Entry list

You want to invite all tournament participants with more than 3 attendances for an event, or to award them a prize for the highest participation rate?

You can find the needed function in PC CADDIE under ***Competition/Multiple Tournaments, Golf Weeks/Print.../Player List for multiple Tournaments***:

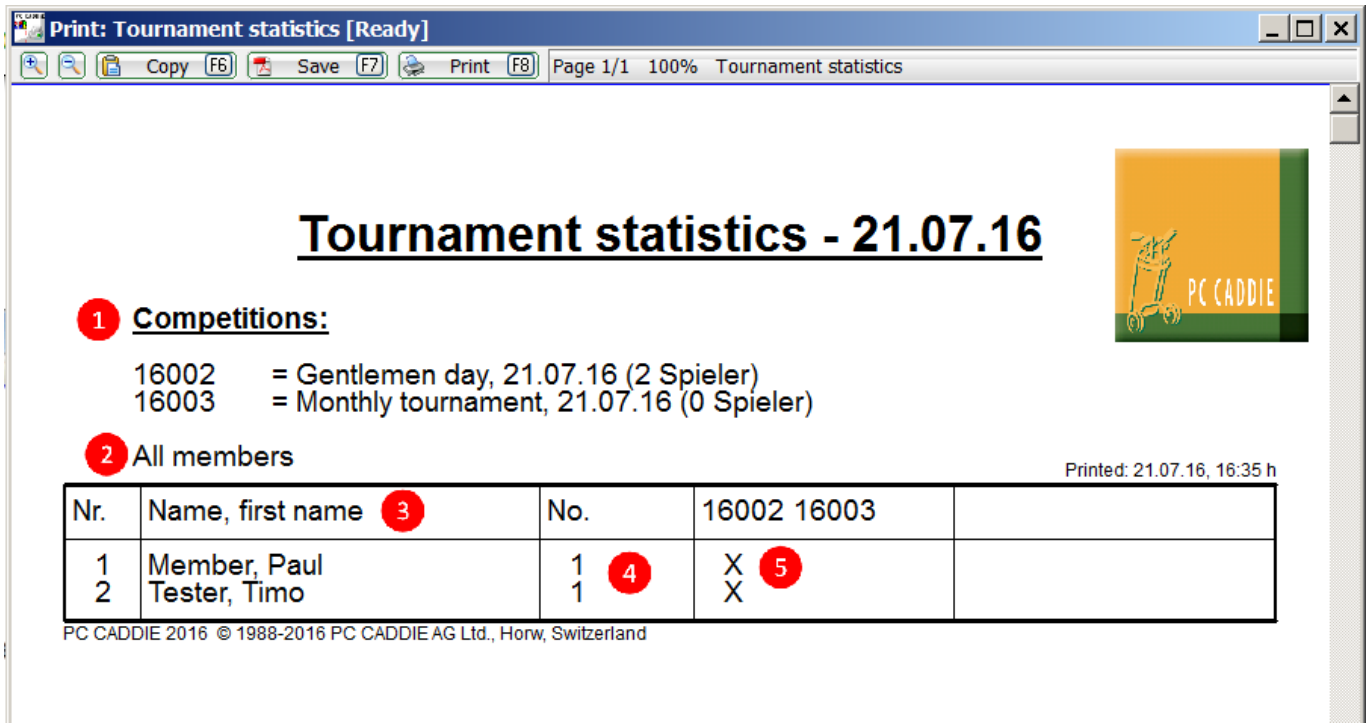

1. Press ***Select*** (F2) for choosing which tournaments should be considered.
2. ***Layout*** allows to access to all the layouts, including the ones for persons lists. You can create a layout for printing the participants list with the number of attended tournaments.

1. HINT: Use a layout with this code.
2. You can also set the ***Person group*** and the ***Order***.

Press ***Print*** (F8) to start the printing process:

You already have a well-arranged list showing which tournaments (1) and which persons groups (2)

were selected. You can further see that the members Timo Tester and Paul Member (3) each attended once (4) a tournament with the number 16002 (5).

HINT: If you want to sort this list based on the number of attendances, you have to first export it in Excel and sort it based on the column „Number“.
