

Convert to EURO

You can find this function under **Turnover/Year-end closing/Convert to EURO**. It was used when Germany changed over from DM to €.

A screenshot of a software dialog box titled "Convert to EUR". The dialog has a green title bar with a close button (X) in the top right corner. The main area is light gray and contains several sections. At the top left, there is a label "Factor:" followed by a text input field containing the value "1,955830". Below this input is the text "(the value of 1 EUR in the old currency)". To the right of the input field are two buttons: "OK" with a green checkmark icon and "Cancel" with a red X icon. Below the factor section is a list of seven items, each with a checkbox. The first five items are checked: "Article (normal)", "Accounts (normal)", "Vouchers (norma", "Cash register (normal)", and "Cash book (normal)". The last two items are unchecked: "Cash register archive (usually not)", "Timetable (important: only once!)", and "Card values (important: only once!)". At the bottom left, there is a section titled "Payment method for the old currency:". It contains two text input fields: "Abbreviation:" with the value "dm" and "Description:" with the value "Cash payment DM".
