

Add up gross and net special scoring

Status 5 November 2024

Due to the HCPI relevance check of the DGV, and also because the DGV's specifications no longer allow the results to be copied, this evaluation has become more labour-intensive

As a special classification, this is very individual and therefore only a special classification. Normally there is a gross **or** a net classification!

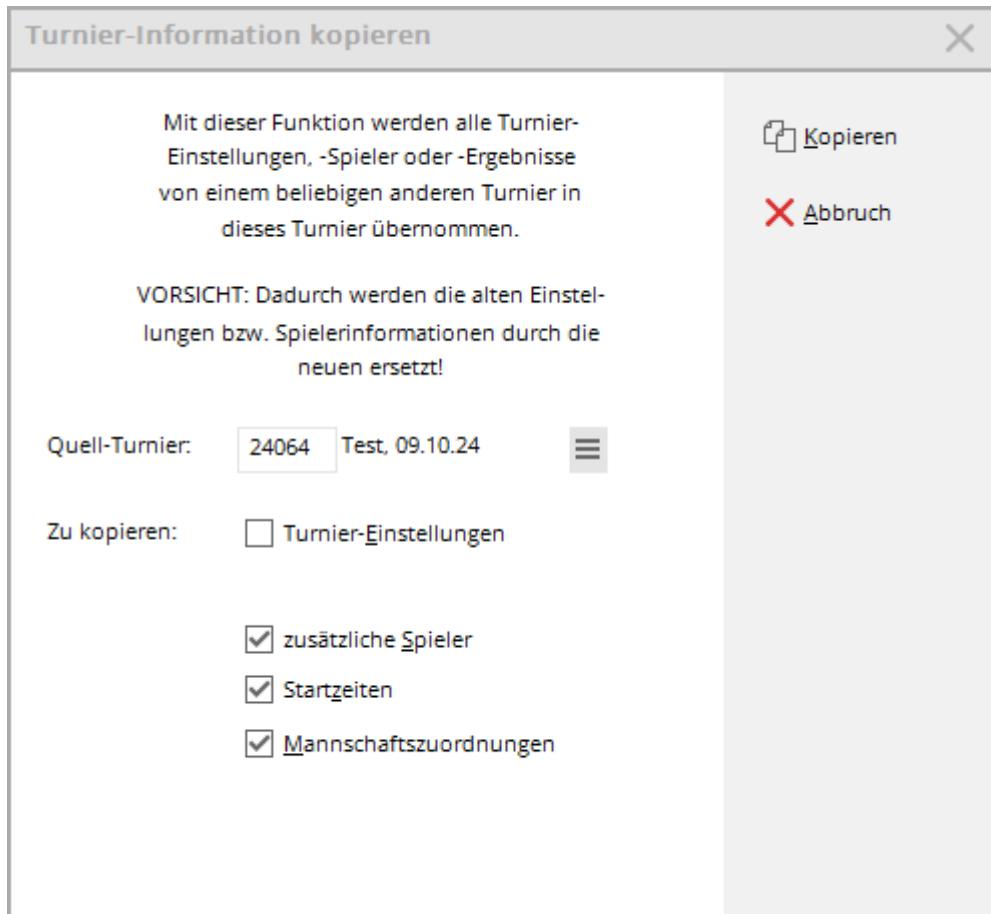

An experienced PC CADDIE user can add the gross and net scores manually, but you need a second tournament (a copy of the tournament, whereby you can only copy the players with the start list, everything else - including the results - must be entered twice in the two tournaments)!

You can add gross and net points with the team score. To do this, use the multi-team scoring to add up the points for the original tournament and the copied tournament.

Copy tournament

Copy the tournament as soon as the start list has been created and the teams have been put together. Read how to do this: [=>here](#)

It is important that you first open a new tournament, preferably with the setting „**free game form**“ then click on **copy** and, after selecting the tournament to be copied, tick the following boxes (please do not copy the tournament configuration, as this will also copy the HCPI relevance) - the „**free form of play**“ is automatically not HCPI relevant, so that you do not inadvertently complete the results HCPI relevant twice!

Editing the copied tournament

For better recognition, it is best to add any text to the tournament name, e.g. Brutto: „Tuniername BRUTTO“.

Now simply set the Hcp formula to „0“ as follows - then all results are „gross“, even in net rankings!

Flühli Sörenberg BRUTTO - 14.10.20 - Teilnehmer: 0 / Gäste: 0		Spezielle Turnier-Konfiguration	Spezielle Handicap-Berechnung

VORSICHT: PC CADDIE rechnet alle Turnierformen automatisch korrekt gemäß Spiel- und Wettspielordnung. Anpassungen in diesem Fenster sind nur in Ausnahmen nötig. Benutzen Sie diese Felder in der Formel: H1 = HCP des ersten Spielers H2 = HCP des zweiten Spielers M1 = Kleineres HCP M2 = Größeres HCP SUM = Summe der Einzel-HCPs ANZ = Anzahl der Spieler CR-Ausgleich konfigurieren Brutto-preis gemeinsam <input checked="" type="checkbox"/> Par-Ausgleich bei Rechen-Operatoren: + (plus) - (minus) * (Multiplikation) / (Division) Hinweis zu Dezimalzahlen (Zahlen mit Komma wie 0.5): Bitte zur Trennung der Kommastellen einen PUNKT verwenden!
		Formel: 0 3	2 Spezielle Formel zur Hcp-Berechnung 3 Individuelle Stableford-Punkte festlegen

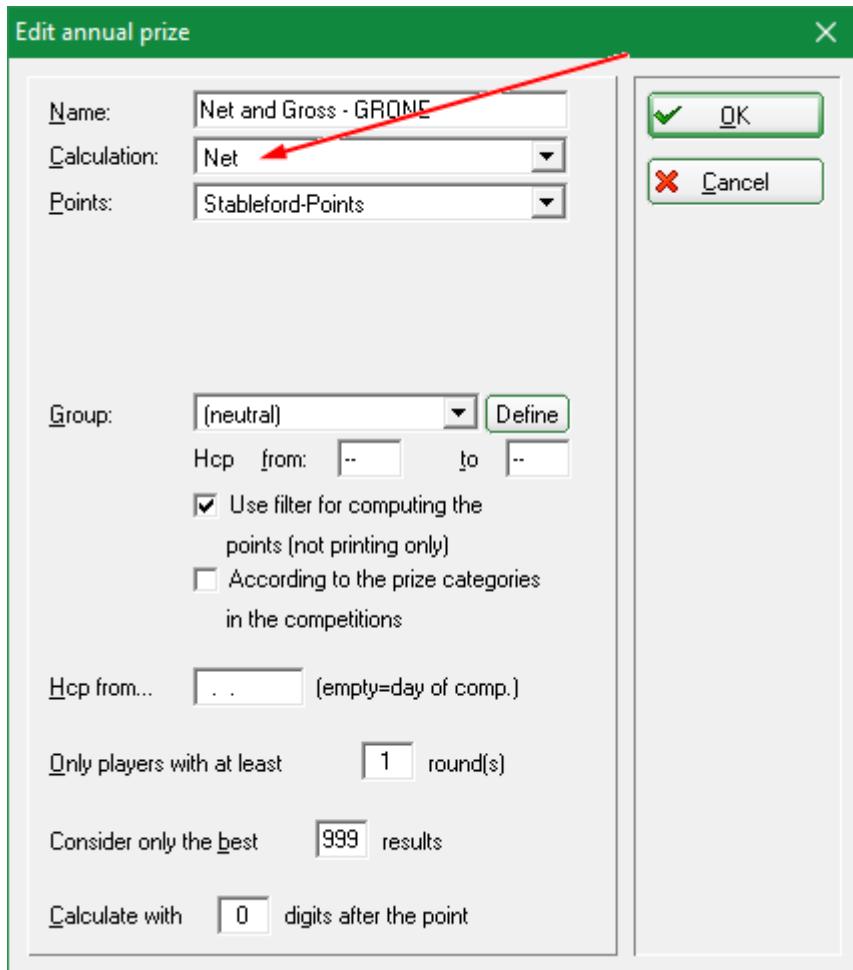

The copied tournament with these settings should under no circumstances be completed with HCP relevance! (If this happens by mistake, the results in the handicap history sheets at the DGV are duplicated, and may also be calculated once with the 0 formula)!

Use annual prices for the addition

For the addition of gross and net points, use the module **Annual prices**

The „BRUNE“ price (addition of gross and net) is set as follows:

As the HCP calculation in the copied tournament is set to zero, the net results in the copied tournament are the same as the gross results, so you only need to add the net results from both tournaments and you have the desired list:

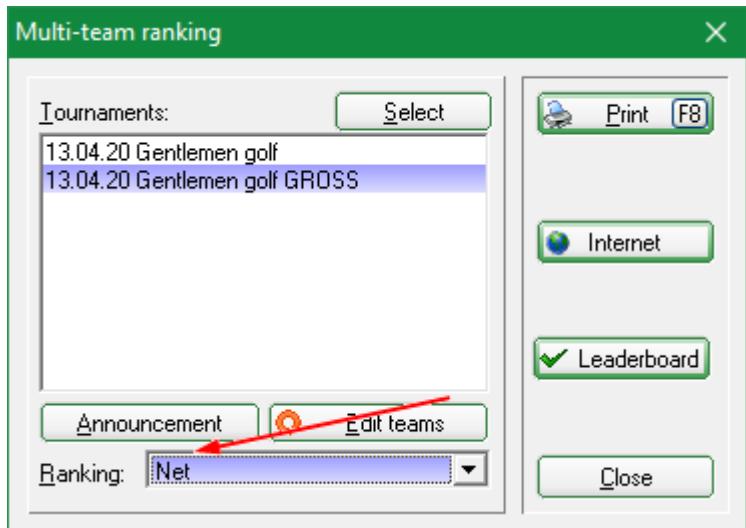

Net and Gross - GRONE

Printed: 13.04.20, 12:24 hour

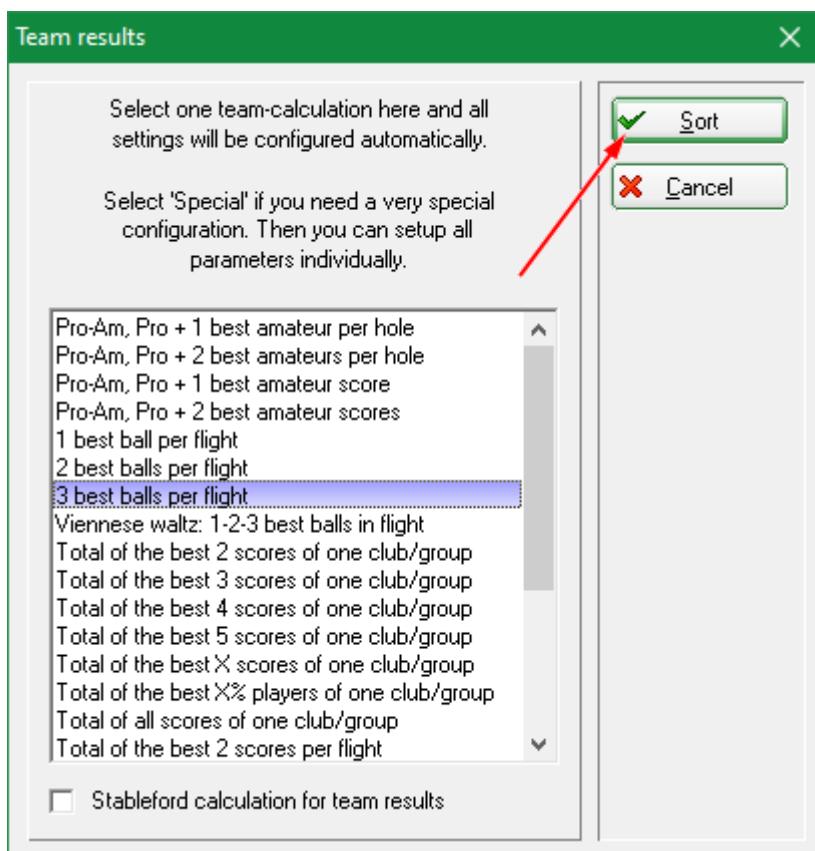

Pos.	Name	13.04.	13.04.	Total
1	First Name	37	39	76
2	Second Name	37	32	69
3	Third Name	45	23	68

Use multi-team scoring for addition

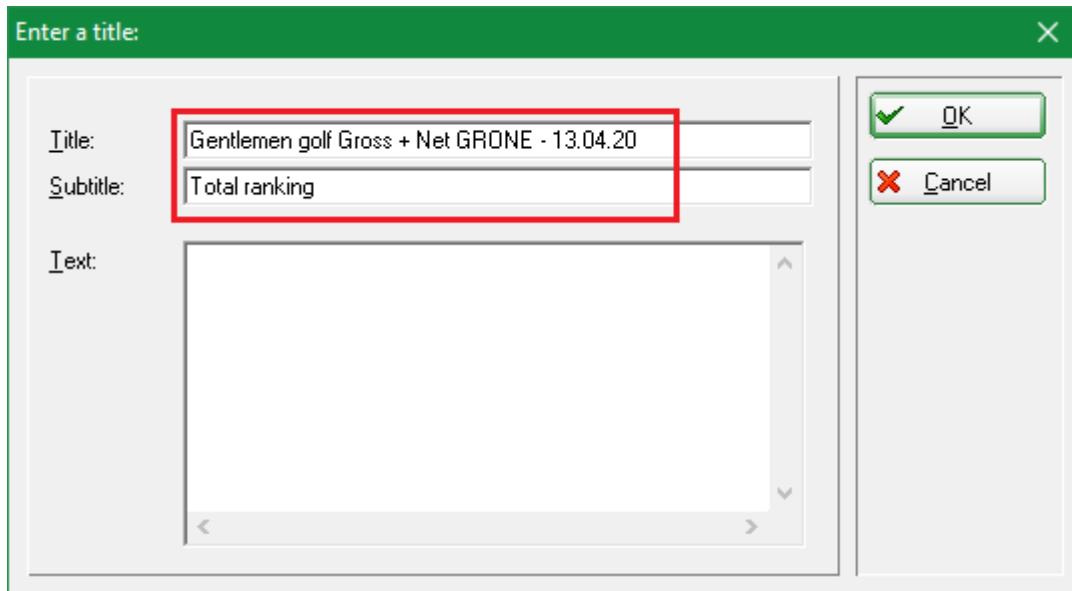

You can also use these two tournaments to add gross and net in the team ranking:
 You make the settings with the [Multiteam scoring](#)!

For example, set in both tournaments with the HELFER of the [team ranking](#) that you want to add up all the results of your 3-player games:

...and you will also receive the addition of gross and net with the appropriate heading when printing the multi-team ranking:
