plätze (Selected: Mehrere Plätze im Turnier)
- Hcp-Grenze der Abschläge: Herren (-/-/-/-/-), Damen (-/-/-/-/-)

Ausschreibung:

- HCP-Grenze...: --
- ...Meldung: --
- ...Rechnen: []
- Hcp-Faktor: []
- Spielform:** Einzel (Selected)
- Zählweise:** Hcp gut: Zählspiel - hoch: Stableford (Selected)
- Summen/Eclectic: Kumulieren / Summieren
- Stechen: Im Brutto Nettoergebnis und umge
- Blind-Hole: Nein
- Jahrespreiswirks.: Nein
- Intern/Gäste: Offen
- HCPI®-Relevanz: HCPI-relevant

A red box highlights the "Spielform" and "Zählweise" settings. To the right of the configuration area is a vertical toolbar with icons and labels: Projekt, Neu, Sichern (F11), Löschen, Kopieren, Spieler, Ergebnisse, Drucken (F8), Nenngeld, Abschluss, Internet, P/0 Online, and Ende.

Set team score

For the team ranking it is important that it is set the same for both rounds!

For the team scoring, select the following via the button **helper** button to select the following setting for both round 1 and round 2. Have the team result calculated with Stableford so that the counting game results of the pros are converted.

Please also note the further explanations in the other screenshots!
