

Add gross and net special scores

As a special rating, this is very individual and therefore only a special rating. There is usually a gross **or** a net rating!

The addition of gross and net can be achieved manually by a trained PC CADDIE user, but you need a copy of the competition!

Copy the tournament after entering the results

Copy the competition once all results have been entered. The instructions are available: =>[here](#)
It is important that you first open a new betting game, then click on **Copy**, and after selecting the competition to be copied, check all the boxes:

Edit the copied competition

To easily identify the copied tournament, it is best to add any text to the tournament name, for example gross: „Tournament name GROSS“

05.04.20	20006	18	Single-Sta	0/0	20006
05.04.20	Aggregate - hcp	18	Single-Str	5/0	20007
07.04.20	Pro Am 2020	36	Single-Str	0/0	20008
13.04.20	Gentlemen golf	18	Single-Sta	0/0	20009
13.04.20	Gentlemen golf GROSS	18	Single-Sta	0/0	20010

Now simply set the Hcp formula to „0“ as follows - then all results are „gross“, even in net

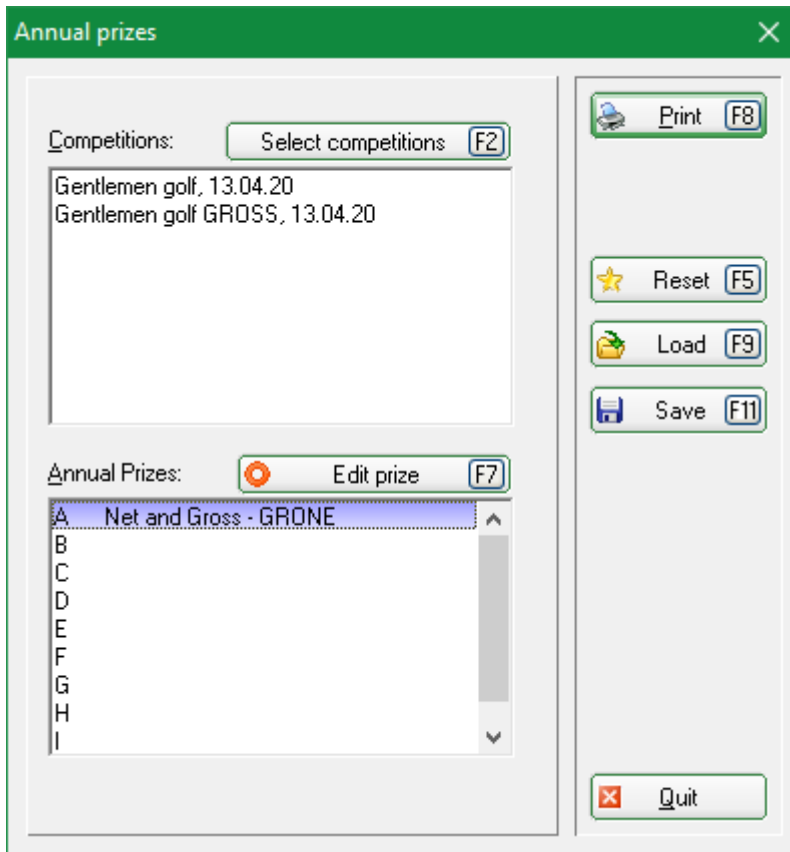

scores!!

The image shows a screenshot of the PC CADDIE software interface. The main window is titled "Competition data: Gentlemen golf GROSS - 13.04.20 - Participants: 0 / Guests: 0". It contains several configuration panels. The "Name, Date, Course" panel shows the competition name "Gentlemen golf GROSS" (marked with a red circle 1), date "13.04.20", and course "4401.1 Aachener Golf-Cl.". The "Competition conditions" panel shows "Playing form" set to "Single" (marked with a red circle 2) and "Scoring" set to "Stableford". The "Special handicap calculation" dialog is open, showing a warning: "CAREFUL!!! PC CADDIE will use the standard formulas according to the golf federation rules. You only have to use the following field in exceptional cases." It lists variables: H1 (HCP first player), H2 (HCP second player...), M1 (lowest HCP), M2 (highest HCP), SUM (Total all HCPs), and ANZ (Number of players). It also lists operators: + (plus), - (minus), * (multiplication), / (division). The "Formula:" field contains "0" (marked with a red circle 4). Below the dialog, there are two buttons: "Special formula for HCP calculation" (marked with a red circle 3) and "Specify individual stableford points".

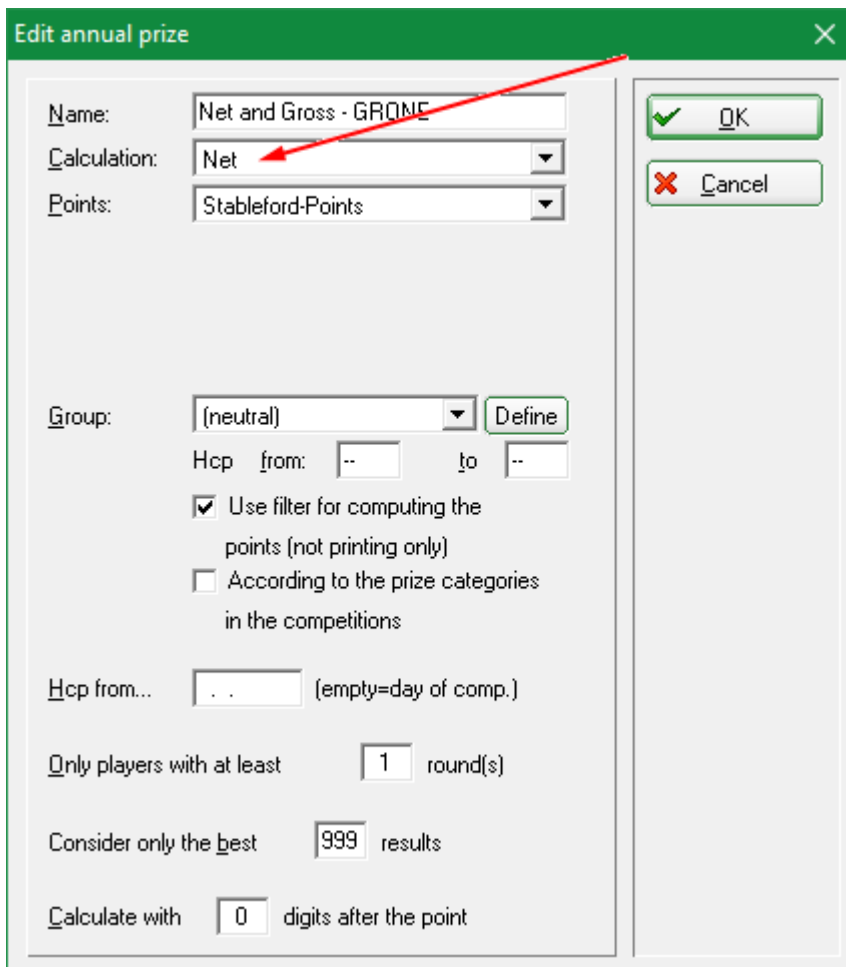

The copied game with these settings should never be completed as HCP effective!! (if this happens accidentally and the date and start times match the original tournament, then please complete the ORIGINAL competition again immediately!

Use annual prizes for the addition

You can now use the module [Annual prizes](#) to add gross and net points.

The price „GRONE“ (addition of gross and net) is set as follows:

Since the HCP calculation in the copied tournament is set to zero, the net results in the copied tournament are the same as the gross results, so all you have to do is add up the net results from both tournaments and you have the list you want:

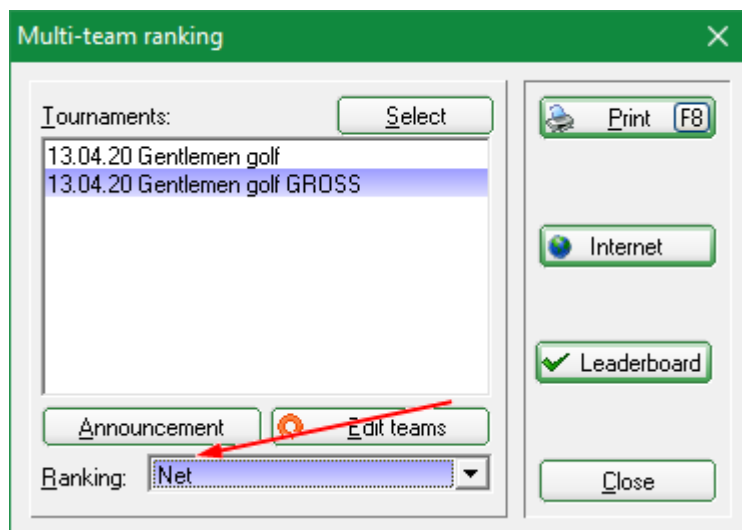

Net and Gross - GRONE

Printed: 13.04.20, 12:24 hour

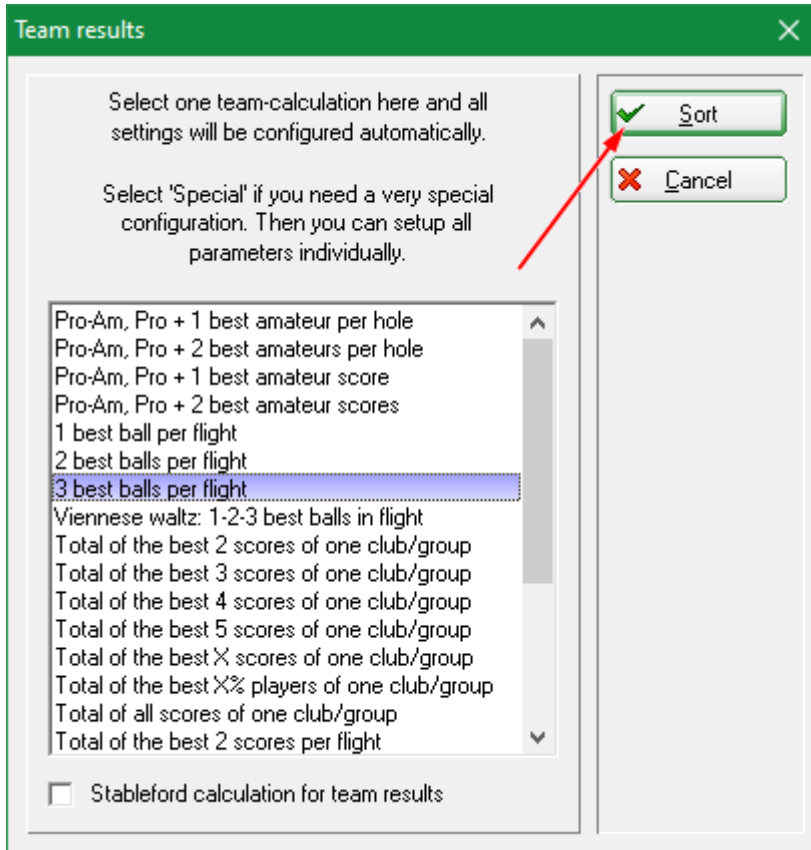

Pos.	Name	13.04.	13.04.	Total
1	[REDACTED]	37	39	76
2	[REDACTED]	37	32	69
3	[REDACTED]	45	23	68

Use multi-team ranking for the addition

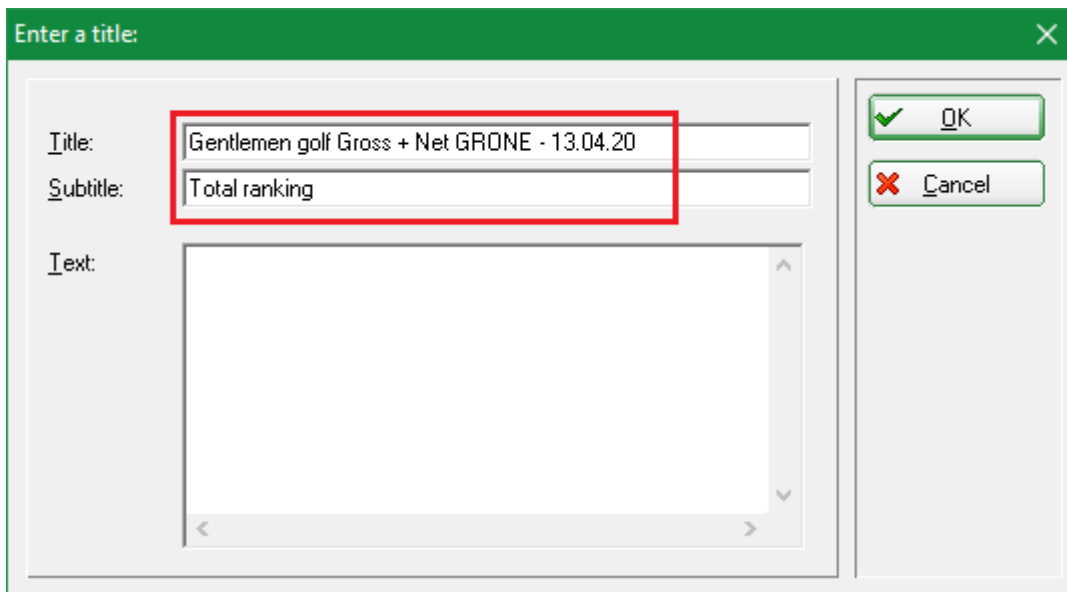

You can also add gross and net in the team ranking with these two competitions: make the settings with the [multi-team ranking](#)!

In both competitions, for example, use the Wizard of the [multi-team ranking](#) to set that you want to add up all the results of your games of three:

...and you get the addition of gross and net, with a suitable heading, when printing the multi-team evaluation:

Gentlemen golf Gross + Net GRONE - 13.04.20

Total ranking

Printed: 13.04.20, 14:30 hour

No.	Rd.	Name, Family name	Club	Hcp.	Gross	+/-
-----	-----	-------------------	------	------	-------	-----
