Sign up players for multiple competitions

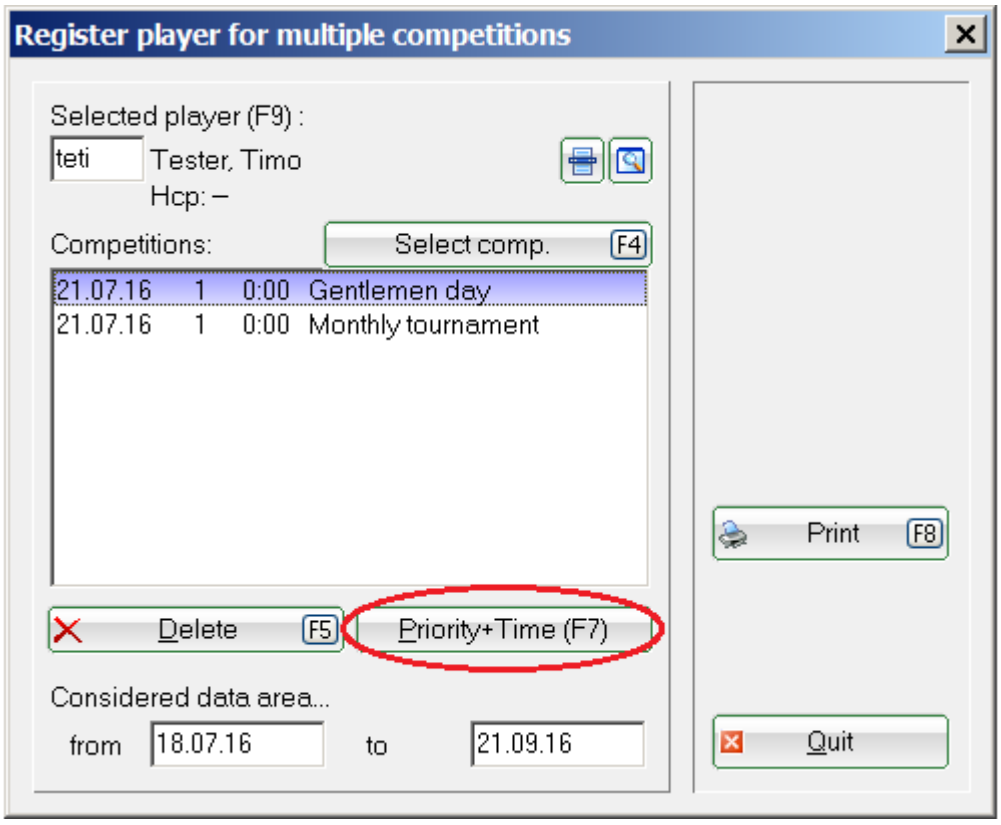

You have the possibility to register a player for multiple tournaments via ***Competitions/Multiple Tournaments, Golf Weeks/Register Player for multiple Tournaments***. You can also do this directly from the person mask by clicking on the ***Competition*** button. In both cases, it is necessary that the number of players and the entry limits are previously set for the competition (via the ***Internet*** button from the competition mask).

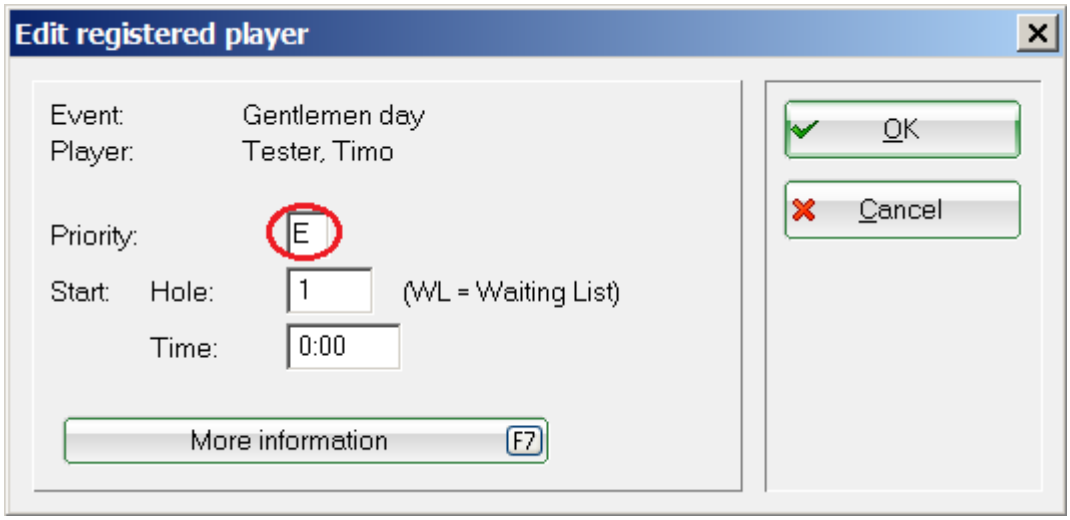

Enter the player in the ***Selected player*** (F9) field. Then determine the data area to be considered. Use the button ***Selected comp.*** (F4) to activate those tournaments where the player should participate:

Confirm your inputs with ***Ready***. If the player also has a preferred starting time frame, you should mark the desired tournament, click on ***Priority+Time*** (F7) and enter, for example, ***E*** for early:

Enter all the required data and close the dialog with ***OK.***
