

Add gross and net special scores

As a special rating, this is very individual and therefore only a special rating. There is usually a gross **or** a net rating!

The addition of gross and net can be achieved manually by a trained PC CADDIE user, but you need a copy of the competition!

Copy the tournament after entering the results

Copy the competition once all results have been entered. The instructions are available: =>[here](#)
It is important that you first open a new betting game, then click on **Copy**, and after selecting the competition to be copied, check all the boxes:

Edit the copied competition

To easily identify the copied tournament, it is best to add any text to the tournament name, for example gross: „Tournament name GROSS“

05.04.20 20006	18	Single-Sta	0/0	20006
05.04.20 Aggregate - hcp	18	Single-Str	5/0	20007
07.04.20 Pro Am 2020	36	Single-Str	0/0	20008
13.04.20 Gentlemen golf	18	Single-Sta	0/0	20009
13.04.20 Gentlemen golf GROSS	18	Single-Sta	0/0	20010

Now simply set the Hcp formula to „0“ as follows - then all results are „gross“, even in net

scores!!

The screenshot displays two overlapping windows from the PC CADDIE software. The background window, titled "Competition data: Gentlemen golf GROSS - 13.04.20 - Participants: 0 / Guests: 0", contains fields for "Name, Date, Course" (Code: 20010, Name: Gentlemen golf GROSS, Date: 13.04.20, Course: 4401.1 Aachener Golf-Club), "Competition conditions" (Playing form: Single, Scoring: Stableford, Tie: Most difficult/Easiest), and "Annual prize" (No). A red circle with the number "1" is placed over the "Name" field. The foreground window, titled "Special competition configuration", has a sub-window "Special handicap calculation" open. This sub-window contains a text area with instructions: "Here you can enter a special formula for calculating the competition handicaps. CAREFUL!!!: PC CADDIE will use the standard formulas according to the golf federation rules. You only have to use the following field in exceptional cases. Use these fields in the formula: H1 = HCP first player, H2 = HCP second player..., M1 = lowest HCP, M2 = highest HCP, SUM = Total all HCPs, ANZ = Number of players. Operators: + (plus), - (minus), * (multiplication), / (division). Formula: 0". A red circle with the number "4" is placed over the "Formula" input field. Below the sub-window, there are two buttons: "Special formula for HCP calculation" (marked with a red circle "3") and "Specify individual stableford points".

The copied game with these settings should never be completed as HCP effective!! (if this happens accidentally and the date and start times match the original tournament, then please complete the ORIGINAL competition again immediately!

Use annual prizes for the addition

You can now use the module [Annual prizes](#) to add gross and net points.

Annual prizes [X]

Competitions: [Select competitions] [F2]

Gentlemen golf, 13.04.20
Gentlemen golf GROSS, 13.04.20

The price „GRONE“ (addition of gross and net) is set as follows:

Edit annual prize [X]

Name: Net and Gross - GRONE
Calculation: Net
Points: Stableford-Points

Group: (neutral) [Define]
Hcp from: -- to --
☒ Use filter for computing the points (not printing only)
☐ According to the prize categories in the competitions

Hcp from... [] (empty=day of comp.)
Only players with at least [1] round(s)
Consider only the best [999] results
Calculate with [0] digits after the point

[OK]
[Cancel]

Since the HCP calculation in the copied tournament is set to zero, the net results in the copied tournament are the same as the gross results, so all you have to do is add up the net results from both tournaments and you have the list you want:

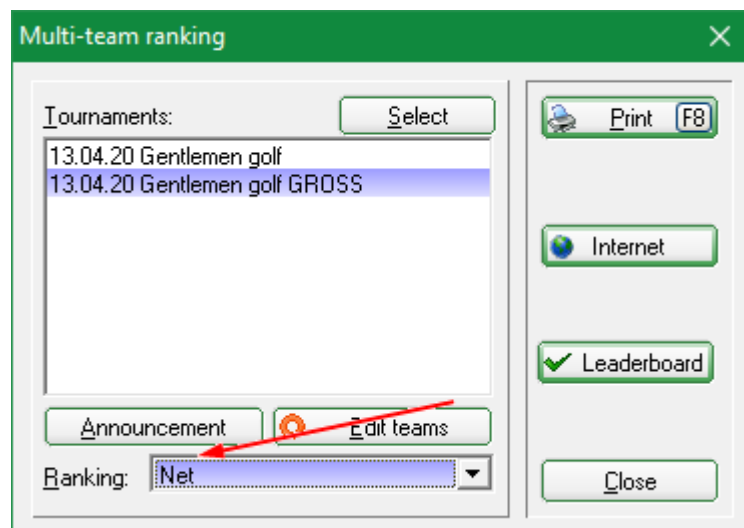

Net and Gross - GRONE

Printed: 13.04.20, 12:24 hour

Pos.	Name	13.04.	13.04.	Total
1	First Name	37	39	76
2	Herbert von Ansporn	37	32	69
3	Thaddeus Dax	45	23	68

Use multi-team ranking for the addition

You can also add gross and net in the team ranking with these two competitions: make the settings with the [multi-team ranking](#)!

In both competitions, for example, use the Wizard of the [multi-team ranking](#) to set that you want to add up all the results of your games of three:

Team results [X]

Select one team-calculation here and all settings will be configured automatically.

Select 'Special' if you need a very special configuration. Then you can setup all parameters individually.
