

Sign up players for multiple competitions

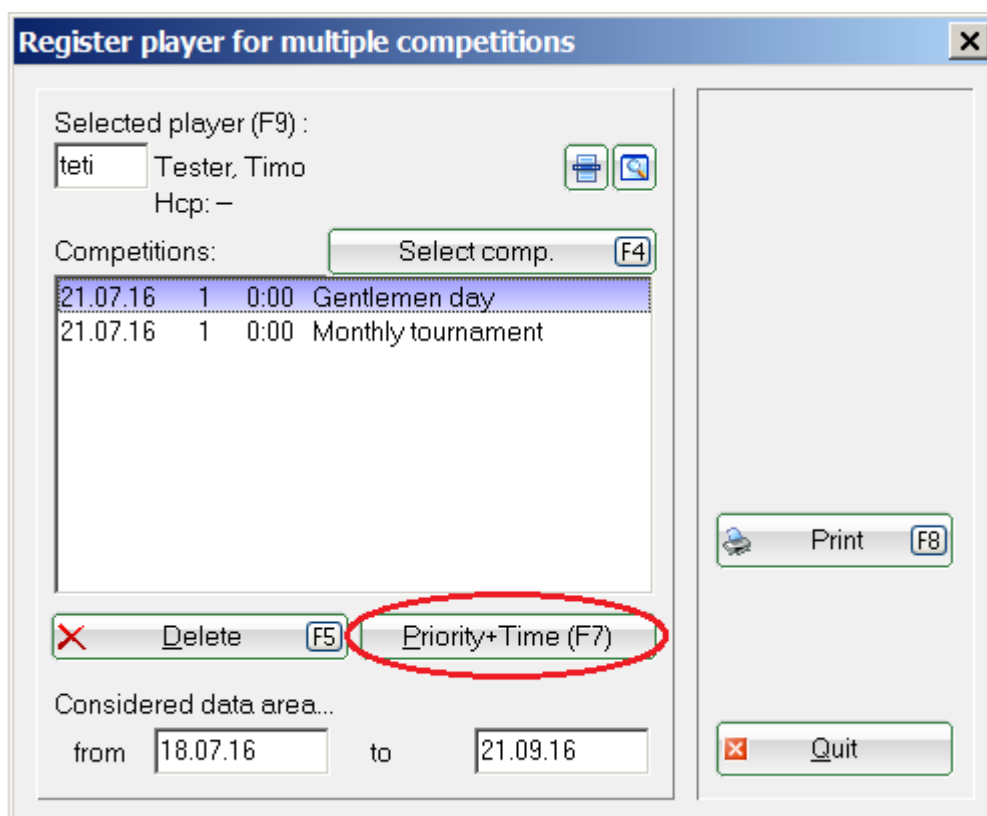

You have the possibility to register a player for multiple tournaments via **Competitions/Multiple Tournaments, Golf Weeks/Register Player for multiple Tournaments**. You can also do this directly from the person mask by clicking on the **Competition** button. In both cases, it is necessary that the number of players and the entry limits are previously set for the competition (via the **Internet** button from the competition mask).

The screenshot shows a software dialog box titled "Register player for multiple competitions". It features several input fields and buttons. The "Selected player (F9)" field contains the text "teti" and "Tester, Timo". Below it, the "Competitions:" field has a button labeled "Select comp. (F4)" which is circled in red. At the bottom, there are buttons for "Delete (F5)", "Priority+Time (F7)", "Print (F8)", and "Quit". A section labeled "Considered data area..." contains two date input fields: "from 18.07.16" and "to 21.09.16".

Enter the player in the **Selected player** (F9) field. Then determine the data area to be considered. Use the button **Selected comp.** (F4) to activate those tournaments where the player should participate:

Confirm your inputs with **Ready**. If the player also has a preferred starting time frame, you should mark the desired tournament, click on **Priority+Time** (F7) and enter, for example, **E** for early:

Edit registered player [X]

Event: Gentlemen day
Player: Tester, Timo

Priority: **E**

Start: Hole: (WL = Waiting List)
Time:

[F7]

[O]
 [C]

Enter all the required data and close the dialog with **OK**.
